

zoom events

An all-in-one platform to manage, host, and report on all of your virtual events.

Virtual events powered by Zoom's reliable, scalable, and secure platform

Build your own event hubs

Use our step-by-step editor to create your own branded event hubs. Easily manage events and share your customized URLs. Create both public and private hubs and have a dedicated space for your organization's event discovery.

Manage ticketing and registration with ease

Host different types of virtual events with customizable registration and ticketing options. Set the number of free and paid tickets available per event. Support group purchases, gifting tickets, and fundraising for nonprofits.

Host a variety of events

Set up public or private events that are free or paid. Schedule your events to be single-session, multi-session, or drop-ins and post recordings after the event.

Built on the Zoom platform

Zoom Events is an all-in-one solution for virtual events, built on Zoom's reliable video technology, that allows you to seamlessly create and manage virtual events of any size.

Foster connections with new people

Give your attendees a place to network with the ability to easily exchange contact info, chat, and initiate meetings with other attendees in the event lobby.

Decide with data

Track event registration, attendance, ticket sales, revenue, and more. Zoom Events has analytics to help you understand your event performance and improve your virtual events.

“Live video helps recreate the human connection of in-person events. Why are so many live events hosted over Zoom in particular? Arguably, it is in large part due to its reputation for reliability and industry leading ease of use. Choosing Zoom for virtual events eliminates those concerns for countless event planners.”

David Maldow, Principal of *Let's Do Video*
