From establishing Dubai's first flour mill in 1976 to transforming into one of the most preferred suppliers in the region, we have come a long way. Our expansive storage capacity also confirms our growing reputation as a major regional supply hub for flour.
Manufactured using the finest durum wheat flour from our mills, our semolina is available in coarse or fine grain variants. Using the most sophisticated processing techniques, we serve customers in the preparation of pasta, desserts, biscuits and artisan breads.

## Oats

Made in a state-of- the-art oats plant, the newest additions to our nutritious product portfolio feature traditional flaked oats in a variety of sizes, quick cook oats, as well as whole & cut groats – addressing the needs of retail and commercial customers.
In response to the growing consumer demand for oats and oat products, we have increased our production capacities and continue to invest in the development of our technology and processes so that our customers receive a steady supply of freshly milled oats.

## Eggs

Our superior quality eggs are produced at our poultry farm in the foothills of the Masafi Mountains, which is the UAE's largest and the most technologically advanced. From chicken rearing to delivery, our quality control supply chain is impeccable.
Our flock is treated to a 100% natural vegetarian diet for assured traceability and freshness. The result is eggs that are rich in taste, full of natural proteins, low in saturated fats and packed with essential vitamins, calcium and minerals.
