WirisQuizzes

by **wiris**

Math quizzes without limits.
Make open questions in math & science.
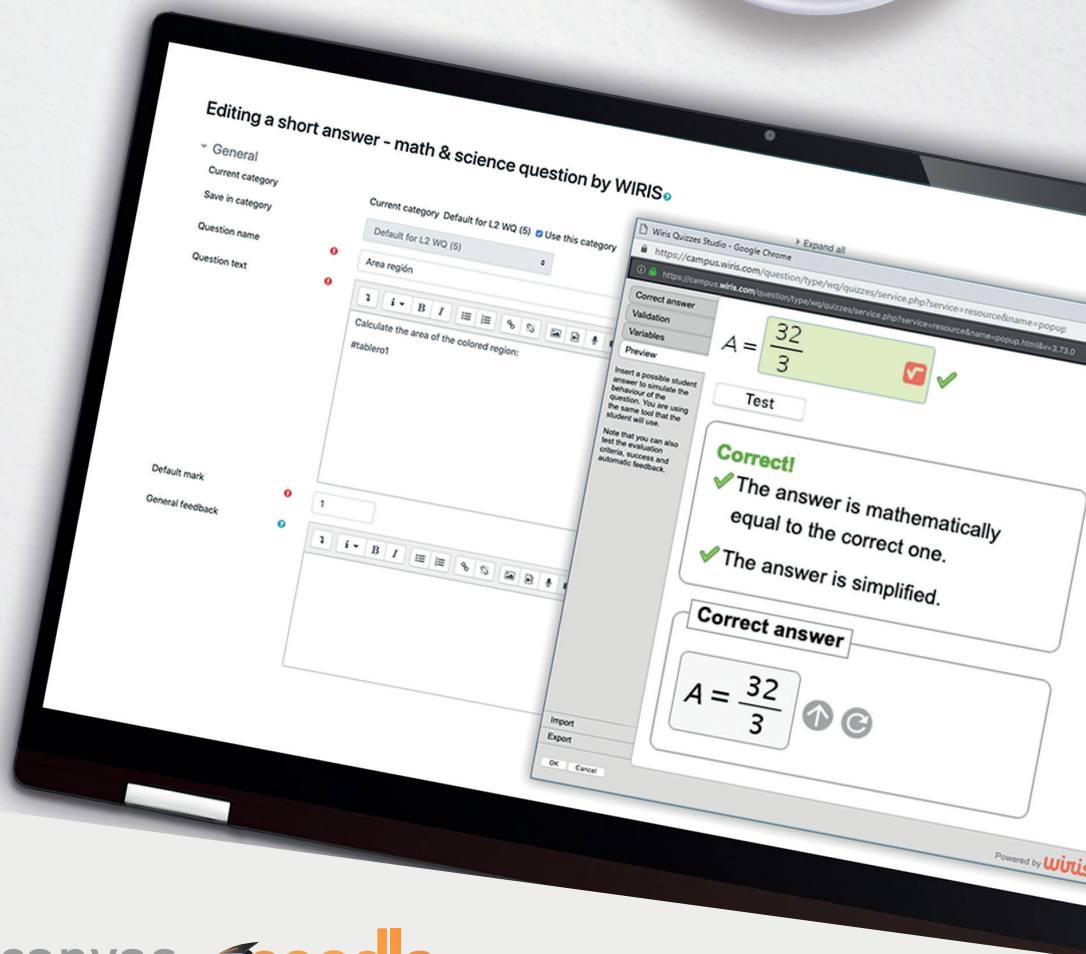

How math and science teachers learned to stop worrying and love their learning platform:

1 The student will be able **handwrite** on any touchscreen device. Including the ability to **show their work.**

2 Teachers will save time grading exams thanks to **automatic assessment**.

3 You can add random parameters in the questions to **prevent cheating(*)** and stimulate practice.

4 Use not only open answers, but also questions with **infinitely many solutions.**

5 **Automatic syntax check** alerts the students if they are going to submit an inconsistent expression.

6 **Specify units of measure** in the answer for questions about physics, chemistry, biology, economics, etc.

7 The students will be able to **create graphical answers**, and the tool will recognize and autoevaluate them.

(*) Although we know your students would never cheat!

Question

Fill the region $\begin{cases} x - y > 0 \\ 2x + y > 0 \\ x < 10 \end{cases}$
