Choose the drive system that suits your work

Honda petrol · EGO-electric · STIHL-electric

Engine: Honda GXV
Engine type: Petrol

Power: 4,5 kW
Weight: 14 kg
Hand/arm vibration: 5,3 m/s²

Engine: EGO PU2700*
Engine type: Electric · 56V

Power: 3,5 kW
Weight: 11,8 kg
Hand/arm vibration: 3,9 m/s²

Engine: STIHL Powerhead*
Engine type: Electric · 72V

Power: 3 kW
Weight: 11,5 kg
Hand/arm vibration: 3,9 m/s²

**Batteries and chargers available with the purchase of the machine.*

Weedee PRO® Machine – Petrol Engine / *Electric Motor*

Rotational speed	+- < 200 rpm
Weight	79 kg
Dimensions	160cm x 80cm x 73cm
Working width	45 cm - Weedee® brush
	70 cm - TWT® brush

Weedee® Weed Brush
Removes weeds and moss from surfaces and from between joints.

Terrazza Wire TECH® (TWT) Brush
Removes long weeds from large paved surfaces.

Weedee PRO® Kit Consumables

AXI® Sweeping Brush with Collection Bin (optional)

Weedee® Weed Brush

Terrazza Wire TECH® Consumables

Bundle of braided metal tufts

Bundle of synthetic tufts

Protective cap

HONDA The Power of Dreams

EGO POWER BEYOND BELIEF

STIHL®

Terrazza Weedee PRO®: Thorough and efficient weed removal with the Weedee® and Terrazza Wire TECH® brushes

The **Terrazza Weedee PRO®** is unique in its class thanks to the **significantly reduced rotational speed** of the brushes. The **highly manoeuvrable** Weedee PRO® removes weeds and moss from paved surfaces without the use of chemicals, high pressure or thermal treatment.

Depending on the type of work, different types of brushes can be mounted on the Weedee PRO® machine. **Ultimate versatility!**

The **Weedee® brush** removes weeds from the surface and from between joints, making it ideal for quick and easy intermediate maintenance treatments.

The **Terrazza Wire TECH® brush (TWT)**, with a working width of 70 cm, is ideal for heavily infested surfaces. The synthetic and braided steel tuft bundles remove long, dense weeds from the surface and can be replaced when heavily worn.

For **sweeping**, whether for daily cleaning or collecting removed weeds, the **AXI® sweeping brush** can also be mounted on the Weedee PRO® machine. The AXI® brush is optionally available with or without a collection bin as part of the Weedee PRO® Kit.

Each brush is equipped with a connector, making brush changes quick and easy.

The Terrazza Weedee PRO® can be used on **a wide range of surfaces**, including terraces, driveways, car parks, pavements, and more. It is suitable for surfaces made of paving stones, concrete, cobblestones, brick, asphalt, and more.

The Terrazza Weedee PRO® has been specially developed to meet the needs and requirements of professional contractors, landscapers, municipalities and local authorities.

Sustainable and ecological weed removal

When removing weeds with the Weedee PRO® machine, **no chemicals or detergents** are used. This makes the Weedee PRO® an **ecological and ideal solution for use in areas where plants, people and animals are present.**

Thanks to Terrazza MC®'s unique concept, combining precisely controlled vertical pressure, minimal resistance and low rotational speed, **brush wear is kept to a minimum**, contributing to the product's durability.

The Weedee PRO® is highly **versatile** thanks to its simple click system, allowing the two brushes to be changed quickly and without tools. This means **one machine** can effortlessly be used for two different applications, not only **saving space and costs** but also making the work much **more efficient.**

With the Weedee PRO®, there is no need for two separate machines. One machine is all you need to get both jobs done.

The Weedee PRO® is also available with an EGO or STIHL electric motor. Both electric versions offer significant environmental benefits: they produce **no exhaust emissions** and operate at a considerably **lower noise level**. This makes the work not only **more environmentally friendly**, but also more pleasant for both the operator and the surrounding environment.

The Weedee PRO® has been developed with a strong focus on **user comfort and efficiency**. The ergonomic, height-adjustable handlebar and well-balanced weight distribution **reduce physical strain**, while the low-vibration design helps minimize hand and arm fatigue. This allows the operator to work **comfortably for longer periods**, even during demanding tasks.

The Terrazza Weedee PRO® is a unique concept, developed with patented Terrazza technology that ensures sustainable and ecological weed removal.

Working with the Terrazza Weedee PRO® offers nothing but benefits

The Weedee PRO® is available in three versions: with a powerful Honda GXV 160 petrol engine, an EGO PU2700 electric motor or a STIHL Powerhead 72V electric motor.

The electric versions combine a lower environmental impact with strong performance. The EGO version operates on the Arc Lithium 56V platform, while the STIHL version uses the 72V platform. The operation and low brush rotational speed (± < 200 rpm) are the same across all three versions.

Benefits of Terrazza Weedee PRO® Technology

- The brushes of the Terrazza Weedee PRO® are designed to deliver maximum results at **low rotational speed.** This offers the following **benefits**:

- **No projection** of weeds, mud or sharp objects.
- **Removes weeds and a large part of the root system.**
- **No damage** to the surface, kerbs, walls, signposts, lamp posts, etc.
- The machine is **easy to handle** and produces relatively **little dust**, making it comfortable to use both indoors and outdoors.
- **Saves time** during daily cleaning and improves the safety and appearance of your infrastructure.

- **Changing** the different **brushes** on the machine is **quick and easy.**

- The handlebar can be folded down without tools.

- **Compact dimensions**: easy to store and transport.

Electric Motor Versions

The EGO PU2700 delivers 3.5 kW on the Arc Lithium 56V platform. **The EGO batteries are compatible with professional EGO Power+ hand tools.** The standard configuration with two 12 Ah batteries provides approximately two hours of operating time, with a fast charger and a runtime indicator.

The STIHL Powerhead 72V delivers 3 kW on a 72V platform. **This version also features the same low rotational speed as the other models, offering a quiet, emission-free solution for professional weed management.**

Both battery-powered versions are easy to recharge, and the batteries can be changed quickly and effortlessly.
