callero

Storage with style.

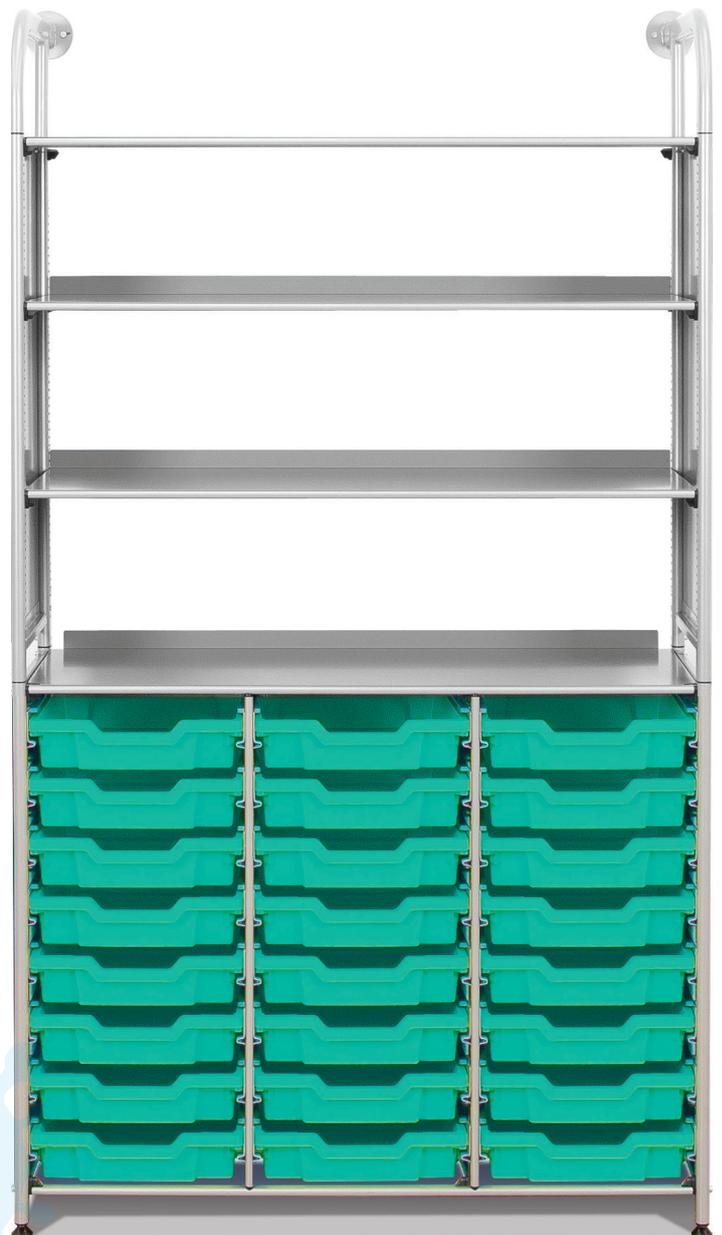

Callero wall units

Callero is a whole range of modular units that can be used together or separately depending on your storage requirements. You can build up and build across to make sure you get the maximum storage for the space you have available. The Callero wall units are now available with an antimicrobial finish to reduce contamination and assist infection control within the learning environment.

Features and benefits

- Callero combination units – static, wall fixed, multi-component unit
- Highly density central resource storage solution
- Ideal when additional space is needed in class and materials need to be efficiently and safely stored
- Trays and contents from the Callero wall units can be transferred directly to a range of Callero carts for deployment around the classroom and to the work area
- Wall brackets offer additional safety feature
- Designed to complement Gratnells Callero carts and MakerSpace furniture.
