Discover Educational Robotics for All Ages

This overview was designed as a brief way to show all current offerings from VEX. With this catalogue, our goal is to lead you through a quick, and easy-to-understand experience. A great place to find more starter information is on the VEX Support Page at [GetStarted.vex.com](https://vex.com/GetStarted)

VEX V5 Workcell	21

Welcome to the VEX Continuum

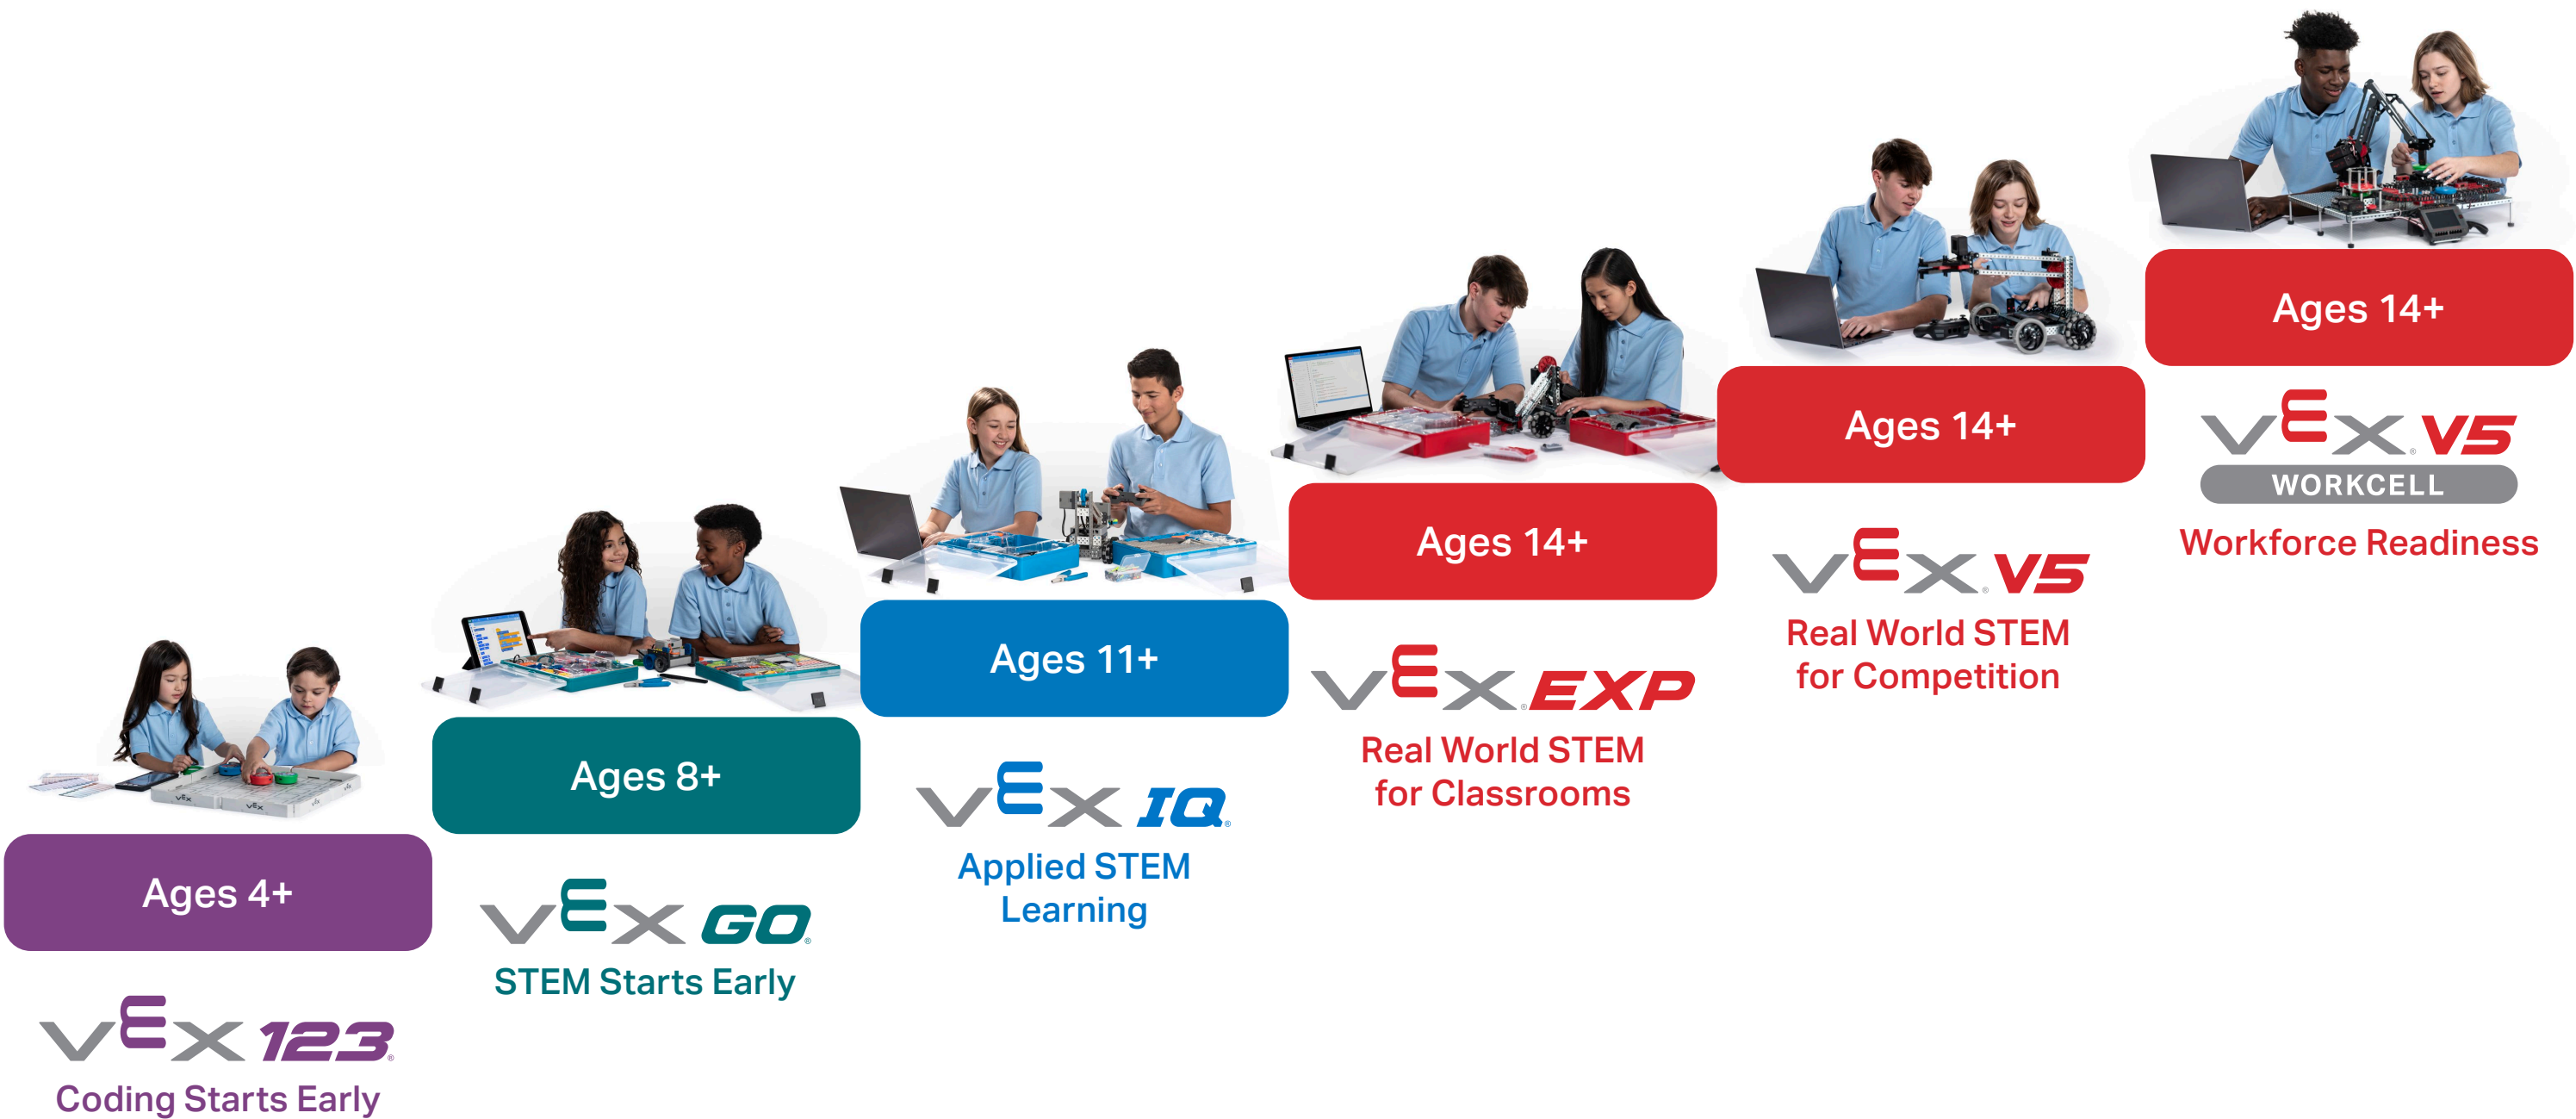

The VEX Continuum enables educators to create a cohesive STEM learning plan for students from primary to secondary school, and beyond. The VEX Continuum is comprised of SIX VEX platforms - VEX 123, VEX GO, VEX IQ, VEX EXP, VEX V5, and VEX V5 Workcell, all of which can be supplemented with VEXcode. This series of VEX platforms is grounded in a continuity of resources, curriculum, and materials, so that teachers and students can build upon their STEM learning from year to year.

This programme supports school-wide STEM learning goals through the educational resources provided within and across our platforms. Each of the STEM domains is addressed through curricular activities and resources, like STEM Labs, that are age appropriate, and give teachers and students an opportunity to apply their learning through more complex building and projects as they continue to learn.

For students, the VEX Continuum empowers the practice of learning at a personalised pace. VEX places emphasis on the process of instruction versus the product that is being created. Education is not always straightforward. STEM learning is one way educators can merge gaps between ages. The ability to align curriculum both horizontally and vertically essentially constructs a shared language of STEM amongst both teachers and students - setting up each side for future successes.

If any other questions arise or more data is needed, please feel free to reach out to our Sales Team at eusales@vexrobotics.com

All associates at VEX Robotics wish to sincerely thank you for contributing to the extraordinary rewards that STEM education brings to everyone involved.

Professional Development +

Build confidence.
Become inspired.
Interact with experts.

Professional Development, or VEX PD+, is an additional feature created to reshape STEM education from within the classroom, beginning with the educators. PD+ experts help build confidence and inspire through videos, webinars, lesson plans, and feedback.

PD+ includes one year of access to every VEX brand for one user from activation date

£725^{.00}

STEM Labs

Standards-aligned Educational Curriculum

education.vex.com

STEM Labs have something to offer for everyone. STEM Labs function as “plugin” lessons that can fit into your existing curriculum. Multiple labs can be utilised in sequential order to create a unique, extended learning experience.

STEM Labs promote hands-on learning. Students enjoy hands-on-learning activities that allow them to apply technology, science, maths, and engineering skills as they enjoy a 21st-century learning experience.

STEM Library

Thousands of articles about VEX and STEM

help.vex.com

The VEX STEM Library houses information about all things VEX. The purpose of the STEM Library is to help VEX users quickly find information about VEX products, services, or topics.

The STEM Library offers self-service support content around multiple topics and themes, including getting started, robot design and engineering, coding tips and techniques, and STEM Fundamentals.

VEXcode

VEXcode meets students at their level

code.vex.com

VEXcode is a coding environment that is suitable for students at all levels. The intuitive layout of VEXcode allows students to get started quickly and easily.

VEXcode is consistent across Blocks and Text, across VEX 123, GO, IQ EXP, and V5. As students progress from primary to secondary school and beyond, they never have to learn a different block, code, or toolbar interface.

STEM Competitions for All Ages

competition.vex.com

All students are natural scientists and engineers. VEX competitions foster these skills and capitalise on the motivational effects of competitions and robotics to help all students create an identity as a STEM learner. VEX competitions are also a great way to expose students to valuable soft skills like communication, collaboration and time-management in a fun and authentic way.

The VEX Robotics competition prepares students to become future innovators with 95% of participants reporting an increased interest in STEM subject areas and pursuing STEM-related careers. Tournaments are held year-round at the regional, state, and national levels and culminate at the VEX Robotics World Championship each spring!

Fundamental

Start programming your 123 Robot with just a single touch, no computer needed. Using the VEX Coder, there is also no need for a screen.

Flexible

VEXcode 123 is available for tablets, Chromebooks, Mac and Windows devices. Using Scratch blocks, unlock the full capabilities of your 123 Robot.

Feasible

VEX 123 takes pride in keeping your classroom in mind, with the sheer ease of implementation for maximum engagement.

Single Classroom Robot Kit

Education Kit 248-7621 **£109^{.99}**

All-in-one Classroom Solution!

Small Classroom Bundle	6 Education Kits + Extras	12 Students	248-7661	£799^{.99}
Classroom Bundle	12 Education Kits + Extras	24 Students	248-7848	£1,524^{.99}
Large Classroom Bundle	18 Education Kits + Extras	36 Students	248-7849	£2,174^{.99}

Engaging

VEX GO is a construction system that includes fun, collaborative, hands-on, minds-on activities that encourage all students to participate.

Innovative

VEX GO invents contemporary ways of structure and design by establishing distinctive patterns, colours, and composition techniques.

Accessible

Minimal instructions are needed before students are able to dive straight into the exploration of their VEX GO Kit.

Educate with VEX

The VEX IQ Classroom Bundles include all STEM hardware needed along with curriculum, support, and high-quality professional development offerings for educators.

Mentor a Team

Mentoring a competition robotics team is simple and manageable with VEX IQ kits, support, and many more STEM resources.

Customise with VEX

Each of the three VEX IQ systems (Education, Classroom, and Competition) offer the same development in both inspiration and ingenuity.

Passion

VEX V5 products are adaptable and dynamic, using state-of-the-art advancements to ensure outstanding outcomes with students.

Foundation

Giving students a head start with technical and vocational education and training is crucial, and nurturing their curiosity will continue to benefit them throughout their careers.

Expansion

VEX Robotics Competitions have been proven to be the most invigorating way to ignite a competitive spirit within students, through participation in worldwide events.

VEX V5

WORKCELL

Workforce Development for Ages 14+

workcell.vex.com

Constructive

The VEX V5 Workcell is a construction system for a 5-axis robotic arm, conveyors and sensors, combined with our proved VEXcode software.

Productive

Workcell introduces students to manufacturing concepts, empowering the manufacturing workforce of the future with a foundation of understanding.

Effective

Together with VEXcode V5, students have the opportunity to develop technical and problem solving skills by building and coding a simulated manufacturing workcell.

The VEX V5 Workcell Kit provides support for educators every step of the way

- Includes a complete kit for the Workcell STEM Labs, and the Factory Automation Competition
- Works with VEXcode programming software
- Designed for groups of 4 students
