

Securus offers online safeguarding protection that monitors ALL network/Wi-Fi connected devices along with screenshots to provide you with visual evidence of captured activity

Keeping children safe online

We are delighted to introduce you to our suite of online safety monitoring software solutions, to ensure that pupils are at the centre of all safeguarding and wellbeing policies put in place by schools.

Securus products have been specifically developed to make the task of online safety monitoring easier and more accurate than ever before. All our products feature the easy-to-use and highly intuitive cloud console that will help your establishment ensure that potential instances of risk or problematic online activity are identified rapidly so that you can respond, safeguard and educate accordingly.

Securus ensures compliance with the statutory guidance on safeguarding children as laid out by the Department for Education's 'Keeping Children Safe in Education' and the Home Office's 'Prevent Duty'. This is also a key area of focus for the inspections carried out by both Ofsted and the Independent Schools Inspectorate (ISI).

Securus XT

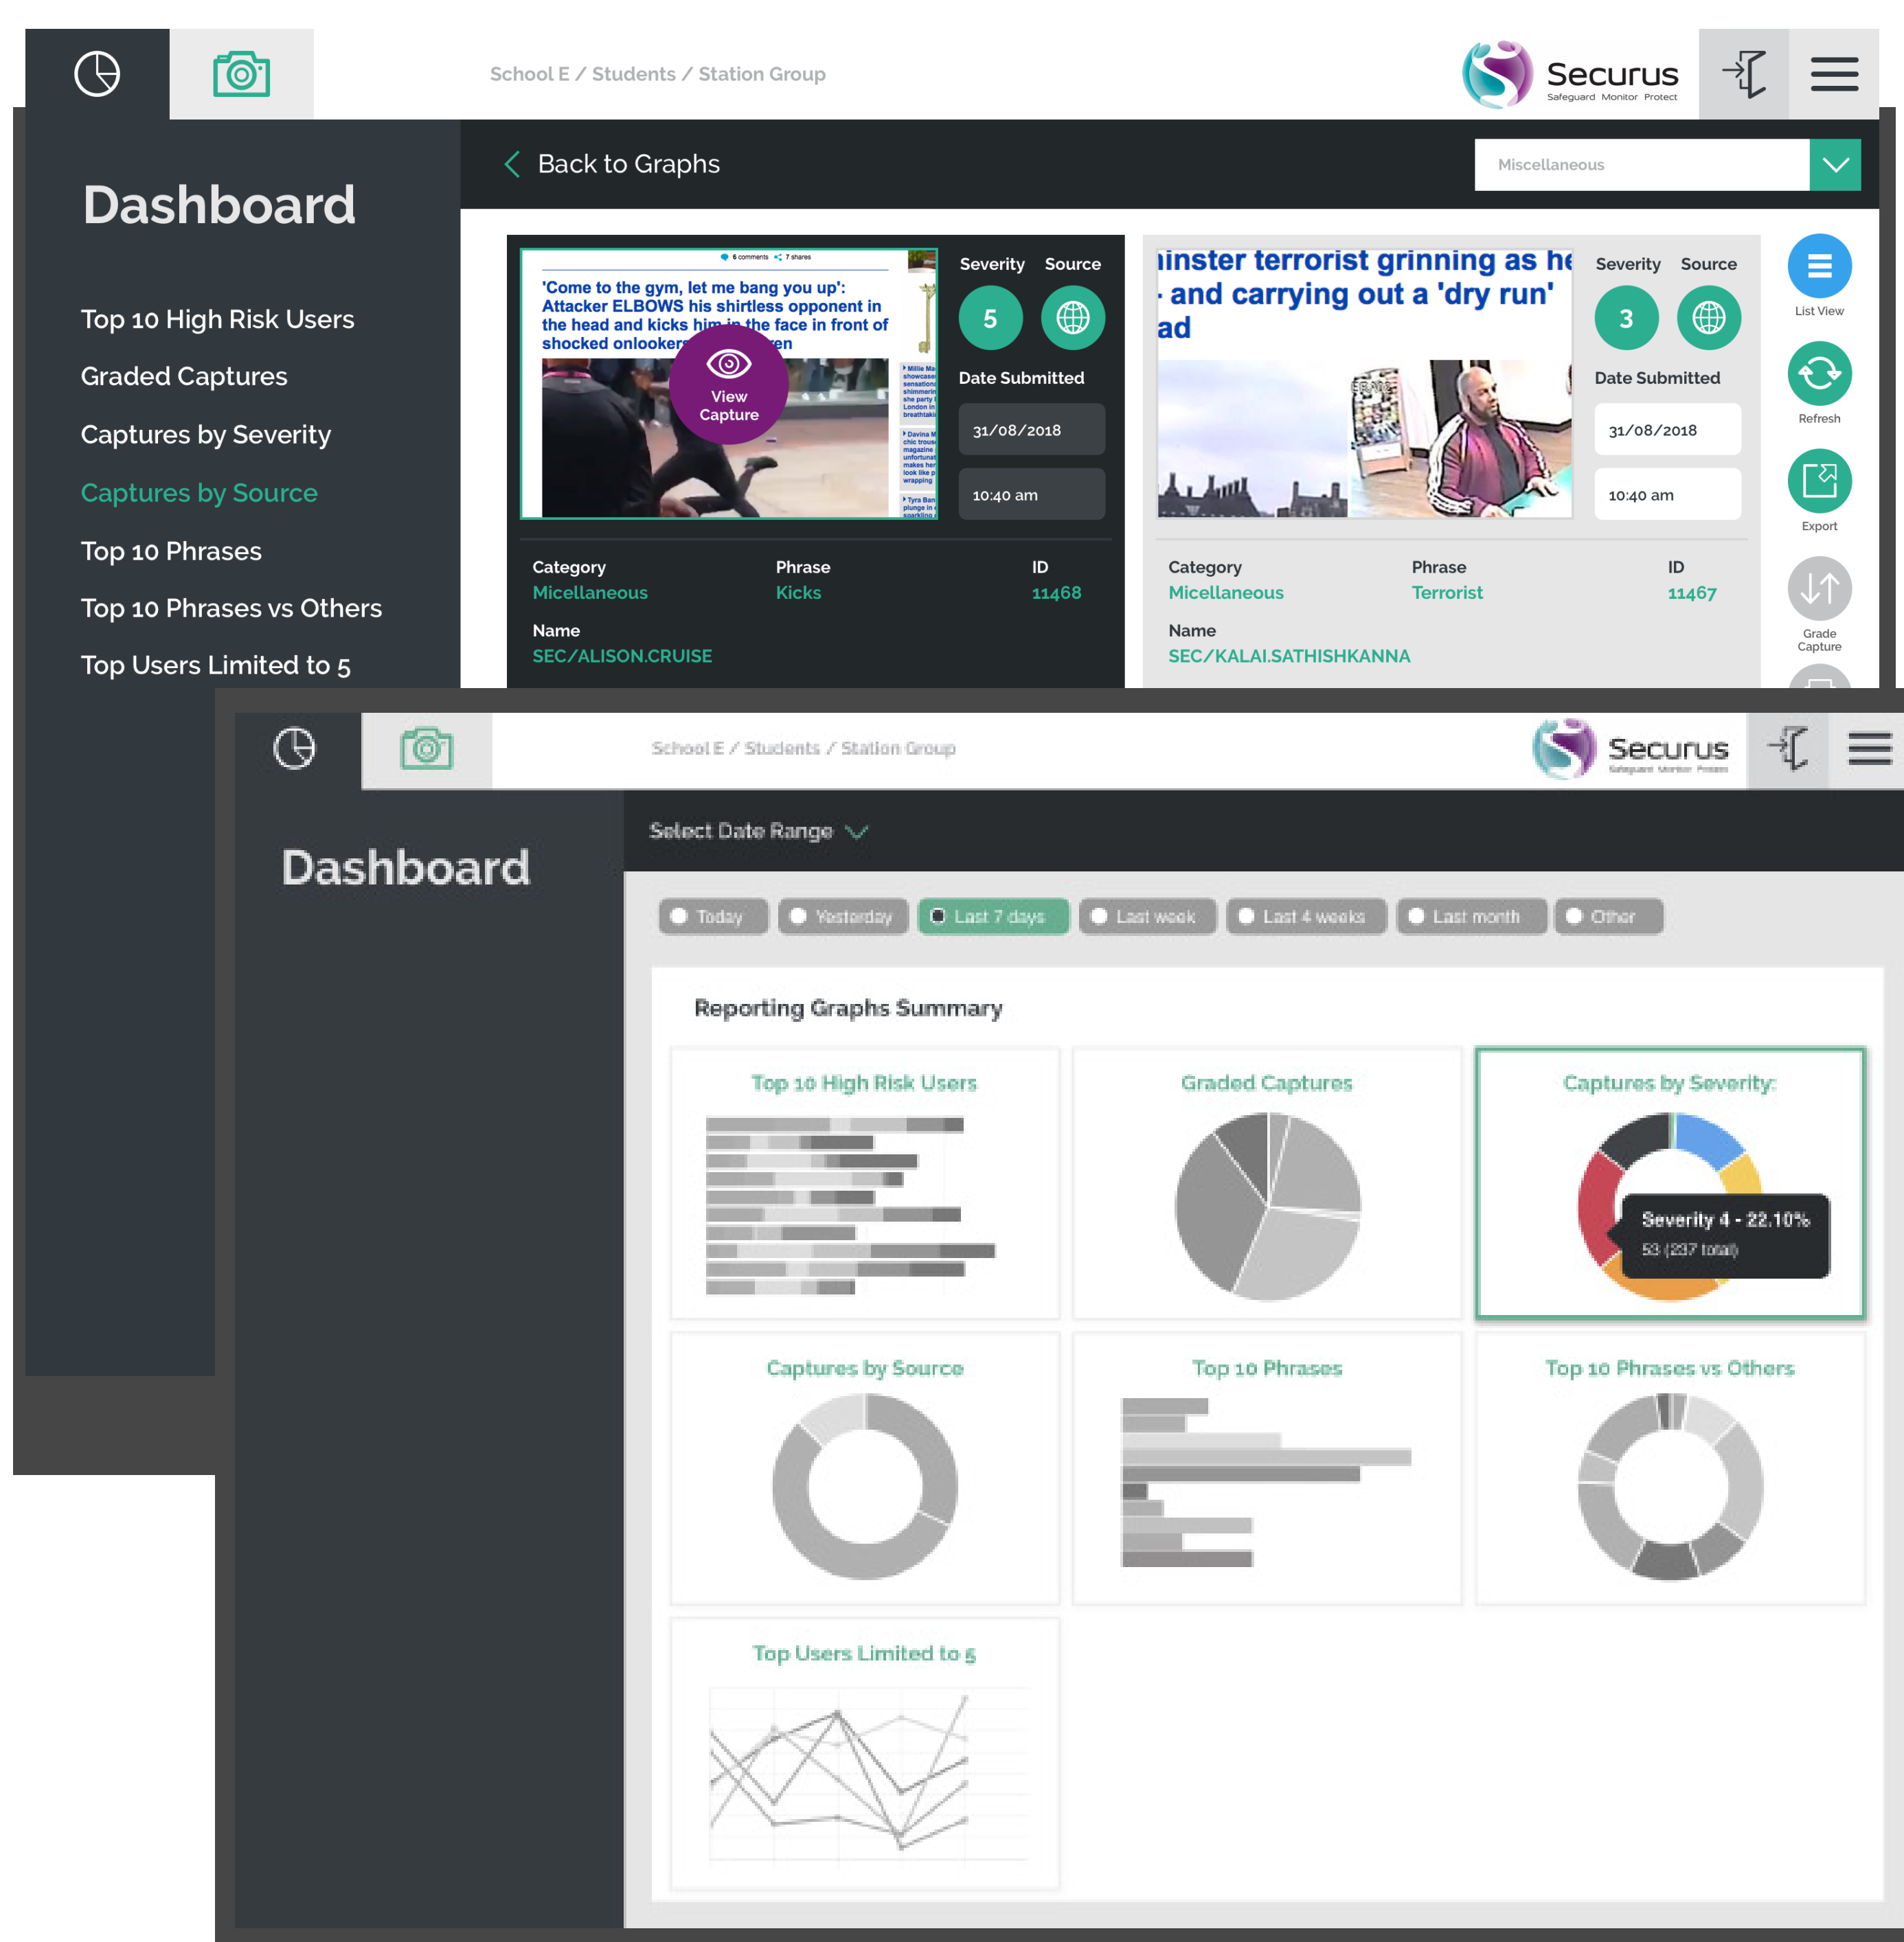

Our agent based solution incorporates the highest level of monitoring functionality;

- For Windows & Chrome PC's, Laptops and Tablets
- Keyboard and application monitoring in real time
- Online and offline monitoring
- Keyword highlighting and confidence checking technology

Securus NET

Our network based solution provides multi-platform safeguarding coverage;

- Covers ALL devices connected by Wi-Fi
- Support for Mac, iPad's & Android devices
- Support for BYOD schemes
- Uniquely generates a visual capture at network level

Combining both Securus XT and Securus NET will provide you with coverage for ALL devices, offering the same high level of user experience. Ideally suited to any mixed device or multi-site environments this combined solution, known as Securus 360, ensures that all activity on your network regardless of device or type of connection is monitored.

Why do schools need to monitor?

- Monitoring is a statutory requirement as part of KCSiE and the Prevent duty.
- Supports you to fulfil your duty of care to protect young people from online risks such as grooming, radicalisation and cyberbullying.
- Alerts you to inadvertent exposure to inappropriate content.
- Identifies potential high-risk behaviour such as self-harm or suicide, enabling early intervention.
- Helps educate young people on the safe use of the Internet.

Securus dovetails seamlessly with modern technology like Google Chromebooks and iPads providing cutting edge monitoring of pupils activity, whilst on the network.. The product simply sells itself, it is literally a no brainer. What I can add is this, Securus also delivers, supports and continues to evolve its incredible innovation. I genuinely cannot ever see us not using this invaluable resource.

Mr Simon Hollingsworth, Business & Innovation Manager
St John's Church School, Peterborough

Securus Full Monitoring Service

FMS provides schools with a full service that ensures your school's network is monitored by a team of safeguarding experts on your behalf. Schools are immediately alerted to any potential safeguarding violations that are captured and also have access to the secure cloud console to view and action these alerts in real time. In addition, our FMS team are on hand to offer support and advice to help you to resolve issues using best practice.
