

evidenceme

simple

Your learning stories platform

Evidence Me puts the child at the centre of the learning process. The app and website enables teachers to capture learners' experiences, monitor their development and create reports to show their progress. Our assessment and observation tool has helped over 15,000 educators wave goodbye to Post-It Notes, ring binders and scrapbooks to track learning.

Evidence Me has been designed in collaboration with teachers to make sure it has everything that a teacher needs to make tracking and reporting on learning as simple, yet as impacting as possible. We know teachers want a tool to reduce workload and engage with parents and carers in a meaningful way. Evidence Me is quick and easy to use and with our dedicated parent app, parents can see the observations and notes instantly!

Key features

- Supports a wide range of frameworks including: Full National Curriculum, Birth to 5 Matters, Development Matters, plus custom frameworks too.
- Take a photo and easily blur faces, perfect for sharing images of individual learners with parents, and provides greater security for other children in the photo.
- Dedicated parent app that can be used two ways between parents and teachers to share information in real time.
- Multiple report types to improve tracking and evidencing, including Teach Next Report, Coverage Flightpath Report and Individual Coverage Reports.
- Share observations on multiple devices within your school setting.
- Fully redesigned app and website to improve usability, accuracy and speed.

It's instant. It refreshes myself and my teaching assistant throughout the day of assessment points. I find it very easy to use. One of the top teacher features for me is the identification of key words that link to the assessment areas of learning. I have recommended Evidence Me by 2Simple to so many people.
