Antimicrobial trays

Compounded from a special polymer blend, with added antimicrobial treatment, these Gratnells trays, in kiwi, have a built-in infection control to keep surfaces free from germs and mould, and reduce cross contamination. Wash or wipe clean, and the protection remains, as it is moulded within the structure of the tray.

Features and benefits

- With built-in antimicrobial finish. Wipe clean or wash
- Long lasting antibacterial, antifungal and antiviral protection
- Resists surface contamination and reduces infection transmission
- Available in Kiwi tint and 4x regular Gratnells sizes
- Compatible with the full range of Gratnells Callero trolleys and fixed storage
- Antimicrobial clip-on lids also available to keep contents clean and dust free.
