What is Riders Robotics League?

Riders Robotics League is an interactive program for teams with a 5-Week Training Bootcamp and Final Competitions, aiming to develop their skills and compete against each other for great prizes.

The program aims to develop 21st century competencies of the teams joining the league. The training will not only cover the necessary educational content to start from scratch in this field, but also provide the opportunity to test those skills by organizing world-class competitions.

International Competitions

The teams will accomplish various tasks in order to get their completion certificate during the 5-Week Training Bootcamp, and show their skills in Riders Arena with international competitions at the end of the league.

Exciting Prizes

Top performing teams in the competitions will have the opportunity to win great prizes and internship opportunities while building new skills during the program.

5-World Final

4-Season Finals
