

COOL

**Your digital classroom.  
Wherever you are.**

# Introducing COOL

Easy IT for the 21st century classroom

COOL is an all-in-one online learning suite that empowers learning, saves teaching time and simplifies your school's IT. It combines the best of G Suite for Education and unique classroom management tools. With our free COOL Platform and premium COOL modules we empower 1,600+ schools around the world.

COOL offers a user-friendly dashboard for all relevant educational apps with just one single login; live monitoring of student devices; simple picture and QR login for younger students; powerful exam app and plagiarism check and so on. COOL truly opens up innovative ways of teaching and learning, both in class and at home.

Make learning  
easy, fun and  
innovative  
with COOL.

# Discover COOL

Empower learning, save teaching time and simplify IT

Students

We empower students by giving them easy and independent access to all their educational apps.

Teachers

We empower teachers by facilitating their daily educational tasks and enhancing classroom control.

IT admins

We empower IT admins by syncing schools' SIS with COOL for easy and secure user management.

# COOL at a glance

# Easy sign on methods

Say goodbye to hard-to-remember passwords.

## COOL Picture login

COOL Picture login allows younger students to log in by themselves. All students need to do is click on the right picture(s) and there they are: logged in and ready to start learning. Instead of a classic username and password combination, pictures serve as login details linked to their Google Account.

## COOL QR login

COOL QR login gives students the additional log in option to simply scan their badge and get started. This also means distance learning just got easier: By combining Picture login with QR login, children can login securely and independently when they're learning from home.

# COOL Monitoring

Manage your classroom. Stay in control.

Monitor the screen of one, several or all students to keep track of their progress in real time. Provide guidance during the learning process instead of afterwards! Need your students' full attention? Lock their browsers for any number of minutes when giving your group direct instruction. Or lock them in COOL Exam app, where students can only access apps and websites selected by their teacher.

Actively involve students in class work by opening or closing websites in their browsers, simply from your own device. Open up new ways of mutual learning, for example by sharing students' screens on your interactive display in front of the class. Let students work independently, without losing control of your classroom.

# COOL Exam app

No cheating, more focus and results

COOL Exam app helps students stay on task. When their device is locked in Exam app, they can only access applications, websites and documents selected by their teacher. This means more focus and less cheating while teachers can easily keep control. Teachers are able to monitor students' screens during exams in real-time with COOL Monitoring.

Switching to Exam app is easy and fast. Within the COOL platform, teachers navigate to the 'Monitoring' tab, select a class or custom group and start monitoring. From there, they switch on 'Exam app'. Within one minute, student devices will be locked within the Exam app environment. Once students have logged in, the teacher can push individual or group content for the assessment.

# COOL Plagiarism check

## No more copy-paste schoolwork

Instantly detect plagiarism in schoolwork submitted through Google Classroom. Plagiarism check looks for text matches both online and in other students' submissions. Give feedback based on the scan results and allow your students to improve the quality of their work.

Activating Plagiarism check is easy. Checking an entire assignment takes just 1 click! Give feedback based on the scan results and allow your students to improve the quality of their work. You can scan the same document up to 3 times to monitor students' revisions.

# COOL Portfolio

Make learning fun for everyone

COOL Portfolio is a digital learning solution that curates an academic portfolio for students while making learning fun. Students can set goals while creating their assignments, and see their progress while reaching their goals. Portfolio focuses not only on the end result, but also on the entire learning process.

COOL Portfolio is designed with students, teachers and parents in mind. It helps students grow their 21st century skills while seeing what they have accomplished along the way. For teachers it is a great assessment tool and for parents COOL Portfolio gives them a glance of their child's progress. It is a great tool for stimulating learning interest and motivation.

# More COOL features

Constantly evolving solutions

## Sync with student info system

Link with the administration system of the school so that your groups are up-to-date. Accounts can be added automatically via COOL Setup Wizard.

## Easy asset management

Manage different types of devices within your school easily. You can also send direct messages to the COOL support team.

## Google Classroom integration

Automatically place teachers and students in the classroom groups they belong to. This is a powerful solution for distance and hybrid learning situations.
