

# Claro School, Home & Go!

*Claro Software* helps pupils become confident independent learners

## Supporting pupils

Claro software is incredibly easy to use and very powerful.

Claro Software helps young people read for longer with less visual stress and they can listen to text over and over again. Instead of using all their energy decoding single words, students can focus on the content.

This makes it easier to identify key points and structure their work and when it comes to proof reading, there are tools to help with vocabulary, spelling and making sure that their writing reflects their thoughts.

## Exam support

Exam boards take access issues very seriously these days. The commonest adjustment is extra time but, in the academic year 2018/19, some 95.970 candidates had a computer reader.

Text-to-speech helps those candidates who have problems with reading. Perhaps they find it hard to follow lines of text or the print 'jumps' when they read large quantities of text or maybe they cannot concentrate on the printed word for long periods.

**ClaroRead Plus - WINNER - SEND Category**  
Teach Secondary Awards 2019

"Great for student independence during exams and as a normal way of working, offering better value for money than human readers. Good time saver; it takes time to set up but is worth the initial input. Very accessible."

**Natalie Packer**

2019 Teach Secondary Awards Judge, associate consultant for nasen and author of The Perfect SENCO.

## What you get

Claro Schools, Home & Go! is available through annual subscription to UK schools and includes all of the following for one simple annual payment:

ClaroRead for Windows, Mac and Chrome.
