# Why Pure IT

For over 13 years Pure IT Refurbished has been helping public sector organisations with high quality refurbished IT equipment at affordable prices. We supply to all public sector organisations from small schools with just a few desktops to Multi Academy Trusts, NHS Trusts and local Authorities with thousands of desktops and laptops.

We pre-select high quality business models at the peak of their reliability to achieve lower failure rates than buying new but at less than half the price.

We only select the most reliable models from Dell & HP's business range which are all built to last 8+ years. We then professionally refurbish and rigorously test every unit to ISO 9001 standard, so every unit we supply looks and performs as good, if not better than, new. The equipment we supply is at the peak of its reliability curve and ready for 5+ years of use with better reliability rates than new equipment.

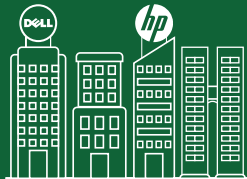

**Up to 5 year  
warranty**

**30 day no quibble  
money back guarantee**

**Under 2%  
failure rate**

**We only buy machines  
from top manufacturers**

**Microsoft<sup>®</sup>**

5 year Next Business Day Warranty: **£9 + VAT**

## What our customers say

"Buying refurbished Dell desktops from Pure IT with the same specification and warranty as we'd buy through the NHS framework has meant we can buy 3 desktops for the price of 1 new desktop."

**Lee Loades, North West Anglia NHS Foundation Trust**

"Compared to buying new hardware; there is no comparison to make really, it's a no brainer for me and my tight budgets. Pure IT nailed it first time ...Without the additional RAM/SSD being fitted at Pure IT's warehouse we would not have been able to complete our summer upgrade project quite as easily which was over a 1000 units ordered."

**Nigel Pincent, Capital City College Group**

"To any school considering purchasing refurbished IT equipment: given a limited budget you are much better off purchasing refurbished equipment from a quality manufacturer like HP or Dell rather than new equipment of lesser quality. I've been buying refurbished HP equipment for 10 years and that business model has not let me down."

**Barry Hodgson, Tytherington School**

## Who are Pure IT

Pure IT are one of the UK's leading IT refurbishment companies. We've been supplying refurbished desktops, laptops and monitors to the education sector, NHS and private sector for over 12 years. We supply over 12000 desktops, laptops and monitors per year with an average saving of £300 per desktop and laptop and £40 per monitor.

Our mission is to help organisations throughout the UK increase their productivity by bringing advances in technology within reach of their budgets.

We do this by being experts in sourcing the best IT equipment from around the world. Our experienced IT technicians then test and quality control every unit to ISO 9001 stand to ensure it exceeds the reliability and performance levels you need. If anything does go wrong you are fully covered for up to 5 years with our next day replacement warranty service.
