

# DIGITAL ALERTS

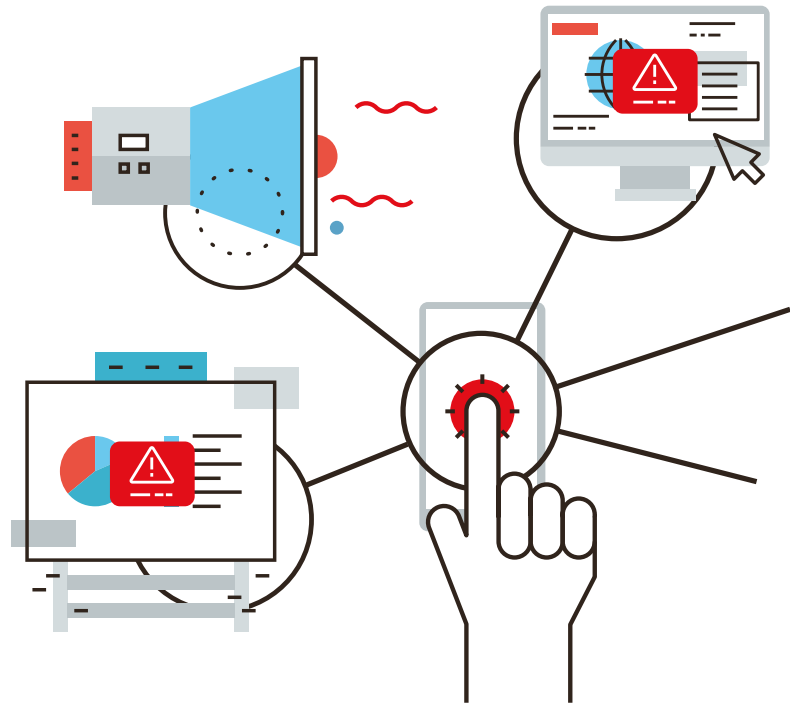

MASS NOTIFICATION SOFTWARE

**POWERFUL IN EMERGENCIES**  
**USEFUL EVERY DAY**

**POP-UP | PUSH ALERTS | LOCKDOWN | STAFF COMMS**

Our award-winning Digital Alerts service is a cutting edge solution that can rapidly notify all members of a school community about an active or potential lockdown situation.

One-click of a button is all it takes to circulate an alert to your school computers, interactive whiteboards, emails, and mobile devices. This essential alerting system delivers valuable and emergency information throughout the school for real-time increased situational awareness.

The system has even been designed to allow for two-way communication between users for safe, fast and effective status updates.

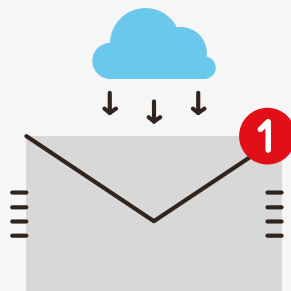

**But its use isn't limited to lockdown scenarios.**

The Digital Alerts software can be set up for multiple scenarios such as a localised incident, lone working and regular messaging.

## DESKTOP ALERTS

The Desktop Alert is an onscreen pop-up that displays information in real time as it happens. Full screen, partial screen, scrolling banner, and more options.

## INBOX ALERTS

Email alerts allow staff members to be informed regardless of location. Allows multiple email addresses per user.

## MOBILE ALERTS

Push alert delivery to all mobile phones, iPads and tablets.
