

Play and create with code.

im:agiLabs is a Stockholm-based startup equipping and empowering all kids, especially girls, to get interested in tech. We support schools and educational organizations by making text-based programming fun and easy to learn with our innovative Python curriculum and tools.

The **im:agiCharm** is a programmable accessory that brings Python code to life with 64 colorful LEDs!

Download our free app to learn how to code in minutes!

Educator's platform coming in spring 2022.
