Partner with the specialist education ISP

For Schools and MATs of all sizes

Revolutionising cloud based communications technology

The world's best web filtering and security services

Schools Broadband provides complete internet connectivity packages for schools and MATs of all sizes.

We combine unique leading edge, cloud-hosted technology with two of the world's foremost Web Filtering and Security companies, Fortinet and Netsweeper, enabling your customers affordable access to one of the best Web Filtering and Security services available.

A privately owned company, and part of the Talk Straight Group, we are members of the Internet Watch Foundation and have been delivering cutting edge communications technology to thousands of public and private sector organisations since 2007.

"We have a great working relationship with Schools Broadband, great service, great value for money and our schools particularly like the Prevent Duty features of the web filtering package"

Packages to suit every budget

Access to dedicated technical support

Full and on-going training

Award-winning marketing collateral

Partner Package Options

Introducer/Referral Partner

Sales Partner

Support Partner

A proven alternative to local authority, and other broadband providers

Keep ahead of the curve

As leaders in our field, our innovative technology keeps our partners well ahead of the curve. Our hosted service provides a robust and secure network dedicated entirely to education, where all internet traffic passes through industry-leading filtering and the world's best security. Direct links into Google's UK network gives a superior browsing experience, returning faster than average search results.

We have direct partnerships with the principal wholesale providers: BT, Virgin and Talk Talk, together with smaller providers, allowing the best possible connection types, speeds and quality, at the best possible price.

Competitive commissions, support and advice

We have a competitive commissions programme that gives you a share of revenue generated from each contract. Together we will develop a go-to-market plan appropriate for your target market, and our Education Account Managers will work with you to realise this through sales and marketing support.

A network dedicated entirely to education

Our established and experienced UK based teams provide our partners with a range of support services, ensuring professionalism at all times.

Regionally based Education Account Managers

UK based Technical Support Desk

Product training and support

Fully experienced Prince 2 qualified Service Delivery team

UK based Network Operations Centre staffed by fully qualified and Fortinet certified engineers

A great partnership

Through our national network of carefully vetted and selected partners, together we advise schools of the most appropriate technical solution for them.

Many of our partners provide schools with the local support necessary for the installation and migration process on behalf of their schools.

Our partners' knowledge of their schools means they are ideally placed to provide technical support and advice.

Most of our services can be billed via our partners, ensuring they retain complete control over the relationship with their schools.
