New Classroom – Teamworking Zone

Dynamic Classroom

Education and New Technologies is a company operating in the field of education. Emphasis is on the development of software solutions and educational content in modern pedagogical practice. The products ensure teachers' work in a technology-rich environment, application of competence and STEM approach, team skills formation in students.

The Dynamic Classroom platform gives a comprehensive solution to the modern teacher, provides access to digital interactive content, the ability to develop own digital resources, a library of ready-made team tasks and resources for them, communication module for sharing tasks between teacher and students with feedback for verification and control.

Dynamic Classroom is designed to work in primary school. It works in English and Bulgarian, allowing localization in different languages. The educational content emphasizes the formation of meta-knowledge, development of logical, algorithmic, and critical thinking.

Functionalities

Ready-to-use learning content for primary school, divided into classes.

Methodical guidelines for working with the learning content – a book for the teacher.

Admin panel through which the teacher can create interactive tasks.

Opportunity to create a virtual classroom to which students gain access.
