

Securus
Safeguard Monitor Protect

Guidance for Home Learners

During the current Covid-19 crisis, all schools should have access to eSafety monitoring for remote learners.

Securus XT offers this capability for school managed Windows & Chrome devices, ensuring pupils are safeguarded from online dangers whilst away from their normal school environment

Helping to keep
children &
teachers safe when
working at home

Some points you may want to consider!

Ensure pupils read & understand school eSafety policies

Have all device settings & controls been enabled?

Are all vulnerable children assigned to a specific member of staff?

Do all staff have secure access & resource available to react to any safeguarding issues?

Set up email alerts for designated staff who monitor activity

Are all staff aware of the procedures to follow if dealing with a child at risk?

Securus
Safeguard Monitor Protect

Guidance for Home Learners

Staying Safe whilst learning remotely

Remote learning can give pupils a lot more freedom than in the school environment. Keeping them safe from online dangers will still be a primary concern for designated safeguarding leads and guiding pupils on the safe use of social media platforms and gaming sites will help educate and keep learners safe. Having Securus in place to monitor activity on Windows & Chrome devices already managed by the school will continue to protect pupils who could be vulnerable or at risk, identifying possible areas of concern such as mental health issues or online abuse.

Social Media

Whilst pupils are learning from the home environment you may want to set some guidelines for social media use. Securus will be monitoring devices in the same way as in the school environment and therefore any online activity will be captured if inappropriate activity is taking place, including social media and chat rooms.

Online Gaming

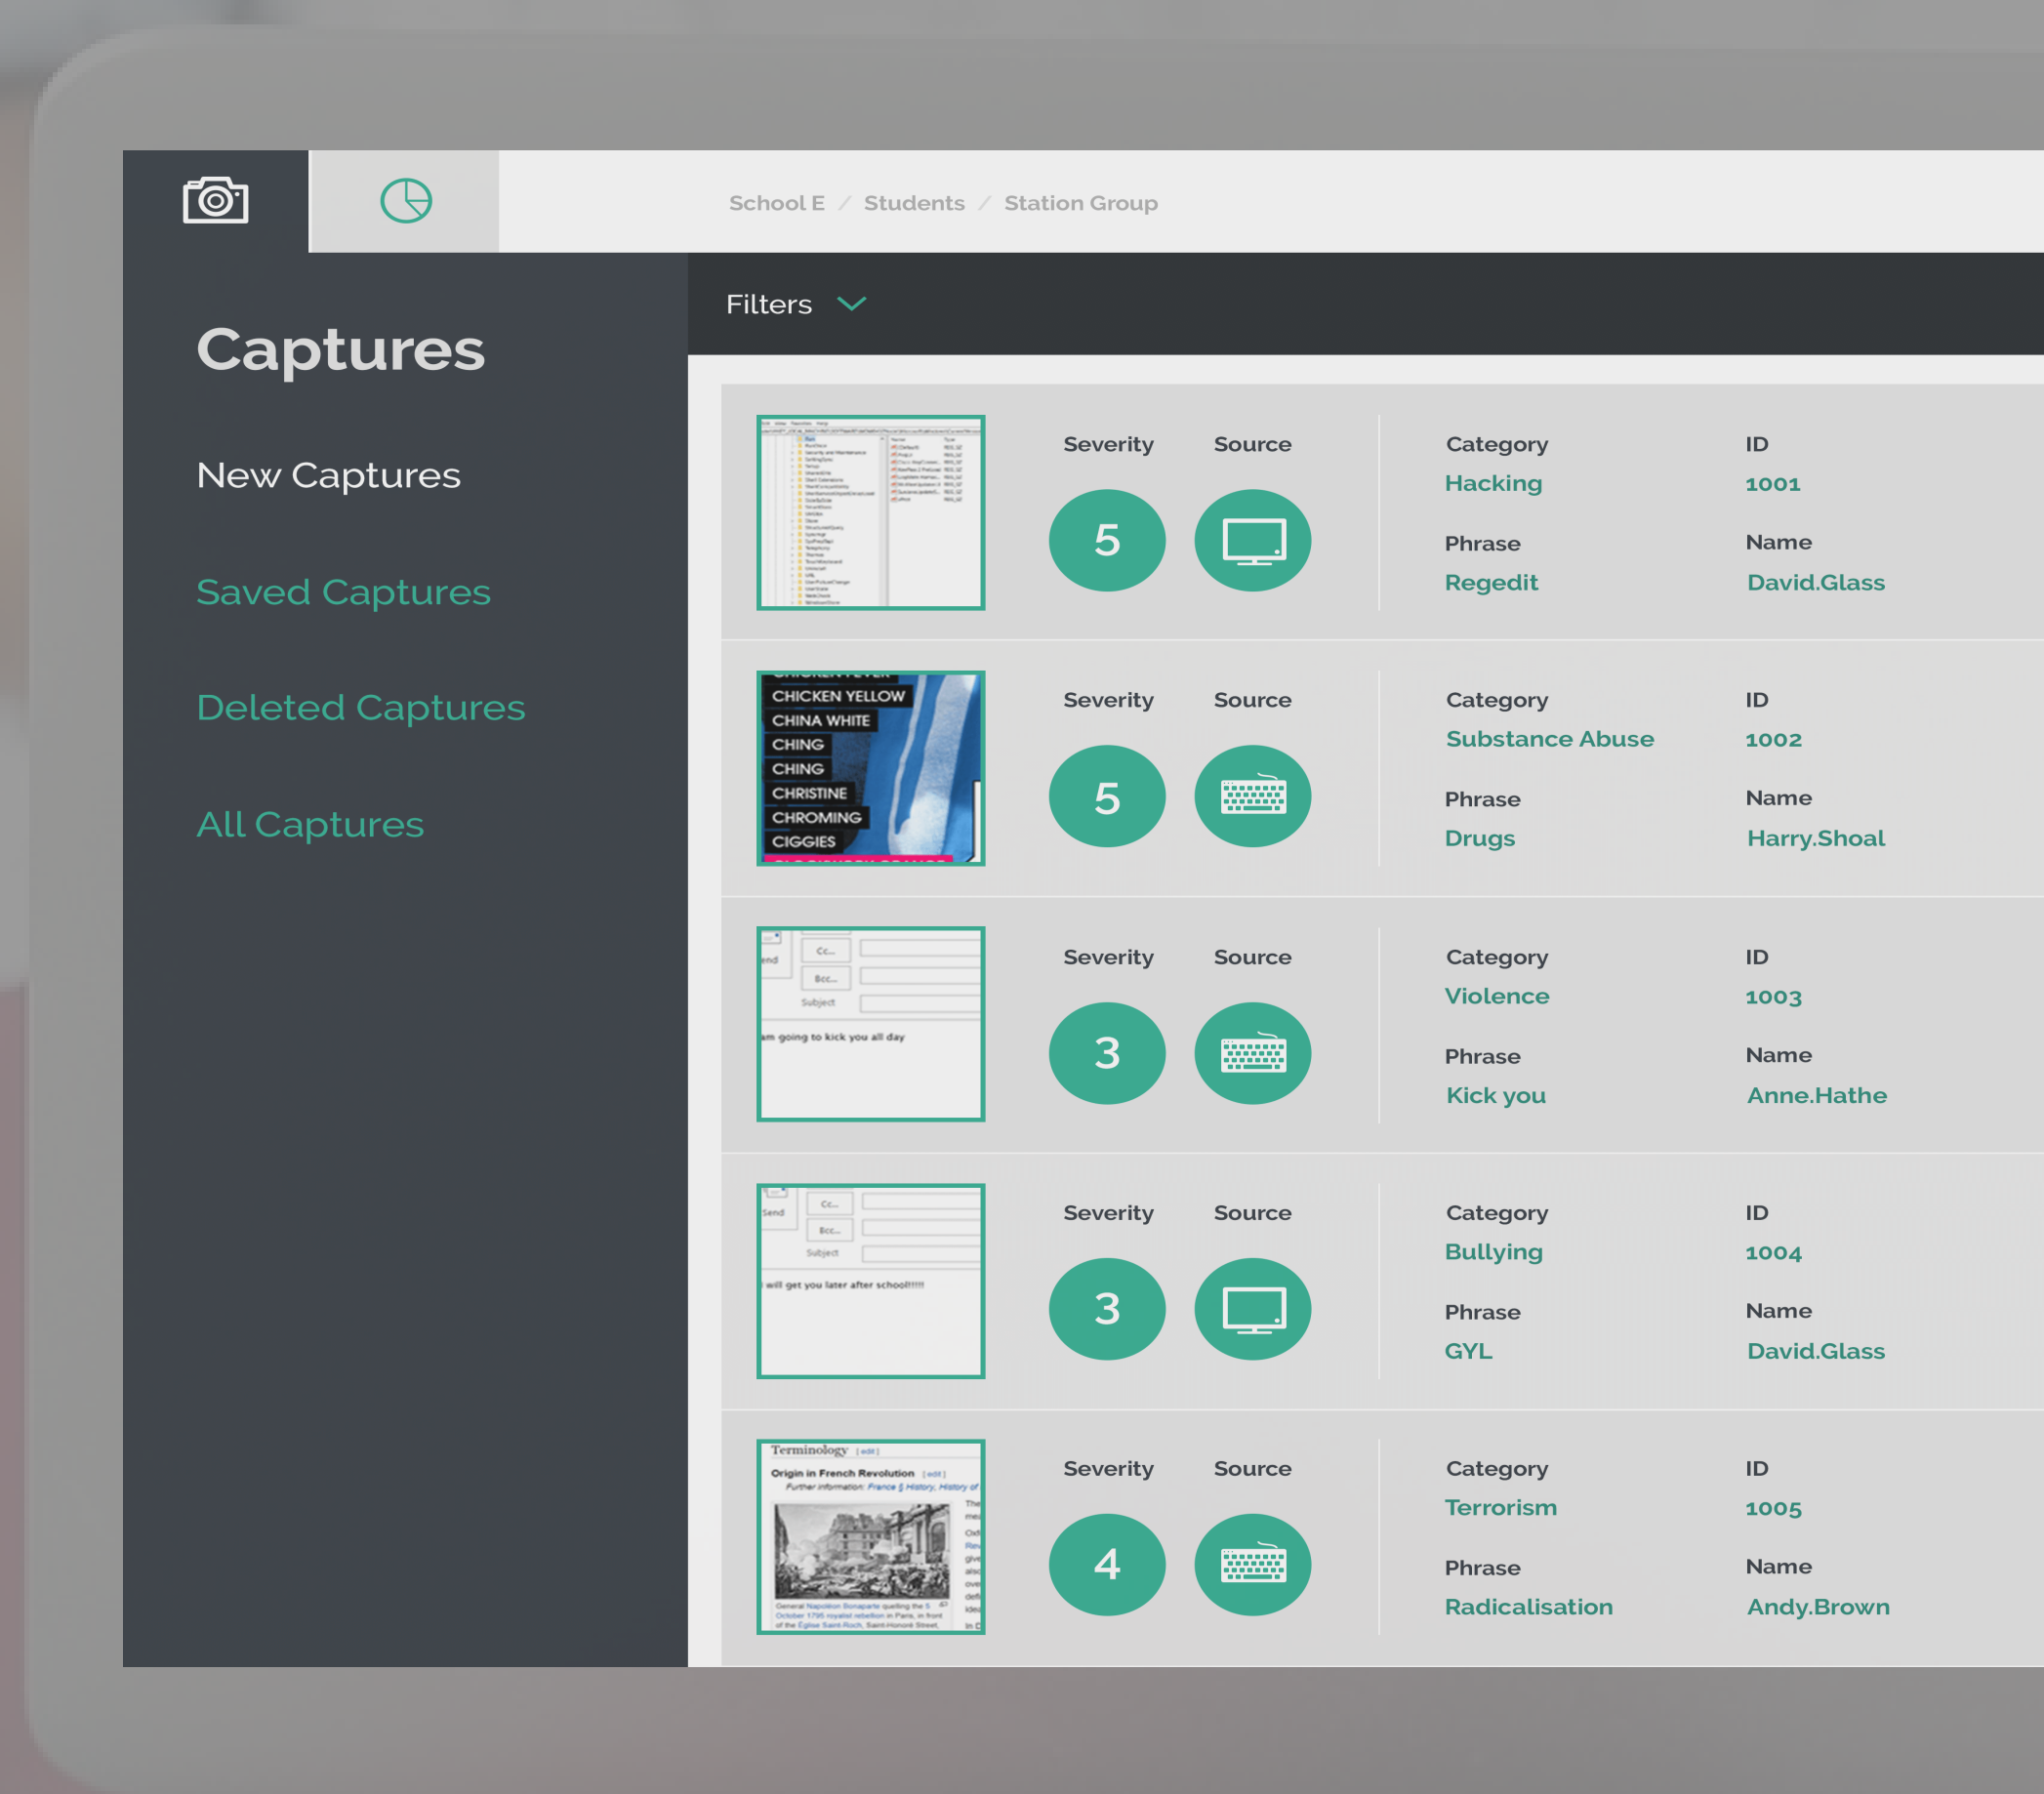

Gaming is an increasing concern with subsequent links to underage gambling. Not only can it become an addiction but can also lead to exploitation.

It is always a good idea for pupils working from home to be in an area where the device is visible to other family members and that age restrictions have been set.

Securus monitors for any risks that could cause potential harm to remote learners.

If you would like advice from our dedicated support team on how Securus works in a remote learning environment please get in touch.

Securus allows remote learners to stay safe, healthy and focused online.

Why not share free online resources that offer interactive activities for pupils, to keep their brains active whilst remote learning
