

DigitalEd

*Individual learning in a shared world*

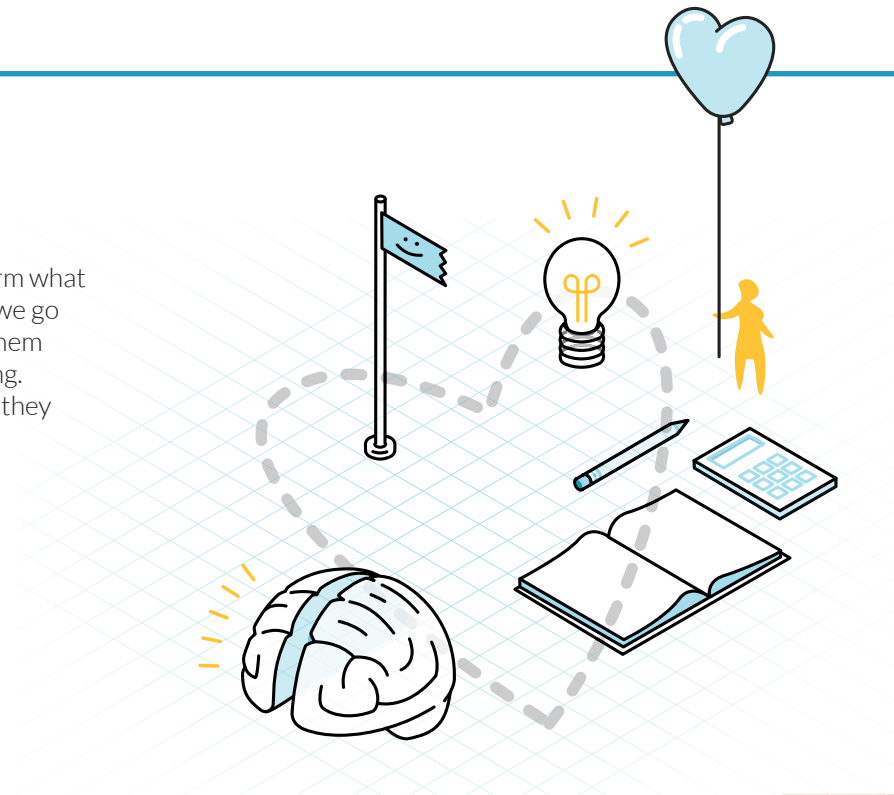

## Individual learning in a shared world.

DigitalEd is an online learning company that has a digital platform called Möbius. We have a simple and resonant purpose, to shape the world through digital learning.

### WHAT DRIVES OUR HEART

Our values are our beliefs made actionable. They inform what we expect of every member of our company and how we go about our daily business. We build our strategy with them always in mind and they guide us in our decision making. They are held close by each of us, which is why we say they are 'Quiet Values, Strongly Felt.'

- Innovate ahead of the curve.
- Embrace belonging.
- Meet learners where they are.
- Celebrate difference.

### WHAT DRIVES OUR HANDS

Unfolding from our beliefs and values we've built our platform solution on core technology pillars. Our strategy is simple: regardless of the domain - academic institutions, commercial verticals, micro-certification - we will build product solutions on the following four pillars.

#### FRICTIONLESS EDUCATION

Unencumbered access to, and ownership of customizable content, with seamless integrations across the education technology ecosystem.

#### DATA-DRIVEN INSIGHTS

Discover trends, and present opportunities for enhanced learning experiences, by leveraging a wealth of context-rich data.

#### LEARNING ANYWHERE

Deliver and consume educational assets anywhere, to anyone globally, online and on-demand.

#### TECHNOLOGY WITHOUT COMPROMISE

Automate and de-risk global deployment via dynamic cloud-native processes, and standards-compliant policies.

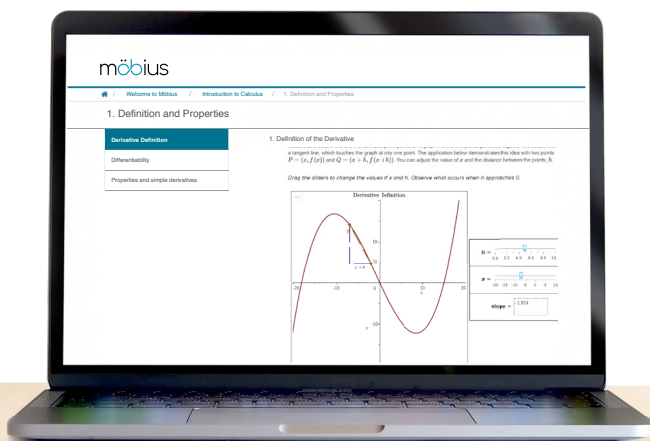

## OUR FLAGSHIP PLATFORM

STEM learners need more than static content, a video lecture, and a multiple choice exam. They need to experience and work with the concepts they are learning – to test their knowledge often, especially outside of graded exercises, in a way that authentically evaluates their true knowledge of the material.

Möbius is the best online learning platform for creating and deploying online STEM courses – complete with lessons, assessments and interactive learning activities.

It helps make the most complex material **KnowAble**.

- Möbius brings complex STEM disciplines to life with its **world-class math engine**.
- Give students **immediate and meaningful feedback** and provide instructors with data on student engagement and understanding.
- Access to **high-quality content** created by curriculum experts to let you get up and running quickly.
- Create and use **powerful multimedia visualizations** to anchor abstract STEM concepts.
- **Go beyond simple question types** with algorithmically generated and randomized exercises and over 50 different question types.
- **Seamlessly integrate** Möbius with your Learning Management System (LMS).

Make learning **KnowAble**  
with Möbius

Individual learning in a shared world
