# Introducing Cloudwise

Easy IT solutions for innovative education

## cloudwise

### Did you know that...

600,000 unique students log into our COOL Platform every day? We power over 2,000 schools from 15 countries and COOL schools have rated Cloudwise with a customer satisfaction score of 8.9 out of 10!

**600,000 students**  
**2,000 schools**  
**15 countries**  
**Customer rating 8.9**

### Biggest European Google Partner

Cloudwise is an award-winning Dutch company and Europe's leading Google for Education Partner. We make IT for education fun, easy and innovative with cloud-based solutions specifically designed to support teachers in their daily tasks and challenges.

*"Our mission? To advance education with the best that technology has to offer."* — GertJan van Popering, Co-Founder

# Introducing COOL

## Your virtual teaching assistant

COOL is the virtual teaching assistant that supports you every day, every step of the way. Whether you're planning your lessons, starting class, distributing materials, monitoring progress and behaviour, testing knowledge or doing paperwork: COOL lends a helping hand. All while saving you precious teaching time!

**Teachers make learning happen. COOL takes care of the IT part.**

COOL offers a user-friendly dashboard that gives access to all educational apps with just 1 login; live monitoring of student devices; easy picture and QR login for younger students; COOL Check for 100% fair digital tests and exams and much more. COOL enables empowering education – wherever learning happens.

# Discover COOL

Empower learning, save teaching time and simplify IT

**Students**

We empower students by giving them easy and independent access to all their educational apps.

**Teachers**

We empower teachers by facilitating their daily educational tasks and enhancing classroom control.

**IT admins**

We empower IT admins by automating the IT infrastructure and delegating simple tasks to teachers.

# COOL at a glance

Your virtual teaching assistant

COOL doesn't just save you time. It integrates the best of edtech to help teachers do what they love: teaching, inspiring, and providing those crucial stepping stones for later on in life.

# COOL solutions

# Easy login methods

Say goodbye to hard-to-remember passwords

## COOL Picture login

Wasting time helping students to log in can be a pain. That's why COOL Picture login allows younger students to log in by themselves. Replacing a classic username and password combination, pictures serve as login details linked to their Google Account. All students have to do is click on the right picture(s) and there they are: logged in and ready to start learning.

## COOL QR login

COOL QR login allows students to simply scan their unique QR badge to sign in. The combined solution of COOL Picture login and COOL QR login provides extra security while keeping it simple. Should a password get lost, there's no need to call in your IT admin. With COOL, teachers can reset student passwords or create and print new QR codes in seconds!

# COOL Monitoring

Manage your classroom. Stay in control.

Everyone is logged in and working on the task you gave them. Or are they? Actively monitoring your students' interaction with learning content is now much easier. To check on their real-time progress or get them back on track, simply activate COOL Monitoring to see what's happening on each screen. Focus on students who need your attention the most, manage behaviour and give feedback in a non-distracting way: simply send a student a quick motivational message.

While sharing instructional materials on the interactive whiteboard is easy enough, getting students to open the correct URL during class can be a hassle. COOL Monitoring assists you with a simple trick: you can easily open or close websites for the entire group or individual students from your own device. In addition, a built-in blocking and filtering function protects kids from seeing what they shouldn't. Let students work independently, without losing control of your classroom.

# COOL Check

Set up 100% fair exams within 10 seconds

Setting up a digital test or exam in a secure online environment may sound like a task for the IT department. Not with COOL Check! Conducting both low-stakes tests and high-stakes exams with COOL is easy, secure and fast. Even for teachers who feel unsure about tech. Simply choose the date, time and duration, add the test and share it with your class: Check!

Hello exam focus. Goodbye chatting, googling and screenshots! Specify in advance which additional resources students can use (such as a calculator), enable or disable spell check and add up to 3 proctors. Students cannot access other apps or open new tabs in COOL Check. This ensures pure results, keeps everyone focused and puts the control back in your hands.

# More COOL features

Constantly evolving solutions

## Sync COOL with your SIS

Connect COOL with your student information system during setup. Accounts and groups are automatically added and kept up to date.

## Easy asset management

Manage different types of devices within your school with ease. Need help? Simply send a direct message to the COOL support team.

## Google Classroom integration

COOL auto-syncs with Google Workspace. Teachers and students are already assigned to their own Classrooms the first time they log in.

## Microsoft 365 integration

COOL fully supports Microsoft 365 for Education. Access Teams, Office apps and assignments with just 1 login, while keeping data secure.
