

## KS2 Schools Information

January 2021

# Who we are

Please watch our short video to learn more about who we are.

# Growing inequality in education

Growing inequality in access to private tuition, exacerbated by COVID-19, means many students are left behind.

- Disadvantaged pupils are 18 months of learning behind their peers by the time they finish their GCSEs\*.
- More than half (53%) of those teaching in the poorest schools in England reported their students were “four months or more” behind in their learning after COVID school closures, compared to 15% of teachers in wealthier settings, according to a recent NFER survey.

**Schoolexams.co.uk is part of the solution.**

# What we do

- Provide top quality, bite-sized video tutorials in an online platform with rich, engaging features like personal libraries, targeted revision plans and revision quizzes.
- Offer materials created by some of the UK's top examiners and educators, and professionally produced to an exceptional standard.
- Focus on the 2 most critical subjects for life outcomes: English and Maths, at KS2 and GCSE level.
- Base our tutoring exclusively around past papers for Maths and key assessment objectives for English, encompassing the full English national curriculum.
- Provide access on any device, at any time.
- Facilitate a suite of teacher tools allowing teachers to create classrooms and focus groups and assign targeted homework of tutorial videos and questions.
- **Priced at just £20+VAT per student annually.**

# Our English and Maths videos

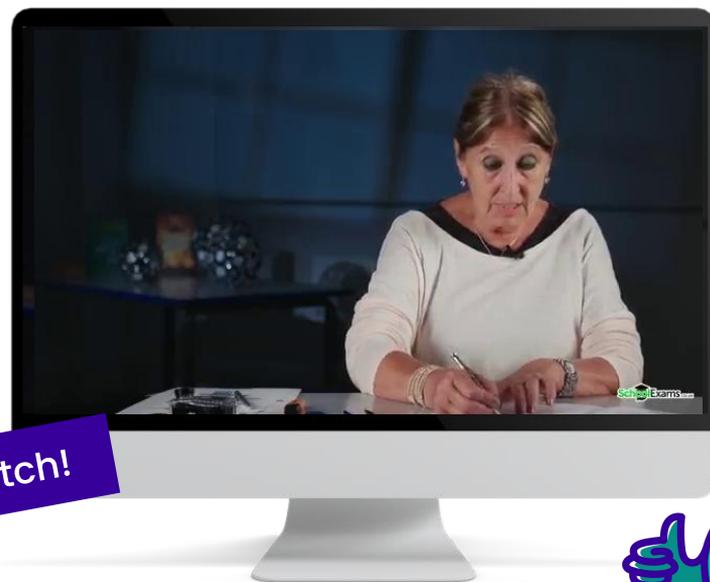

Presented by examiners, teachers and tutors. Not actors.

# How we help students and teachers

In the uncertain world we live in, having top quality resources available to help students learn anywhere, anytime is essential.

- Our video tutorials are bite-sized and designed to be engaging to students and the way they learn today.
- Our content is uniquely focused on past papers (Maths) and exam assessment objectives (English), providing an ideal complement to curriculum learning throughout the year.
- Gaining confidence in exam style questions is enormously valuable to students, particularly this year as they may feel less prepared for their exams.

## Helping teacher workload

- With our ready-to-go, top quality tutorial content our platform can be implemented straight away with minimal set up required.
- Our resource-intensive, methodical tagging of past paper questions ensures teachers have targeted materials specific to individual needs available at their fingertips.
- Our carefully designed weekly revision courses can be used out of the box and set as assignments for students to complement their curriculum learning.

# Impact

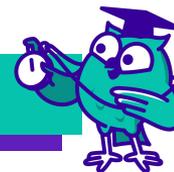

We have recently run KS2 and GCSE Maths trials with our student panels to gather empirical evidence of the impact our platform makes on exam achievement.

## GCSE

- Students selected from within a partner school – all sitting Higher Maths.
- Students set a base level assessment mock exam created from past AQA exam questions.
- Students followed a 6 week revision plan of c.60 minutes weekly revision on the platform.
- Students set a final assessment mock exam, with questions covering the same curriculum content.

21% average increase in marks

## KS2

- Students invited from across partner schools.
- Students set a base level assessment SATs mock exam (Paper 1 and Paper 2).
- Results analysed to identify weak topics and students provided a list of these to focus on.
- Students spent 4 weeks on the platform revising weak topics (a min. of 30 mins weekly).
- Students set a final assessment mock exam (Paper 1 and Paper 2).

21% average increase in marks

# Testimonials

**David Page**

Deputy Head

Jennett's Park CofE Primary School, RG12 8EB, England

Used SchoolExams.co.uk for 10months

Oct 2020

It is just a wonderful product that is: cost effective; simple to use; and will make a difference to children's learning.

**David Page found SchoolExams.co.uk to:**

- **Significantly improve attainment**

“After using product for a term, children improved on average by 4 points on the average point scores in Mathematics. They are more confident in answering reading questions and have a better idea on how to plan and what to include in their writing.”

- **Significantly build student knowledge**

“It gives an excellent way for children to consolidate skills learnt in school and to become more fluent and efficient with new concepts.”

- **Significantly reduce attainment gap**

“We have used the product with pupil premium children and SEN children and it has helped to close the gap. Especially when there is limited support or engagement from home.”

- **Significantly improve teaching efficiency and productivity**

“Study plans are already provided by their team of educational panellists so we has teachers can just press and go if needed.”

- **Significantly reduce teacher workload**

“School exams can be self marking and reports generated that save teachers time. Study guards are already there for the children or you can create your own.”

# Our Commercial Partners

Schoolexams.co.uk has established strong partnerships with a number of UK national brands to help further our mission to ensure top quality tuition is available to all students in the UK.

**TESCO**

 **Nationwide**

In 2020 we established several commercial partnerships, including Tesco (staff), Tesco Clubcard and Nationwide (staff).

Whether through offering staff discounts or customer reward programmes, these companies recognise the value in supporting the children of their customers and staff through these extremely challenging times.

# Recognition

We were thrilled to receive the SME News' UK Enterprise Award for "Best Online Exam Revision Platform 2020."
