GREAT IDEA DELIVERED IN STYLE

GREAT IDEA DELIVERED IN STYLE

Forget about daily watering

It's not a secret that self-watering system simplifies planting. Our goal is to significantly reduce the cost of this innovation and make it available and affordable for everyone. In our development we offer a variety of solutions for all type of flowers, from the simplest to the most demanding..

Innovation is our philosophy

In developing of a product for your garden, home or office, we strive to create a quality new product for the easiest and convenient care for all plant types.

More creativity in design

A combination of convenience, esthetics and efficiency in designing – it's our task. Harmony of your interest and our products – it's our choice and priority.

Self-watering system

Self-watering system with water level control

Self-watering system with a drainage cartridge

Self-watering wick system

Color is a choice of mood

In a wide range of our collection there are cheerful colors of children's playground and discreet shades of business offices.

YOU SAVE YOUR TIME:
The ideal solution for people with limited free time. No need for daily watering.

SOIL THERMOBALANCE SYSTEM:
Thanks to the additional external pot, an ideal thermal balance of the soil is achieved, which excludes the hypothermia of the root system in winter and the drying out of the soil in summer.

OPTIMAL GROWTH:
The drainage holes ensure air circulation in the soil, thus ensuring the health of your plants.

HEALTHY ROOTS:
One of the common causes of plant diseases is the stagnation of roots in water. We've found a solution: the water tank is located below the root system of the plant, thus the roots are protected from stagnation in water.

MAXIMUM WEAR RESISTANCE:
Very good UV wear resistance and maximum corrosion resistance.

ENJOY THE COMFORT AND THE CLEANLINESS:
In a traditional flowerpot with a saucer, when watering, the water leaks and leaves dirty traces. Now you can enjoy convenient watering and cleanliness thanks to the water tank located inside.

Santino

We are an innovative company

We strive to be the most creative in design, forms and materials

New technology is our priority

We use the newest machines and materials

Ideas become reality in a short time

We have an excellent team and use the newest equipment in production for the mold injections

Special offer for vendors

More attention to logistics, packaging and marketing

Reliability, discipline and guaranteed delivery

We have experience in long term supply of products to large retail stores and wholesale buyers.

We care for the planet

Santino Group owns a production plant for recycling used plastic.
