

Communication Solutions for Schools

Speech intelligibility in the classroom

Over 50 years of evidence have shown that kids learn better when their teacher's voice is evenly amplified and distributed throughout the room. Children do not hear like adults do and can miss up to 25% of what their teacher is saying. Our classroom audio distribution systems increase listening comprehension for developing brains so they understand and retain more.

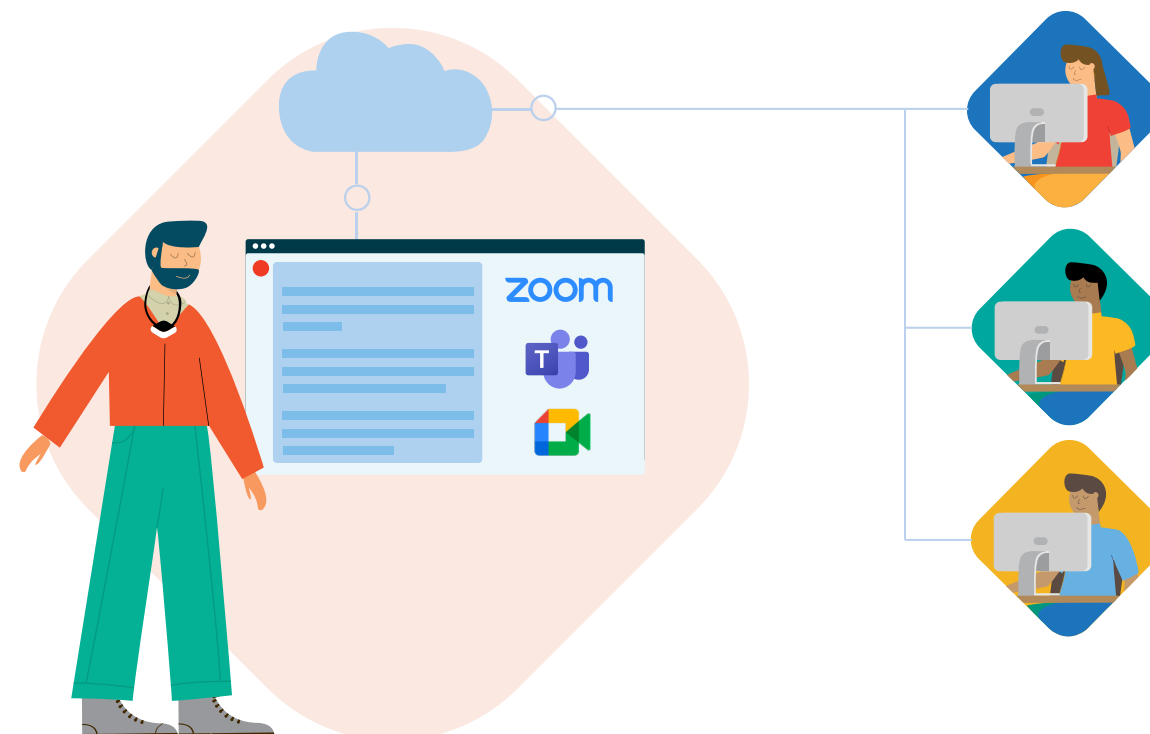

Media management made easy

Educators are using instructional content from a wide variety of sources these days, but managing them all takes time away from students. FrontRow makes classroom management easy by consolidating everything into a single interface.

Remote Learning at its best

Enhance teaching and learning beyond the classroom. FrontRow works seamlessly with popular video conferencing solutions for hybrid, synchronous, or asynchronous learning. Regardless of physical location, every student can hear the teacher or multimedia and participate in instruction equally.

Flexible scheduling for a connected campus

Keeping your campus running like a well oiled machine takes communication. Whether it's updating bell scheduling, paging in specific campus zones, or calling a classroom to send little Billy back to the office because he forgot his backpack, FrontRow combines bells, paging, and intercom into an intuitive IP-based communication platform.

School-wide emergency communication

FrontRow's Conductor platform is central to any school's Emergency Preparedness Plan for seamless school-wide communication during a weather emergency, lock down, lockout or general evacuation

Integrate and simplify your communications

Conductor makes you more efficient by using existing wiring in your networks. It communicates through the speakers and amps already in your ezRoom AV systems. And it integrates with IP phone systems and door relays — so redundancy goes away. It is available preinstalled on a dedicated server or can be deployed on a virtual server. Its open architecture can be easily mastered by IT staff, so you're not signing up for an endless stream of outside technician and consulting bills.

Classroom voice amplification, AV control, remote management, school paging, and alerts.

ezRoom simplifies classroom management and enhances classroom communication. From voice amplification to AV control, this "everything but the display" solution seamlessly integrates all your classroom technology into a single, easy-to-use system. When combined with Conductor, ezRoom room goes beyond the walls of the classroom to become a part of your campus-wide communication system.

BENEFITS

Better learning through enhanced voice intelligibility

Expands with Conductor for bells, paging, intercom and alerts

Simplifies classroom technology management into a single interface

Supports synchronous and asynchronous remote learning via Lesson Capture™

Integrates seamlessly with popular video conferencing platforms

Record voice and screen with Lesson Capture software for Mac & Windows

We have made thousands of ezRooms, custom designed by our customers, engineered and assembled by us at the price of an off-the-shelf system.

Designed to fit any classroom

ezRoom PlenumCore

PlenumCore lets you add as many speakers as needed to the practically invisible in-ceiling system.

ezRoom Trio

Trio offers an all-in-one solution with a built-in speaker array that is simple to install.

ezRoom WallCore

WallCore offers all the features of in-ceiling models in a form factor that mounts to walls.

The amazing, all-in-one classroom audio system

The towering standard in classroom sound quality, FrontRow Juno sets up in minutes and yet evenly fills your classroom with the kind of exciting, multi-layered stereo sound you'd expect from a much larger installed system. What's more, Juno is the only classroom audio platform with active feedback suppression and an intuitive touchscreen controller. Juno's intelligent digital platform connects you to exciting tools like automated lesson capture for remote learning, voice-command control of displays, and easy-to-use intercom.

BENEFITS

- 

Better learning through enhanced voice intelligibility
- 

Expands with Conductor for bells, paging, intercom and alerts
- 

Supports synchronous and asynchronous remote learning via Lesson Capture™
- 

Integrates seamlessly with popular video conferencing platforms
- 

Record voice and screen with Lesson Capture software for Mac & Windows

"I feel like I don't have to repeat directions multiple times, which saves valuable class time. Also, I don't have to spend so many hours during the week helping absent students catch up on what they missed. They can watch the video from that day and review the missed material quickly."

Tanise Colvin
Eighth-grade language-arts teacher
Pleasant Valley Junior High School

LessonCam™ Classroom Camera

With LessonCam, instruction is dynamic and engaging for online learners. Teachers are no longer tethered to their computer's webcam. They can stand in front of a display or white board, pan to another part of the room, or zoom in for a closeup of a hands-on demonstration.

Our LessonCam Control Software has programmable preset buttons that allow the teacher to quickly guide the view of learners to their most common presentation areas while teaching with ease.

FrontRow's classic classroom audio solution

Pro Digital fills any classroom with sound, to ensure that the listener hears every nuance no matter where they are in the classroom. The Pro Digital is easy to install and use, making it perfect for classrooms that need a simple audio solution.

BENEFITS

Easy to Adopt

Amazing Sound Quality

Works with multi-media

Record voice and screen with Lesson Capture software for Mac & Windows

"I was amazed at the quality of speech that the Pro Digital sound amplification system provided for the students to hear. Many people only think of the system as an amplification tool, but the ability to clarify speech for children is just as important."

Lisa Meneghin
2nd Grade Teacher

Lyrik portable classroom audio

The Lyrik™ amplification solution is a small yet mighty portable system for instruction and audio media to be heard anywhere: in a classroom, outside on a sports field, or even online! The tower has an integrated rechargeable battery and can be connected to a computer or other auxiliary audio source either directly using cables or wirelessly using Bluetooth®.

FEATURES

Portable and battery powered (Up to 8 hours per charge)

Powerful speaker for class or field

Ruggedized for outdoor use

ToGo

The powerful, portable, durable voice amplification system with amazing sound quality. ToGo is perfect for P.E. class, the school bus line, the gymnasium, the playground, or anywhere else you need quick and easy voice or media amplification.

FEATURES

Portable and battery powered (4-5 hour battery only operation)

Enough volume to overcome outdoor noise

Ruggedized for outdoor use

"As a school that now has three FrontRow ToGo System speakers, we are very pleased with these products. We use them on a daily basis in our lunchrooms or for other events that we need the use of a speaker. This product has many great features. It's lightweight, durable, portable, and has the ability to project across a large area while still providing a clear, crisp sound."

Brian Wherry
American Academy - Lincoln Meadows

Flexible campus scheduling and communication

A robust IP-based control and school communications solution that covers your campus. Whether it's establishing a schedule for routine commands or preparing for disruptions – from late start days to true emergencies – Conductor empowers you to communicate clearly and to keep the situation under control without calling a tech to make changes.

FEATURES

Paging and Intercom

Effortless communication is only a touch of a button or screen away.

Alerts

Customize and automate alerts to improve emergency response and safety.

Zoning

Broadcast communications or different bell schedules can be specified to targeted areas of your school.

Bells and Scheduling

Create as many bell schedules as you need with our easy-to-use interface.

Calendar

Quickly and easily build out your school's bell schedule.

Enhance emergency response

Conductor improves school-wide emergency communication and response with an array of dynamic capabilities:

- **Triggers emergency sequences**, such as lock-downs, with a single command.
- **Automates announcements** on campus and to off-campus emergency responders.
- **Controls doors, security, digital signage, AV device, HVAC, lighting** or any other IP-based device needed per your emergency response.
- **Teacher's mics can be programmed to be a silent panic button** to quickly alert the front office of any emergency.

"We have seven schools and our district office running FRONTROW's Conductor. We have implemented flexible zoning, coordinated emergency alerts and the ability to intercom with any room in the school."

Stephanie Griffin

Director of Instructional Technology
Piedmont Unified School District

About FrontRow

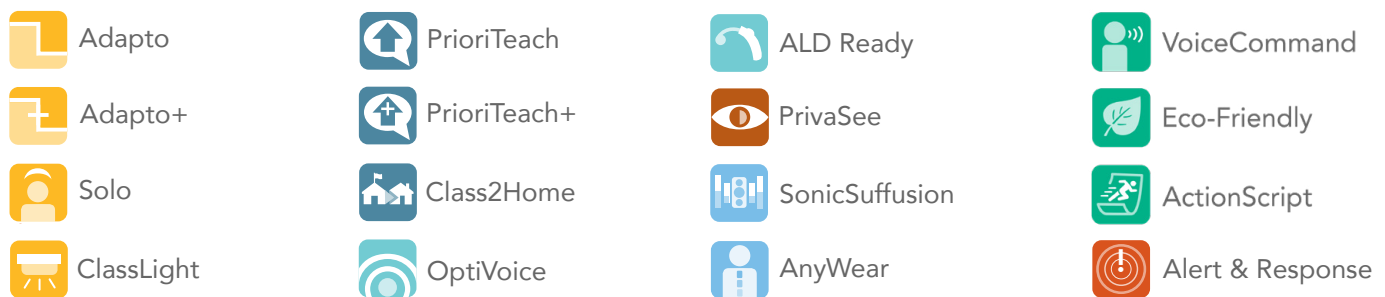

Our Mission Statement

To innovate as well as simplify the technology used to communicate, present and notify. Whether delivered in person, or asynchronous via audio or video, we want to optimize the communication experience for any individual or group looking to share or receive information on or off campus.
