Stand 10.246

AGRICULTURAL CHAIN

Built for the machinery that can't stop.

Roller chain for grain, silage, forage and handling equipment. British and American standard, in carbon steel, stainless, maintenance free and straight sided.

- **Solid bush design.** more bearing area, longer wear life in abrasive conditions
- **Dynamic pre-loading.** bush and pin seated at build, no re-adjustment after run-in
- **Shot-peened plates.** stress relieved after holing for higher fatigue resistance
- **ISO 9001 accredited.** manufactured and inspected to a documented standard

Standard Carbon Steel	Stainless Steel	Maintenance Free	Straight Sided

WHERE IT WORKS

- Grain handling
- Elevators
- Silage & forage
- Crop dryers
- Manure spreaders
- Harvest machinery

> “CSUK chain is developed and manufactured to the standard of a tier 1 chain, not a commodity one.”

CHAIN FEATURES

Why CSUK chain lasts longer

CSUK roller chains are designed and engineered to give superior fatigue and wear resistance, using the specification of a tier 1 chain rather than a commodity one.

01 ISO 9001 accredited
Manufacture and inspection run to a documented quality standard.

02 Solid bush design
A solid bush improves the bearing area, which increases wear life.

03 Shot-peened plates
Plates are shot-peened after holing to optimise stress distribution and raise fatigue resistance.

04 4-way pin riveting
Each pin end is staked at four symmetrical points, locking the side plates against shear, shock load and vibration.

05 Wide-waisted plates
The waisted profile spreads stress across the plate for a longer fatigue life.

06 Dynamic pre-loading
Bush and pin are seated at build, so there is less to adjust after the first run-in.

07 Enhanced lubrication
A proprietary, environmentally friendly lubricant is applied at build for greater wear resistance.

08 Optimised interference fits
Every fit is specified for the best possible interference, protecting fatigue life.

SECTORS WE SUPPLY

- Agricultural
- Asphalt, Water & Recycling
- Bakery & Dairy
- Beverage, Food & Processing
- Cement
- Conveyor
- Mining
- Sugar
- Timber
- Water Treatment

Supplied through the UK exclusive distributor, with stock, cut lengths and technical support behind it.

British Standard & American Standard
Carbon, stainless, maintenance free, straight sided
