

# CLARITY

## Tablet Control of Sound and Lighting

Clarity offers the option to operate your sound and lighting systems wirelessly from numerous devices including a tablet or smartphone. This is not limited to new installations, we can also modify many existing systems. Several iPads can be used with the system, it is not limited to just one unit. Wireless control can be an additional option as well as having the traditional method of equipment rack and wall panel control.

The screen layout can be customised to your requirements and can show as little or as much as you want - example displays of sound and lighting controls are shown. The display can also include your logo and name.
