Assessment Solutions

The logo for SmarTest suite, with 'SmarTest' in orange and 'suite' in a grey rounded rectangle. To the right is a circular icon with a green checkmark and three concentric arcs in blue, green, and red.

SmarTest 

suite

SMARTEST SUITE

Customisable Remote Proctoring platform, ensuring security and integrity of remote assessments, anytime, anywhere.

Secure and innovative authoring and e-assessment platform, featuring live or offline exams.

Centralised portal for the management of Test Centres, Test Takers and Proctors.

SmArTest

invigilate

SMARTEST INVIGILATE

The innovation for the Invigilate Remote Proctoring platform was born from experience during the Covid 19 pandemic.

Being responsive to customers and Test Taker challenges, we continued to put the Test Taker at the heart of the development, whilst ensuring test security and integrity are pivotal to the design.

Exam types

- ✓ Live Proctor
- ✓ Live Proctor Plus
- ✓ Live Proctor Lite
- ✓ Record & Review
- ✓ Record & Review Lite
- ✓ Auditorium
- ✓ Offline

LIVE PROCTORING

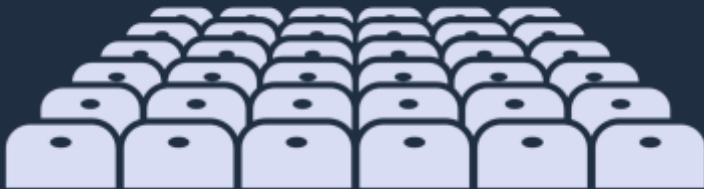

- ✓ Live proctoring allows the invigilation of candidates in real time via multiple streams - web camera, mobile phone camera, and screen share.
- ✓ Proctor and Technical support is available before and during the exam, removing the burden on Test Takers and allowing them to focus on the exam.
- ✓ A proctor can monitor and communicate with multiple Test Takers during an exam session.
- ✓ 2-way chat and voice communication is available between the Test Taker and the proctor.
- ✓ AI Automated Flagging is available to augment the human proctor decision making process.
- ✓ 1000's of concurrent exams can be delivered.

RECORD & REVIEW

- ✓ The entire test session is recorded with the same streams as the Live Proctor solution - webcam, mobile phone camera, and screen share.
- ✓ The proctor accesses the recorded tests, plays them back with up to 8x speed, then flags potential infringements using time stamped annotations.
- ✓ Automated Flagging identifies infringements and alerts the human proctor during the play back of the tests.
- ✓ Allows you to track the time reviewed by the proctor, per hour of testing, ensuring rigour and quality of monitoring.
- ✓ Limitless number of tests can be taken at any time.
- ✓ 1000's of exams can be conducted concurrently.

AUDITORIUM

- ✓ In the Auditorium the Test Taker enters a virtual test centre to sit the exam at the same time as the other Test Takers.
- ✓ All the features of the Live Proctor exam are available with Auditorium.
- ✓ The proctor monitors a cohort of Test Takers, with Automated Flagging identifying infringements. The proctor can then communicate directly with individuals via the ChatBox or by 2-way voice communication.
- ✓ The Auditorium can be recorded in order to review all automatically flagged incidents.
- ✓ Auditorium allows for a much greater proctor to Test Taker ratio.
- ✓ Multiple proctors can monitor the exam and use the ChatBox to communicate with each other.
- ✓ Technical support to the Test Taker and proctor remains available.

OFFLINE MODE

- ✓ An installer package is downloaded onto the Test Takers' computer and a unique key code allows them to log into the exam.
- ✓ On completion, the Test Taker uploads the exam.
- ✓ With the upload complete, all traces of the exam are deleted from the Test Takers' system.
- ✓ Automated Flagging will detect infringements and time stamp them to allow the proctor to review all instances.
- ✓ Offline allows tests to be taken where an internet cannot be guaranteed.
- ✓ Tech support is available to the Test Taker via a separate WhatsApp channel.

TEST TAKER FEATURES

- ✓ Multi language support
- ✓ System Check
- ✓ Security Check
- ✓ Toilet Break guidance at system check
- ✓ Room Check as a part of system check
- ✓ Post Exam room scan (optional)
- ✓ Material Check as a part of system check
- ✓ Post Exam Material Check (optional)
- ✓ Offline mode installation package
- ✓ Proctor Chat Box (With Voice)
- ✓ Tech Support Chat Box

PROCTOR FEATURES

- ✓ System Check
- ✓ Security Check
- ✓ Tech Support Chat Box
- ✓ Supervisor Intervention
- ✓ Proctor break facility covered by supervisor
- ✓ Automated Flagging augmenting human proctor decision-making process
- ✓ Proctor can accept/reject/escalate AI automated flags in real time
- ✓ Proctor view of RAG status at the end of the exam
- ✓ Proctors Group Chat (Only Auditorium)
- ✓ Identity Verification
- ✓ Pause / Disqualify / Add Extra Time for exam
- ✓ Proctor Comments
- ✓ Proctor Chat Box (With Voice)

SUPERVISOR & AUDITOR FEATURES

- ✓ Supervisor view of all proctors
- ✓ Review of proctor's behaviour and efficiencies
- ✓ Supervisor intervention is available
- ✓ Tech support ChatBox
- ✓ Auditor can review all Test Taker and proctor sessions

TEST INTEGRITY

For remote testing to best replicate a brick and mortar experience and to ensure test integrity we insist on:

- ✓ Photo and ID verification
- ✓ 360° scan of the room and the workstation
- ✓ Proctor alerted to microphone, webcam or mobile phone switched off
- ✓ Appropriate lighting in the test takers room
- ✓ Lockdown browser during test
- ✓ Automated Flagging available to augment human proctor decision-making process
