

**at Texthelp, our mission
is simple – we want to
help unlock everyone’s
full potential through
innovative technology**

we believe that education technology can
be an effective tool to:

- ✓ reach all learners
- ✓ level the playing field
- ✓ save teacher time

reaching all learners

We provide support technologies designed with every learner in mind, with features that help drive progression for all learners across the globe at all levels and across all subject areas.

levelling the playing field

Our support software offers essential tools for students with additional learning needs, English language learners, or pupils in a low attainment group, to help them to achieve their full potential.

saving teacher time inside and outside the classroom

Our software equips educators with tools to deliver teaching that's more rewarding, engaging and meaningful for all.

teaching**

increase engagement

autonomous learners

**supporting
assessment**

our solutions empower educators and learners across the whole curriculum

An easy-to-use literacy support toolbar helping over 30 million users to read and write with confidence.

Bringing the benefits of edtech to STEM, EquatIO makes maths digital, accessible and rewarding for all learners.

A reading assessment tool helping educators to make time for reading, to boost student fluency.

A writing assessment tool which provides personalised and automated feedback, that's fair and consistent.
