Netsweeper OnGuard™

Take pupil protection beyond the URL and quickly identify when a student is at risk.

OnGuard™ Features:

- Multi-language support (over 50 languages)

- Multi-device client support - Windows, Mac, iOS, Android, Chrome

- Complete network and client ecosystem

- GDPR Compliant

- Complies with KCSiE, Prevent duty and Ofsted requirements

- Customisable user interface to access critical reports and metrics with granular, drill-down capacity

OnGuard is Netsweeper's student monitoring solution that takes student protection beyond the URL, scanning desktop content both online and offline. This means educators have deep insights into online activity, and can quickly identify when a student is at risk. Fully integrated into the core Netsweeper platform, OnGuard technology works both online and offline, scanning Internet content, desktop content and user-submitted data in real-time to inform digital safety leaders.

Granular Reporting means an easy to use visual interface that allows for quick configuration and reporting.

Optical Character Recognition provides insight into activity offline. Using the Netsweeper client agent, OnGuard uses OCR technology to analyse content on screen and capture images of the screen for further review.

Screen captures and other user submitted data can be placed in **Timeline View** to better understand the context of the information to make informed decisions.

Netsweeper OnGuard™ Features:

Proven platform – leverages catergorisation, policy management and analytics technology of proven Netsweeper platform.

Intuitive dashboards – delivers a concise visual dashboard for quick analysis of your school's online activity.

Real-time monitoring – all on-screen content is monitored with priority alerts that allow for prompt action to be taken.

Offline monitoring – OnGuard scans offline applications and provides visibility into previously unavailable content such as documents and games.

Activity screenshots – allows for valuable context in the review process when an incident occurs.

Customisable alerts – create custom reports and email alerts for rapid review with the exact type of granularity required for your school.

ABOUT NETSWEEPER
Founded in 1999, Netsweeper is a leading provider of application and Internet content classification and filtering solutions for educational institutions, government organisations, businesses, service providers, carriers, and OEM partners around the world. Netsweeper's AI-based content categorisation platform is the industry's most accurate and comprehensive solution for the classification of online content with over 90 categories, 50 languages, and real-time global distribution updates.
