

# APPROVE

## ELECTRONIC BUSINESS

## CASE MANAGEMENT

### An accepted, configurable cloud-based software solution

Capture and manage your in-service business cases to enable their efficient and effective scrutiny, approval and implementation using Approve, a well-accepted software foundation. Our experienced consultants work with you to configure Approve to meet your organisation's needs.

Approve gives you an auditable record of the golden thread of management information, along with supporting documents, behind the justification of a proposed investment in a project or activity.

### Who is behind Approve?

Since 2008, the team at tImNexus has been collaborating with public sector organisations to create informed consultancy and easy-to-use software.

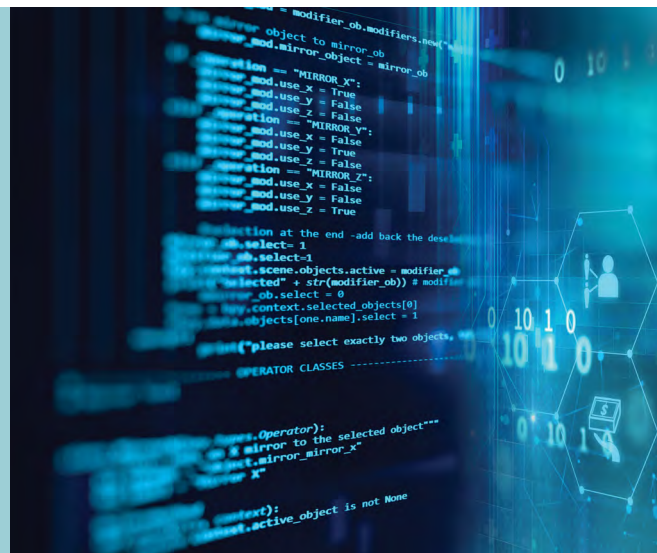

Our experience of being in the customers' shoes means we understand the vital need for compliance, accountability and transparency when streamlining these high-value, and often high-risk projects and activities.

We have now built a series of trusted software foundations which may be used separately and in combinations, to support complex requirements throughout the project or system lifecycle.

In April 2018 we received the Queen's Award for Innovation for the way in which our work has progressed a number of significant public sector projects, with proven savings of time, efficiency and money, as well as improvements to safety and security.

### Approve Features Leading to Benefits in Cost, Time and Risk

- Transparency across all collaborators, internally and externally throughout the entire business case process.
- Captures supporting documents and justifications that helps stakeholders to make informed and timely investment decisions.
- Promotes process consistency through agreed approval timelines and workflow that comply with the appropriate governance and policy.

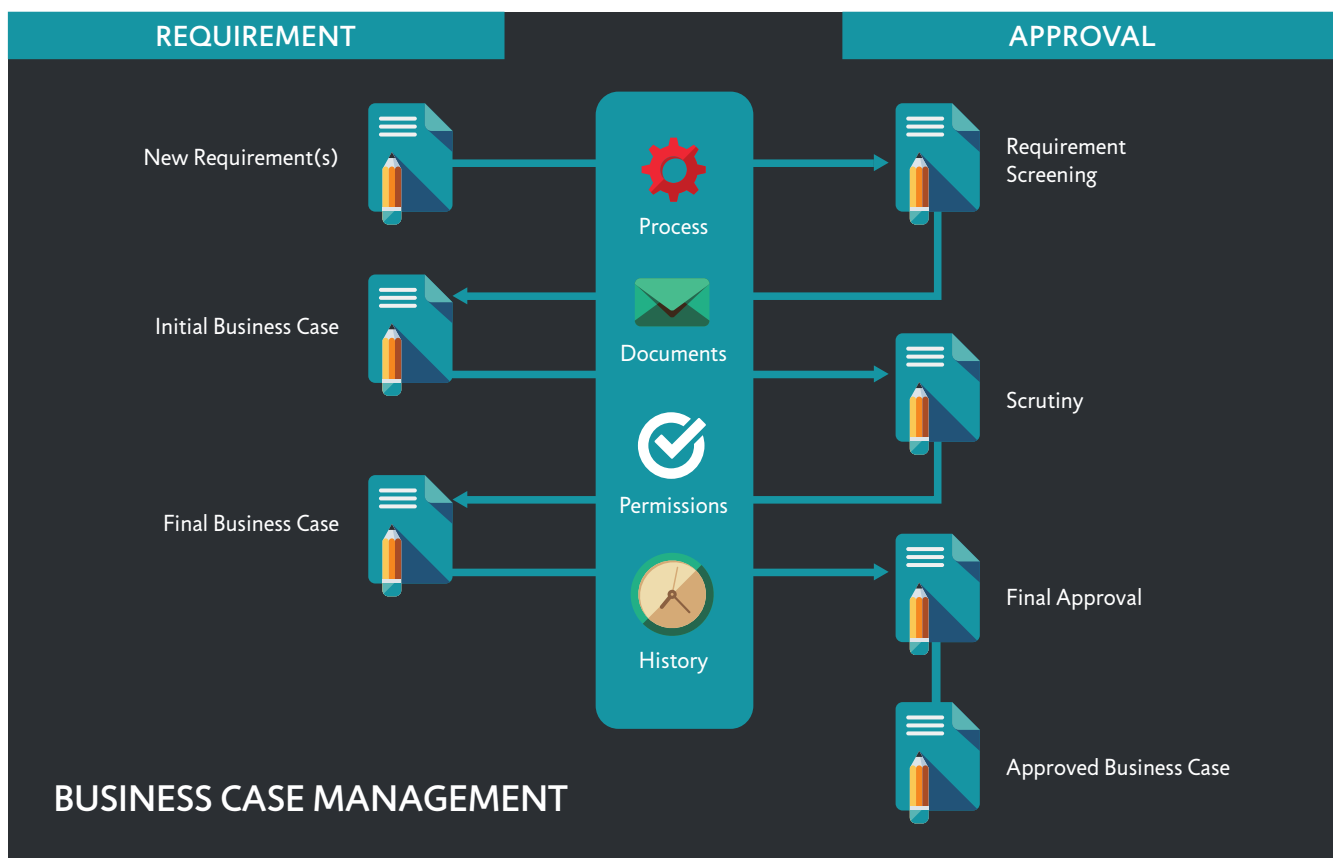

## The collaborative process

During the life of a complex project or activity, various stakeholders will be involved, often across different organisations. We define their roles and make collaboration easier, auditable and informative:

## How Approve works

The table below demonstrates how Approve unites all collaborators, and supports them with an auditable electronic trail through the defined steps required from the start-to-finish of a business case process.

## Bringing Approve into your organisation

We have a well-defined on-boarding process and it all starts with an initial contact, either by phone, email or from our website:

Telecom House, 125-135 Preston Road,  
Brighton BN1 6AF
