classroom.cloud

Easy breezy, low-cost classroom management, teaching and safeguarding platform or schools

Education Alliance Finland

CERTIFIED
PEDAGOGICAL QUALITY

Forget edtech fatigue… we're all about simple yet essential teaching tools to monitor and instruct in classrooms *and* with remote learners.

That's why teachers choose **classroom.cloud.** Its cloud-based teaching tools help deliver engaging and meaningful learning experiences for students in a safe online environment.

classroom.cloud

Key features

Connect to students' devices quickly and easily by a range of methods to get started with teaching and learning straight away.

Broadcast your screen and audio to connected students to help show/talk them through explanations and lesson activities.

Interact with students in real time via chat and messaging tools, answer help requests, gain instant feedback on topic understanding with class surveys, remote control their screen, and more!

Monitor students' screens, see what they're typing and who they're collaborating with - plus, view their web and application use in real time to ensure they're on task.

Gain attention by locking students' screens, blocking webcam use and controlling sound levels from the student's device, for maximum focus while you explain the lesson activity.

Stay focused with 'allowed' and 'restricted' website/application lists and control USB usage to ensure students can only access relevant and appropriate material during class.

Stay safe at all times with the new safeguarding toolkit, helping to keep your online environment protected by monitoring concerning activity, identifying students at risk and spotting safeguarding trends.

Use with your already-established Microsoft SDS, ClassLink or Google Classroom platforms for maximum flexibility and to save time when setting up your technology-led lessons.

Multi-platform support for use with a mix of devices ensures your school is future-proofed and can simply roll with the ever-changing tech landscape.

Technician Tools includes a hardware and software inventory, helping IT teams see at a glance how they can maximise school technology.

Learning continuity is ensured, whether in school or remotely, with one set of clear, consistent tools.

Scalable from the smallest school to the largest Trust!

Low cost, low maintenance and cloud-based - win, win, win!

Keeping your students safe online

The safeguarding toolkit (optional component) helps to keep your online environment protected by monitoring concerning activity, identifying students at risk and spotting trends across multiple languages.

Keyword and phrase monitoring: Powered by over 14,000 phrases in multiple languages, schools can monitor the safeguarding words that students are typing (even in Microsoft Team).

Updating keywords: Add your own keywords to the safeguarding database that are relevant to your school and community – and even share them across your Trust!

Keyword cloud: When a keyword or phrase is triggered, it populates a word cloud. This is a great way to spot trending topics.

Contextual intelligence-based Risk Index: The context of a triggered event is analysed (the device used, time of day, websites visited, applications used, history of alerts) and a risk index number is generated, helping staff to determine its severity. Schools can also link triggered events to their MYCONCERN account.

Student 'Report a concern' (Coming soon): Students can report their concerns by sending a message, screenshots or documents in confidence to a trusted member of staff.

Online resources: Students have instant access to a range of online support resources – covering topics such as FGM, drug addiction, grooming and bullying. Staff can also manage the pre-populated list and add any additional terms they feel are appropriate.

Security: With its easy-to-use access permissions and reports that can be applied or changed as needed, schools can ensure only authorised staff have access to the most sensitive information. Images or screenshots can also be blurred to ensure maximum confidentiality.

classroom .cloud

Our teaching tools make it easy to lead learning, no matter where you are - and they're simple to maintain too!

Easy for teachers

The easiest classroom tool you'll ever use, **classroom.cloud** lets you demonstrate, monitor, control and collaborate with your students to deliver super-engaging, interactive lessons that will keep them immersed and on target for success.

Easy for technicians

Easy to set up, configure, manage and use, **classroom.cloud** virtually takes care of itself! Integrating directly with your existing infrastructure, you can deploy in minutes and manage teacher and student devices centrally – saving you a bunch of time.

Easy for schools and academies

Low cost and scalable, with clear central configuration and management, **classroom.cloud** is ideal for school academies. Once set up, the IT team's involvement is minimal – and, for teachers, using its intuitive interface is a breeze!

classroom.cloud, it's as easy as ABC...
