ABOUT US

Clarke Group Construction is a family-run business, incorporated in the late 90's. Originally a small Joinery operation, Steve and Paul Clarke have grown Clarke Group into a successful multi-million-pound construction company servicing numerous different sectors. As the business continues to grow, it is of great importance to them to preserve the company's traditional values and friendly personal approach.

Having worked in areas such as commercial, education, health, heritage, housing, leisure, poultry, and retail, we have gained an invaluable wealth of knowledge that is vital to the service we provide to our Clients.

Operating from our Head Office and workshop facility in Boston, Lincolnshire, as well as our office in Lincoln, Clarke Group Construction are dedicated to working in partnership with our Clients, committed to having a sustainable impact on the communities in which we work and place the highest importance on the training and development of our people.

We are proud to introduce our company brochure, providing a summary of our business and a demonstration of our expertise and experience.

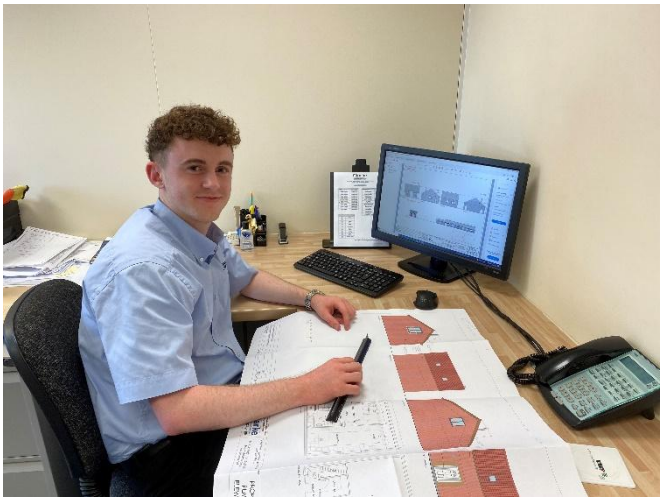
OUR PEOPLE

We know that outstanding projects require outstanding personnel.

Our core value is teamwork, and we take great pride in assembling the most qualified team for each task. We place the utmost importance on providing our staff with the training, guidance, and support they need to deliver successful projects we can all be proud of. We also deeply value their loyalty, knowledge, and dedication.

With decades of collective experience, we are committed to both sharing trade expertise and equipping our team with the new skills needed to thrive in a rapidly evolving industry. We actively invest in the next generation through apprenticeships and development programs, offering hands-on experience, mentorship, and opportunities across both labour and office-based roles. By developing emerging talent, we are ensuring a skilled, motivated workforce for the future of our industry.



WHAT WE DO

From the ground up, we provide experience and in-depth knowledge, with direct delivery capabilities ranging from engineering and design to construction.

We consistently deliver our projects on time, to budget and to an exceptionally high standard. These projects span across a variety of disciplines and construction sectors. This would not be possible without our dedicated in-house team but also our reliable supply chain.

We value traditional methods and expert craftsmanship while also being open to new ideas and the newest technologies.

ACCREDITATIONS/CERTIFICATIONS

Clarke Group Construction are accredited to CHAS, SafeContractor and Constructionline. We are also UKCA accredited for our structural steel components; providing evidence that the products comply with all European health, safety, and environmental protection legislation.

In 2024 we also became ISO 9001, 14001, 45001 certificated – demonstrating our commitment to continuous improvement and development.

We are members of the Lincoln Chamber of Commerce and are on the PAGABO Framework.

ISO 9001, ISO 14001,

ISO 45001

Cert No. 24212

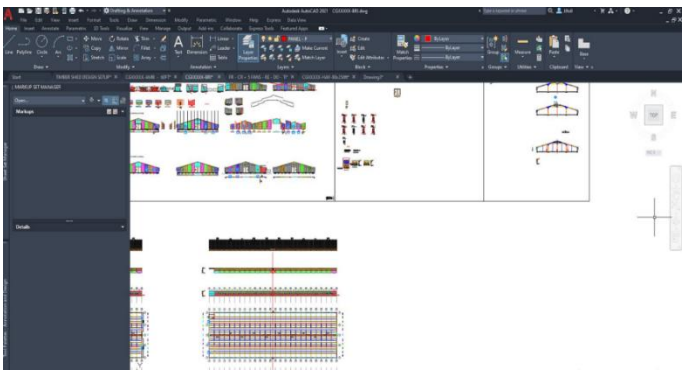
IN HOUSE RESOURCES

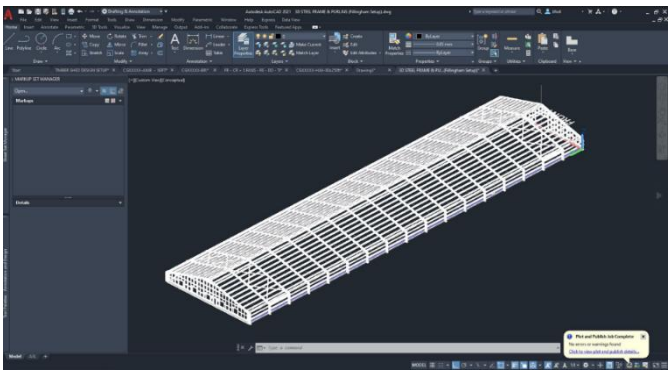
We are continually investing in the business to ensure that we remain efficient and competitive.

Our on-site joinery workshop now solely serves our own contracts and offers a beneficial in-house facility.

We have our own plant machinery, which allows us to maintain more in-house control and provide an outstanding service to our sites. We also have our own HGV with a low loader, flat bed and tautliner trailer to transport our plant and manufactured goods. This reduces dependency on third-party transporters and consequent delays.

We also have our own in-house design team equipped with the latest AutoCAD software.





COMMERCIAL & INDUSTRIAL

With decades of experience in both commercial and industrial sectors, we design and deliver new offices, production facilities, warehouses and more. Whether it's a full new build, refurbishment or facility upgrade, we ensure minimal disruption around normal operations.

Leveraging modular construction, expert project-management and rigorous Health & Safety standards, we deliver sustainable, efficient, turnkey solutions tailored to your business needs.

EDUCATION

Through well-designed, creative, and comfortable spaces, we create learning environments. Working in close association with nurseries, schools, and advanced education suppliers, we establish spaces that are compliant with current legislations that are improving educational establishments.

Our experience includes student accommodation, libraries, lecture halls and teaching spaces.

HEALTH

Our established history of projects in medical services incorporates care facilities and care homes. We work with clinical and non-clinical staff to understand the functional necessities, conveying a patient-focused service.

Because of working in close proximity to patients, we liaise with staff to use suitable working practices for a medical environment ensuring there are no disruptions to patient care.

HERITAGE

Our expertise in the preservation, repair and renovation of historic and listed buildings is extensive. By applying suitable materials and techniques along with our understanding of best practice principles, we are able to accurately recreate and restore original craftsmanship.

Our passion for craftsmanship spans decades, and the breadth of our client portfolio, which includes high-profile projects, attests to our experience and expertise in specialised project delivery.

HOUSING

We design beautiful homes that people aspire to live in. We work closely with Clients on every project, from custom-built affordable homes to prestige residential developments, to ensure that the Clients' needs are met, and they are provided with the end result they'd envisaged.

HOTEL & LEISURE

Our hotel experience ranges from one-off independent hotel projects to repeat business.

Our expertise in the leisure industry includes leisure centres, swimming pools, theatres, museums, sports stadiums, and exhibition centres. The type of work we undertake includes delicate refurbishment works to historically significant cultural attractions, along with professional sporting facilities and out of town leisure complexes.

POULTRY

Clarke Group Construction also specialises in the design and production of poultry barns. We can offer a fully designed package to satisfy both the needs of our clients and industry standards, as well as a design solution that provides the greatest level of environmental management and bird welfare.

In addition to newly built poultry houses, we have vast experience doing exterior work on numerous older poultry buildings throughout Lincolnshire and the UK.

We understand the complexities of running a working poultry farm and the obstacles faced to ensure crop continuity. Our knowledge and understanding of poultry house construction keep us ahead of market expectations.

PUBLIC REALM

At Clarke Group Construction, we have always valued the chance to work on projects that impact on the community's quality of life. Delivering creative and useful public spaces and civic amenities while closely partnering with local governments and councils to enhance communities and the places people visit, live and work.

We take great pride in the calibre of our work in the public sector, having completed a variety of projects such as community halls and libraries. We also recognise the significant impact our projects can have on the development and identity of a town, city or village.

REFURBISHMENT

Our expertise spans from restoring and repurposing existing spaces to taking buildings back to their original frame for redevelopment. We offer high end refurbishment services to both the public and private sectors.

Projects have included extensive renovations of sensitive living and working spaces such as offices and hotels. Additionally, we have restored and expanded buildings on several heritage and listed sites, requiring specialised trade craftsmanship and a considerate approach to the blending of modern and historic architecture.

RETAIL

Our experience in the retail industry allows us to offer construction, retail commercial fit out, and refurbishment services.

We know that in this dynamic market, adaptability is essential, and we continue to improve our services to better serve our retail clients. Our sensitive work style and minimal trading disruption demonstrates our appreciation for the challenges faced by the retail industry.

OUR LOCATIONS

We have our head office based in Boston, Lincolnshire, with another office based in Lincoln, to suit all construction needs. Working on projects across the UK, we welcome enquiries for both local and nationwide contracts either via our local offices or via info@clarkegroup.co.uk
