

Digital
Learning
Platform

4 tools in 1...

Data base
Explore thousands of educational resources (courses, modules, images, videos, 3D objects...).

Content creation
Create interactive modules and courses including information, assessment and survey items.

Activity sharing
Share the modules and courses with your students anywhere, anytime.

Activity tracking
Monitor their progress and results in real time.

Multiple uses from primary to high school

- ✓ Flipped classroom
- ✓ Customization of learning paths
- ✓ Downloading of modules and results
- ✓ Gamification
- ✓ Positioning tests
- ✓ End of Cycle assessment

Tactileo is the pedagogical platform for primary and secondary education, designed by and for teachers. This intuitive solution allows you to create interactive and entertaining multimedia content, and instantly distribute it on any device (smartphone, tablet, computer...), in class or remotely, in connected or offline mode, while enjoying student and teacher storage space.

The Tactileo experience saves you time, motivates, facilitates interaction and allows you to learn anywhere, anytime with innovative tools.

Intuitive & instantaneous

Create your content easily and distribute it in a flash to your learners (classic sharing, email, QR code, social networks...).

Optimized search engine

Search your modules and courses by disciplines, levels, skills, and refine your queries with keywords.

Multi-device support

Enjoy content on all devices : computers, tablets, smartphones.

Full Web : Cloud and SaaS

Enjoy express deployment and use free of technical constraints.

Data security

Enjoy data protection with secure hosting on Microsoft Azure high performance servers.

A wealth of resources

Enjoy thousands of resources in a few clicks (courses, modules, images, videos, 3D objects...).

Reporting & Statistics

Easily and visually analyze your students' performance and individualize your learning paths.

Evolutive

Benefit from the R&D skills of a team dedicated to innovation and continuous improvement of the platform.

Multiple uses

Learn anywhere, anytime, locally or remotely, in class, on the move or from your home.

Collaborative

Free up knowledge sharing and mobilize collective intelligence.

Storage space

Data storage space to store and share files between students and teachers.

Offline mode

Access training also without an internet connection.

Participative

Stimulate your student's creativity, encourage interactions and commitment from everyone.
