MathType ✔

by **wiris**

Write **math** equations and **chemical** formulas everywhere

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Available for:

Windows   macOS   Google Docs   W   P   (Pages)   (Keynote)
Blackboard   Brightspace by **D2L**   canvas BY INSTRUCTURE   its learning   moodle   schoolOGY

The leading solution for editing mathematical and chemical expressions everywhere

In elementary algebra, the **quadratic formula** is the solution of the quadratic equation:
$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Your students and teachers can **handwrite formulas** online on any touchscreen device.
Your content will be automatically **accessible.**

You can create **chemistry** formulas with ChemType.

The toolbar is **configurable**: add your own icons to improve your productivity.

You can convert to/from **LaTeX and MathML.**

You can **export to many formats**, such as PNG, SVG, PDF and EPS.

The global solution for math and science education

WIRIS develops software to help teachers, students, universities, publishers and other edTech companies create digital contents and assessments in the fields of mathematics and sciences. Our aim is to provide a fully digital learning experience to our worldwide user base. Est. in Barcelona (1999) and Long Beach, California (1986).
