

A pioneer in online invigilation, Examity has been recognised for efficiency, security and convenience in online testing. Our platform offers a variety of invigilation styles, from automated through to live, for hundreds of universities, employers, and certification providers worldwide.

Why Examity?

As the number of online classes and degree programmes increase, educators must wrestle with the challenges of maintaining both exam and institutional integrity. That's where Examity comes in.

Seamless and secure online invigilation.

A global invigilation solution for your online programmes.

Integration

Examity can implement with any test delivery platform. Our simple and straightforward approach includes single sign-on for all users, presenting a seamless experience for test-takers, instructors, and administrators.

Technology

Monitoring nearly three million exams a year means we must stay ahead of violation trends. Our solution, backed by AI and machine learning, is constantly evolving to reflect technology and industry advancements.

Support

We recognise that exam day can sometimes feel overwhelming. With this in mind, we maintain a robust support structure to address any and all concerns. Support is offered 24 hours a day, 365 days a year via online chat, email, and phone.

Flexibility

When it comes to test integrity, our clients have their own ideas. Rather than offer just one invigilation style, Examity's platform allows clients to select the level that best fits their needs, from automated through to live.

Reporting

From completion rates, violation reports, and video files, our comprehensive dashboard gives you immediate access to all the information, allowing you to quickly assess, and address, aberrant behaviour.
