

# Beedle in Microsoft Teams

**Attendance**

**Journal**

**Parent App**

**Planning**

MS Teams Assignments  
integration

**Beedle**

**Objectives**

Curriculum

**Assessment**

**Class List**

**Calendar**

Beedle can be easily implemented as individual modules or scaled to a complete solution, adding additional educational functionality to your Microsoft Teams.

- **Planning:** Find a dedicated space for plans, evaluations and objectives to build a bank of tried-and tested lesson plans. Integrate, organize and reuse Microsoft Teams Assignments with your planning.
- **Calendar:** Gain an overview of scheduled lessons and share plans with students. Move quickly between the calendar and individual plans including objectives and Microsoft Teams Assignments.
- **Class List:** Get a quick and functional overview of your class pupils. Quickly select students at random or create groups of any number. Class or group lists can be easily downloaded or printed.
- **Attendance:** Record attendance for each student in a Team with the option to add comments, schedule future absences and view attendance history.
- **Journal:** Record notes, comments and feedback against students. Tag comments for reference, share them with teachers or students and easily sort them for download or printing.
- **Assessment:** Record ad-hoc grades or assess against learning objectives, add average and total columns for a better overview.
- **Objectives:** Define success criteria, learning goals and curriculum statements and link these to Beedle Planning, or record learning progress in Beedle Assessment.

- **Parent App:** Share relevant Beedle data and Microsoft Teams Assignment details with Guardians, ensuring parents are informed in a timely manner.

## **Beedle in Microsoft Teams**

Beedle is a tool dedicated to extending the functionality of Microsoft Teams for education. It is built in Microsoft Teams and designed with the same look and feel, making it familiar and easy to use. Beedle brings all aspects of learning and classroom management together without the need for any additional IT systems and is instantly downloadable from the Microsoft Teams Appstore.

## **Who are we?**

We are an Icelandic company with a team of qualified teachers, developers, and technical specialists with 20 years of experience within the education sector, who are passionate about education and technology. With Beedle we offer a solution, built by teachers, for teachers, with active users across more than 85 countries.
