BISHOP JONES

Know your numbers. Grow your dealership.

Management accounts for tractor and agricultural machinery dealerships

Sales look healthy, but cash is tight? You're not alone. Management accounts for dealerships are our specialism. We turn the data from your dealer management system into clear, regular reports, so you can see what's really happening in your business and act before the year end, not after it.

What you get

- Monthly or quarterly management accounts
- Stock and parts reporting, including parts days supply and obsolescence
- Margins by department
- Cash flow reporting
- The dealer KPIs that matter to you
- Year-end planning, including stock provisions and demo machinery

Works with your system

We work with figures from dealer management systems including Ibcos Gold and Pyramid TrueTrack.

Keep your auditor

Already have an auditor you're happy with? Keep them. We work alongside them, so you get specialist management accounts without changing your audit arrangements.

Why Bishop Jones

- ICAEW Chartered Accountants and Tax Advisers
- First-hand experience auditing dealerships
- Working with dealerships across the UK
- Author of "7 Accounting Howlers Tractor Dealers Make"
