LENOVO EDUCATION

## The right devices for commanding the class.

You wouldn't expect teachers to work from a student edition textbook. So why equip them with a student device? Lenovo has AMD-powered ThinkPad devices that are engineered for all that today's educators do.

As schools adapt to a future where learning happens anywhere and everywhere, teachers will need devices that are:

### CONNECTED

Teachers have to stay connected to their students, whether walking the classroom or working from home. ThinkPad devices powered by AMD Ryzen™ Processors are a natural fit for education because they are port-rich and can connect via WiFi, Bluetooth®, and LTE CAT9.

### SECURE

Teachers have more than answer keys and grades on their devices. They have sensitive, personal information about students that must be kept secure. ThinkPad devices with AMD PRO security are built with ThinkShield, the most comprehensive, end-to-end security solution on the market, to protect students' data and teachers' devices.

### AGILE

Teachers need advanced, modern devices with the performance to be responsive, multitask, and take full advantage of all the educational resources available. ThinkPad devices with AMD Ryzen™ Processors give teachers greater opportunities to engage with students one-on-one in the classroom as well as manage their classroom from anywhere, using software like LanSchool, Bark, Microsoft 365 for Education, and G Suite for Education.

In addition to our portfolio of devices designed for all kinds of learners, we have powerful, proven, and secure AMD-powered ThinkPad devices for all kinds of teachers.

### ThinkPad C13 Yoga Chromebook

ThinkPad reliability meets powerful AMD Ryzen™ performance in this portable, affordable, productivity-boosting Chromebook. Educators will love the 360-degree Yoga hinge for multi-mode use, touchscreen with optional garaged pen, and enhanced security features, like a touch fingerprint reader.

### ThinkPad L14 Gen 1

Perfect for entry-level budgets, ThinkPad L14 Gen 1 comes equipped with powerful AMD Ryzen 4000 Series or Ryzen PRO 4000 Series Mobile Processors for fast, responsive performance. It also boasts all-day battery life along with the reliability and durability you expect from a ThinkPad.

### ThinkPad T14

This newest generation ThinkPad powered by AMD Ryzen PRO 4000 Series Processors offers powerful performance for maximum productivity as well as WiFi 6 connectivity, a more immersive, interactive audiovisual experience, and up to 14 hours of battery life<sup>1</sup>.

If your school is reassessing its technology needs to deliver a future-ready educational experience, Lenovo can help with AMD-powered ThinkPad devices that provide a smarter way forward. Talk to your Lenovo representative today.
