A Cost-Effective Internet Service Without Capital Costs

Schools Broadband is a specialist Internet Service Provider to schools and MATs of all sizes. We deliver a fast and secure connectivity service, together with cloud-hosted web filtering and network security from two of the world's foremost organisations in the industry, Netsweeper and Fortinet; all at a price that's right for you.

What's more, because all of our services are hosted, there is no expensive equipment to buy, store or maintain. It also means you will always be up to date with the latest filtering & security technology and regulatory requirements.

Faster Internet Connections

World Leading Network Security

Filtering for Prevent Duty Compliance

Virtual Wide Area Networks

Backup and Recovery

VoIP Phone Services for Schools

A Service Tailored To Your Requirements That's Easy To Use

Our unique hosted service can be tailored to your exact requirements, helping you to manage your budgets and allow you as much or as little day to day involvement as you wish.

You can have full visibility and direct control when it comes to managing your filters and firewall, or we can manage this for you, leaving you to get on with running your school. We also include a 24/7 365 network monitoring service as standard.

The Right Internet Connection At The Right Price

We are firm believers in only ever paying for what you need. So if your connection is fast enough already, we would advise you stay with the same speed. We do however work with a range of carriers, and because we are carrier agnostic, will always provide you with the best connectivity price possible, which could be an improvement on the price you pay now.

We are also providers of new ultrafast broadband which can provide up to 1000Mbps at a far lower price than leased line prices. In some cases, ultrafast broadband can replace leased lines, saving schools thousands in the process.

Ultrafast broadband can be fast enough to replace leased lines saving you thousands

Security Services For Protection, Backup and Recovery

4 x ISPA Award
WINNER
Security & Cloud Services

Providing robust and effective unified threat management is one of our highest priorities. It's what we are known for; it's what we excel in and it's why we have received the ISPA Best Security Award four times in the last five years.

We provide advanced Anti-DDoS Protection as standard, and as a result none of our schools have suffered an outage since 2019 due to a DDoS attack.

A Filtering Service To Maintain Your Safeguarding Compliance

Our hosted web filtering platform from Netsweeper provides the world's most accurate and comprehensive filtering classification system, actively protecting users from harmful online written and visual content.

As well as providing you with full customisable control and DfE online safeguarding compliance, our unique service provides real-time, predefined proactive alerts on suspicious searches, ensuring full protection for vulnerable students.

Easy to use predefined reports and alerts to protect your most vulnerable students

An Improved VoIP Phone Service To Reduce Your Costs

BT has started the withdrawal of traditional ISDN phone lines meaning schools will have to switch to an IP based phone service soon.

The good news is, our VoIP and SIP phone services are saving schools thousands on their phone bills, providing free UK landline and mobile calls.

If you would like more information, or a comparative quote for any of our services, please contact us.
