

Learn anywhere with Jamf School

Strengthen communication between teachers and students.

Jamf School, the Apple management solution built for education, is changing the education landscape with Learn Anywhere — the complete Apple education solution for schools, teachers and students looking to communicate, use engaging resources and assess learning objectives from any environment.

With Jamf School, your classroom needs and instruction tools are at your fingertips. The Jamf School Teacher and Jamf School Student apps provide the ability to easily configure and control access to the content and resources on the devices for the purpose of lessons or assessments. And Remote Class — a new feature of the Jamf School Teacher app enhancing communication on iPhone and iPad in a one-to-one or one-to-many student environment — is an important part of any flexible learning strategy. The communication features empower students and teachers to easily connect with virtual video conferencing. Communication features in Learn Anywhere:

Integrated easy-to-use Teacher and Student apps to enable teacher to student communication.

Unique ability for teachers to launch a virtual classroom or one-to-one meeting with students in only one click using trusted conference platforms like Zoom, Microsoft Teams or Google Meet.

Raise Hand feature allows students to proactively engage teachers with a question or alert them to an issue.

Overcome the roadblocks of distance learning.

From fractured communication platforms, lack of instructional resources and limited deployment capabilities that plague schools, Jamf's ensures students, teachers and parents have the tools they need to succeed with learning – no matter where it's taking place.

Coupled with the power of the Jamf School management system, IT administrators can seamlessly inventory, deploy and manage additional communication resources and applications on student devices.

See how Jamf School refines the remote learning experience.
