Bringing Schools and Local Communities Closer

It takes a village to raise a child and a community to raise a school

LetsLocalise is a **FREE** digital platform designed to create and foster long-term partnerships between **schools and local communities**. When families, community groups, businesses and schools work together to support learning, pupils can achieve more in school, develop more rounded, mature personalities and enjoy better health.

## LetsLocalise aims to:

- Connect communities and corporates with schools to create rich **Personal Development Programmes** for students.
- Promote **community engagement** to mobilise untapped local resources for schools.
- **Collaborate** with experts to motivate, mentor and inspire students.
- Provide alternate channels of financial support at **zero cost** for schools to upgrade their facilities.

LetsLocalise enables individuals, charities and businesses to support school projects in multiple ways.
