

CLARITY

LED Lighting for Education

Clarity offers all the energy and cost-saving benefits of LED colour-changing lighting to schools, colleges, academies and universities, whilst also delivering the very highest quality of lighting.

We believe in keeping the user experience simple so we provide systems that are easy for anyone to operate.

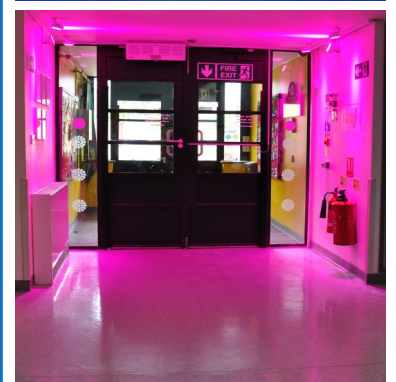

We also offer tablet control of your lighting for ease of use from anywhere in the room. Existing systems can be modified and customised to suit your requirements.

Clarity have a proven track record of working in schools (including Special Needs), colleges and academies, where they provide solutions that are never over-complicated.

We provide designs that are affordable and versatile allowing them to be used for simple presentations and assemblies or big theatrical and musical productions. We make creative, colourful lighting appear on and off the performance area and project intense, sharp images into the brightest of spaces.

Lighting doesn't have to be restricted to your stage. The photographs to the right show the main entrance to Stephen Hawking School, where architectural lighting welcomes pupils with a cheerful LED colour-changing display.
