

wingsys INTERACTIVE^(R) TECHNOLOGY

Welcome to Wingsys!

When future needs touch technology.

Wingsys - Interactive Technology is a company leader in the production of interactive solutions, with a presence in more than 20 countries. Worldwide, millions of people cross our technology systems daily.

The company's history begins in 1995, with the creation of Famasete - Technology Group, which stood out when creating the first interactive multitouch table in Portugal. The Wingsys brand was created to designate the range of innovative products that have identified Famasete as a manufacturing company. Currently, the brand and company have the same name and the Wingsys team is thus recognized in the sector for the passion for the business it has created and for the development of innovative and quality hardware and software. The company, which was identified for its character of Innovation & Development by ANI and distinguished as "Best Manufacturer of Interactive Solutions in Portugal", presents a diverse range of products: screens and interactive tables, digital billboards, multi-touch kiosks, queue solutions, urban furniture, digital signage and interactive software of excellence for various sectors.

We bring innovation to meet the needs of the world as an essential condition for business growth.

25 years of market experience

We believe that interactive technology can create experiences that have a positive impact on people and organizations in a sustainable way.

Our values

- Innovation
- Humanity

Allows connection to any operator's TV box. 3-year warranty with on-site replacement.

TA007 Range

Quality. Design. Versatility.

Because we are manufacturers, we have the ability to create any interactive product tailored to customer needs. However, our strategy has also been to create a family of excellent products that, with the same design, are adaptable to any area.

Thus the family with the reference TA007 was born. In reality, there are five products with beauty and design that are internationally awarded and with FCC certificate and CE marking. They are interactive tables, digital billboards, multimedia kiosks (indoor or outdoor), tablet or screen kiosks, among others.

The usability of the products is related to the chosen software. As a versatile interactive solution, its products are currently used in a wide range of areas, such as: public administration, banking and insurance, tourism and hospitality, education and teaching, shopping and retail centers, museums and libraries, events and exhibitions, health, as well as many others.

Hygystation

HYGIENE AND TEMPERATURE MEASUREMENT
KIOSK

Wingsys presents a new product from the Contactless range. Hygystation is a practical kiosk with automatic hand sanitizer dispenser, professional display, facial recognition, access control and body temperature measurement that also keeps its users informed about any information, offers and events.

As the current public health situation gradually stabilizes, people will return to work and leisure activities. Hygystation is a new solution that will respond to this emerging need for health control and prevention of the spread of diseases, keeping people more secure and informed in social areas. The mandatory use of masks in these spaces and the need to disinfect hands at the entrance to a closed establishment provide a feeling of security and confidence.

Products

Software

Smart Point

INFORMATION PLATFORM

Multitouch information management platform for Municipalities, which includes:

- Interactive city map with restaurants, hotels, places of interest and events;
- Points of tourist interest;
- Tourist / sport routes;
- Calendar of events;
- Selfie;
- Weather information;
- Space for advertising in image or video format;
- Backoffice resources (kiosk management):
- Users and permissions.

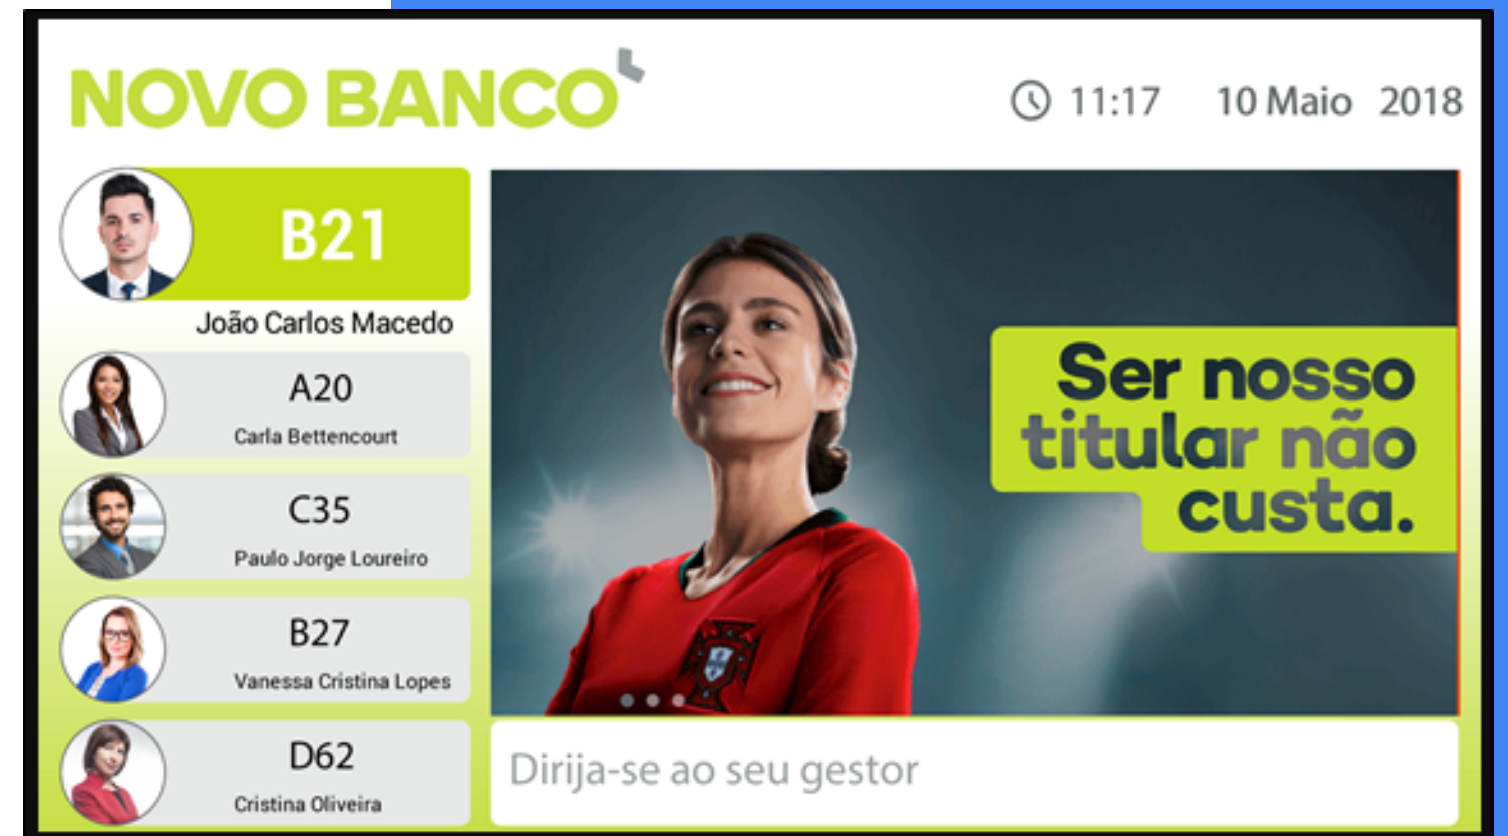

Queue and Digital Signage

MANAGE THE CARE OF THE VARIOUS SERVICES PROVIDED

Queue Lines:

- Service and counter management
- Secure Password
- Definition of priority services, opening and closing hours of services
- Temporary suspension of services
- Choose which counters will serve each service
- Set password tolerance
- QRCode vehicle reading
- Configure call settings
- Possibility of Queue or Single Queue
- Easy-to-manage multimedia content broadcasting system
- Collection of detailed statistics by campaign and paths traveled, creating routes most used by users

Object Recognition

CONNECT THE DIGITAL ENVIRONMENT WITH THE PHYSICAL WORLD!

The Interactive Object Recognition Software allows you, by placing a series of products on the surface of our TA007T interactive table, to view various relevant information with characteristics such as images, catalogs, product sheets, videos, among others.

This is an intelligent and multitouch software, completely adaptable to the client's business typology that allows objects to be recognized as if by magic as soon as they are placed on the display. Patterns, similar to fingerprints, can be recognized, assigned unique IDs and used for different actions within the software.

Education +Interactive

A NEW WAY OF TEACHING AND LEARNING...

Children have short attention spans. This multitouch software solves this problem by making education more fun, engaging and unforgettable. It has a set of interactive multi-touch educational applications designed to help children learn while playing!

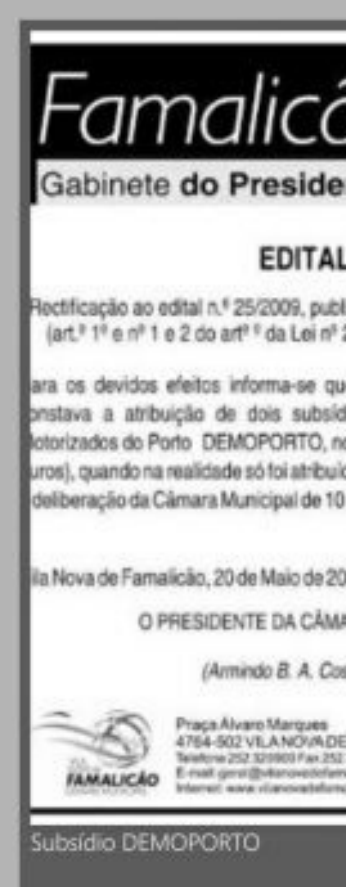

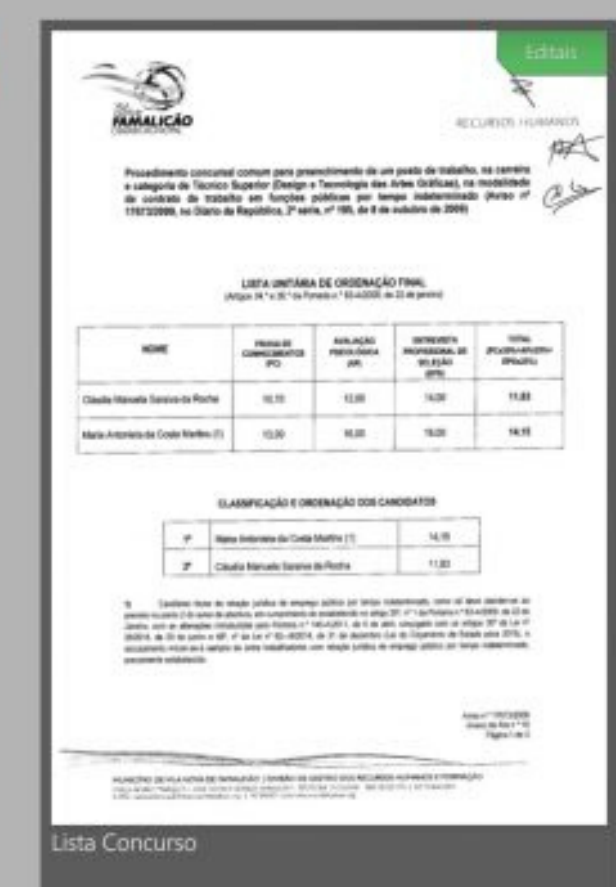

It allows multiple users to play the same or different games at the same time and in a shared way, by dividing them into small screens. Puzzles, animal games, playing with words, planetarium, design, habitat, gravity, geography, human body, math, geometric shapes, among many others.

Business Composer

QUICK AND EASY INFORMATION CONSULTATION IN THE SHOW WINDOW OR INTERACTIVE TABLE

- Consultation of products from any device or smartphone of the user that has WiFi, regardless of whether the monitor is inside or outside the store (storefront)
- Remote or local content management
- Wayfinding
- Fantastic multi-touch user experience in a lobby, mall, store, fair, museum, classroom, hotel, restaurant, among others, on the screen
- Fully customizable application set so you can present your products or services in a totally innovative way
- Viewing photographs, videos, brochures, notices, questionnaires, explanatory games and even websites within a multitouch environment
- Content can be downloaded by users in real time by entering a contact
- Backoffice and frontoffice version

Services

Hiring

Through the Hiring solution, we provide any interactive equipment available for a specified time and upon a fee agreed with the customer. We bet on digital solutions as a facilitating and quick element in the organization of events.

Renting

Renting is a strategic solution, adaptable to any business. The customer can have access to innovation and technology without having to resort to initial expenses, with regular installments, planned payments and without downtime costs.
