

Imagine a world where learning is without limits

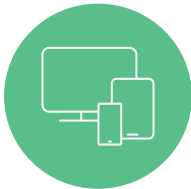

Discover the world of Unlimited Learning

- Develop lifelong learning habits —
- Improve reading and writing skills —
- Amplify existing learning resources and tools —
- Create teacher development courses —
- Support inclusive education initiatives —
- Gamification to make learning fun and motivating —

Break down learning barriers, create your own **Unlimited Learning Ecosystem**

If you believe learning should be without barriers, personalized, adapted to every person and accessible any time from any place, now is the time to join the Unlimited Learning revolution.

An Unlimited Learning Ecosystem includes:

Millions of
educational
content items

Interactive learning
experiences

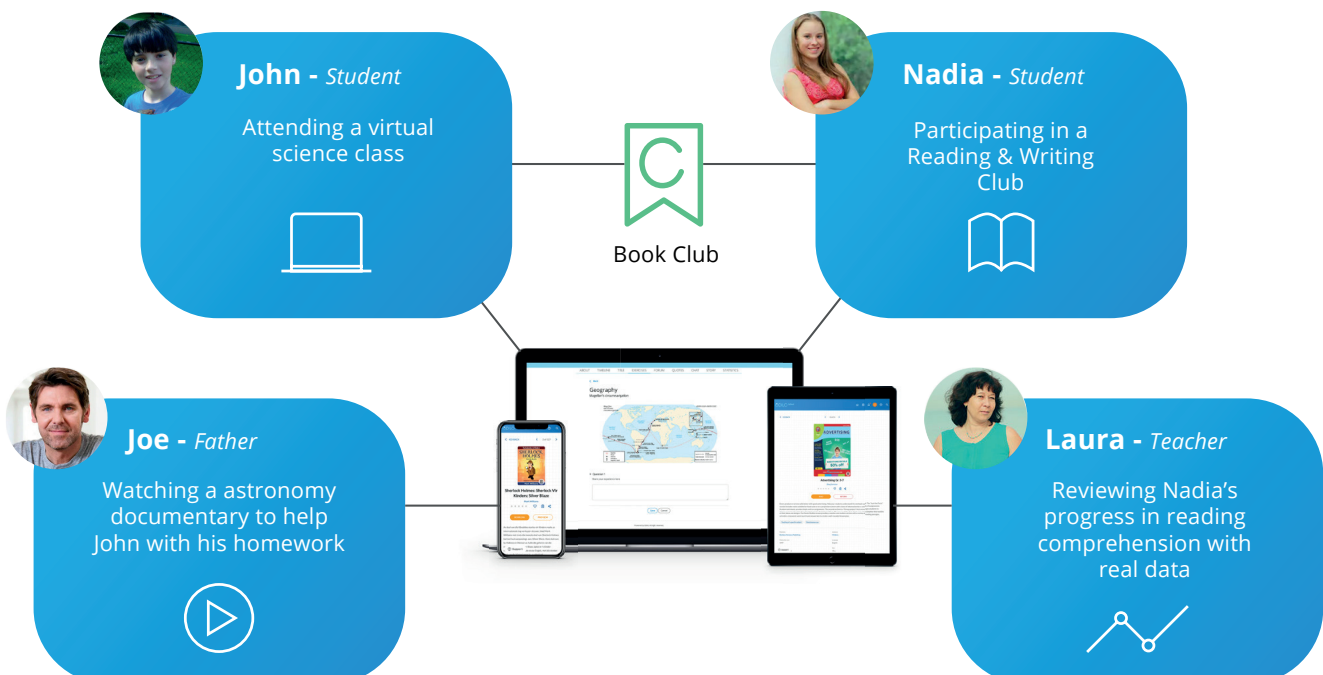

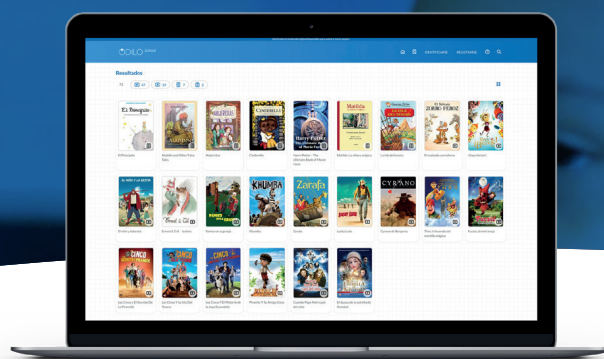

Personalization for
every student and
teacher

Intelligent platform
adapting to each user

How an **Unlimited Learning Ecosystem** supports the entire education system:

Leading Public Education systems around the world achieve their learning goals with **Unlimited Learning Ecosystems**

Ministry of Education Chile

Unlimited access to millions of titles in multiple languages and formats.

Structured reading plans developed based on PISA and PIRLS methodology. Since inception, **over 3 million hours** have been spent learning on the platform.

Calgary Board of Education Canada

Calgary's Unlimited Learning Ecosystem has been developed for a **multilingual community that supports language learning** and promotes students' learning in their native languages through **multilingual content**.

Community of Madrid Spain

Madrid's Unlimited Learning Ecosystem helped **modernize the educational system** by centralising materials and resources for students and teachers. A special focus was given to teachers by providing **reading plans** to improve their student's reading skills.

Ministry of Education Uruguay

Uruguay's Unlimited Learning Ecosystem has helped **upgrade the country's education system** through reading programs, independent learning opportunities, and **real-time data** for teachers and administrators.

Improving education **based on real time data**

Schools and Districts have long been required to produce reporting for various stakeholders. And, with progressively tougher operating conditions, it's an activity that takes significant time and uses substantial administrative resources.

ODILO BI presents insightful quantitative information in easily understandable formats – school decision-makers, educators and planners can identify important trends and take action to meet organizational and academic objectives.
