

TECHNOLOGY
DESIGNED, SERVED AND SUSTAINED

Leading
IT and AV
solutions
to enable teachers
to inspire and
engage students

“The Stone Equinox platform has made our lives so much easier - and the installation couldn't have been any easier. It's already clear that Stone want the same things we do and I am confident we will develop a long-lasting partnership.”

Chris Ash and Steve Twiss,
Joint IT Managers
LEAP Multi Academy Trust

Stone are proud to support Primary and Secondary Education

Stone have been providing the education sector with leading IT and AV solutions for almost 30 years. Stone's education business is built upon an in-depth knowledge of the sector and our technical experts can help transform your IT to advance the learning of your students.

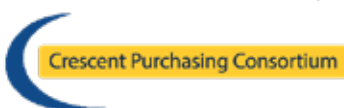

Our experience in delivering solutions, teamed with our partnerships with global IT brands such as Microsoft, Dynabook, HP, Cisco Meraki, NetApp, VMware, CTouch and Acer mean we can assist you with a vast range of solutions including:

- > Devices from Stone and leading global brands
- > Servers and storage solutions
- > Networking and infrastructure
- > Managed Services and Break-fix options
- > Software and licensing solutions
- > AV and collaboration solutions
- > Secure ITAD and asset management
- > BYOD and 1:1 Schemes
- > Cybersecurity
- > UK customer support
- > Classroom resources
- > Professional services

CPC

We are one of only 3 suppliers on all 5 Lots of the Crescent Purchasing Desktop Hardware Framework;

- 1 - Desktop Hardware
- 2 - Portable Devices
- 3 - Peripherals
- 4 - IT Hardware compatible with Apple Operating Systems
- 5 - ICT Disposal & Recycling

When purchasing through the Desktop Hardware Framework, you benefit from our in-house expertise, and the privileged position that we have as both an original equipment manufacturer and Value-Added Reseller. Utilising our almost 30 years of experience as a Hardware provider, we can offer bespoke solutions for CPC Members, enabling Schools to meet ever-increasing technology demands, whilst balancing resource and budgets. In tandem with our industry-leading hardware products, our own support functions give members the complete peace of mind that their investments are protected, with on site warranty provision using our own engineers.

We offer a 'whole life cycle' approach to hardware provision, and with our own ADISA accredited, in-house Recycling Centre, we can give members a secure, efficient disposal service which ensures that your assets are safely processed in accordance with all current regulations.

Another benefit of purchasing software through the CPC framework is the added level of protection you will receive as part of the membership. Each transaction is transparent, as the purchasing process is fully auditable and in complete compliance with the EU procurement regulations. This would not be achievable when transacting directly with most software companies.

**GET
YOUR
TECH** 4-SCHOOL

1:1 technology. No risk. No cost.

The modern classroom is driven by technology - preparing students for the tech-driven world. It's becoming more and more vital for schools to provide consistent access to personal learning devices. The challenge is delivering this in a way that doesn't impact budget, resource or infrastructure.

GetYourTech4School is a no risk, no cost 1:1 device scheme for schools. Driven by parental payments with no personal credit checks, there's no need to dip into your budget. The devices are managed and distributed by you, meaning there's no risk to your infrastructure by bringing in personal devices as part of a BYOD scheme.

By working with Stone you can:

- ✓ Have access to the latest devices at no risk and no cost to your school
- ✓ Launch a fully managed 1:1 scheme without the admin burden - we manage parent marketing and communication, payment collection and portals
- ✓ Be supported by a zero risk service - we offer repairs, recycling of displaced equipment, insurance and warranty and more
- ✓ Stay compliant - we're members of the Finance and Leasing Authority (FLA), and our data processing is certified against the ISO 27001 standard and fully GDPR compliant
- ✓ Get peace of mind - Stone Payment Solutions are financially strong and wholly owned by CSI Leasing - one of the largest independent equipment leasing companies in the world with over 5 decades of trading history and \$1.6bn in assets.

Schools

Stonebook Mini

- > Intel® Celeron® Processor
- > 11.6" device with a classic and simple design, created for Education
- > Available on the Intel® Gemini Lake Platform
- > Thin and light device with solid features for everyday use
- > Moulded trackpad
- > Power and performance of a larger notebook, with the portability of a netbook

Stonebook Lite

- > Up to 10th Generation Intel® Core™ Processors
- > Slimline 14" design for ultimate mobility
- > Matte display for anti-glare reflection
- > High capacity battery
- > Customisable range of memory and storage options

Stonebook Business

- > Up to 10th Generation Intel® Core™ Processors
- > Our premium device, built for professionals
- > Thin bezel design, aluminium chassis with back-lit keyboard and 14" Full HD display
- > Intel® Optane Memory ready
- > Dual storage drive capability

Stone Cloudbook

- > Intel® Celeron® Processors
- > Built and designed around schools, for students and teachers alike
- > One of our most lightweight and portable Stonebook devices
- > Aluminium chassis
- > 14.1" Full HD Display

Stonebook Pro

- > Up to 10th Generation Intel® Core™ Processors
- > High performance with style
- > 15.6" HD matte display for anti-glare reflection
- > High capacity battery
- > 4G module option

BATTERY LIFE OPTIMISED TO LAST

For marathon work and play sessions away from the outlet

GRAPHICS PERFORMANCE - 2X

Up to 2X Graphics performance with a 10th Gen Intel® Core™ i7-1065G7 processor vs. 8th Gen Intel® Core™ processors

BETTER CONNECTIVITY - 3X

Intel® is raising the bar on connectivity. Get nearly 3X faster downloads with 1024 QAM and 160 MHz channels on Intel® Wi-Fi 6 (Gig+) products

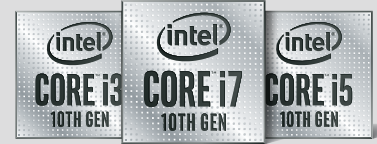

FASTER PERFORMANCE - 2.5X

AI performance with Intel® Deep Learning Boost (Intel® DL Boost) with a 10th Gen Intel® Core™ i7-1065G7 processor vs. 8th Gen Intel® Core™ processors

ENTERTAINMENT LIKE NEVER BEFORE

Stunning 4K HDR with Intel® Iris® Plus Graphics

10th Gen Intel® Core™ laptops offer a new generation of performance to power

10th Gen Intel® Core™ processors with Intel® Iris® Plus graphics bring broad-scale artificial intelligence (AI) to the PC for the first time. With approximately 2.5x accelerated AI performance, approximately 2x graphics performance, nearly 3x faster wireless speeds with Intel® Wi-Fi 6 (Gig+) and the fastest and most versatile port available via Thunderbolt™ 3 technology, these processors bring a new level of integration to power PC experiences for today and the future.

Stone PC Lite

- > Latest generation Intel® Core™ processors available
- > Tool-less lightweight and versatile chassis design
- > Halogen Free, 250w 80+ Bronze PSU
- > Intel® Optane Memory Ready
- > Compatible with the Stone™ premium stand
- > Capable of running up to 3x displays simultaneously

Stone PC Mini

- > Latest generation Intel® Core™ processors available
- > Compact 1.07 litre design with compromising on performance
- > VESA mountable neatly to the back of screen
- > Intel® Optane™ Memory Ready
- > Capable of Running up to 3x Displays Simultaneously
- > M.2 Interface
- > vPro option available

Intel® Optane™ Memory H10 with Solid State Storage

Stone PC Pro

- > Latest generation Intel® Core™ processors available
- > Value for money and maximum configuration space
- > Overclockable Intel® Core™ Processor Capable
- > Capable of running up to 3x displays simultaneously
- > Designed to take full-height graphics cards
- > Front facing card reader option

9th Generation Intel® Core® vPro™ processors available

Stone AIO Pro

- > Latest generation Intel® Core™ processors available
- > Contemporary and stylish design for a flexible desktop solution
- > Matte display for anti-glare reflection
- > Internal 120w power supply
- > Height adjustable options available

Stone PC Mini

- > Latest Intel® generation processors available
- > Tiny 4" by 4", compact design that packs performance
- > VESA mountable neatly to the back of screen
- > Intel® Optane™ Memory Ready
- > Capable of running 3x displays simultaneously
- > M.2 Interface

Servers

As an Intel® Platinum partner we have access to all the latest tech solutions, making it easier for you to implement new platforms to help drive innovation and user experiences. Our strategic partnership with Intel® means that you'll get access to the latest server and data centre technology solutions, such as 2nd Gen Intel® Xeon® Scalable processors, Intel® Optane™ memory and much more. With our server solutions being packed with these Intel® components you can configure servers to your exact requirements.

Hewlett Packard Enterprise

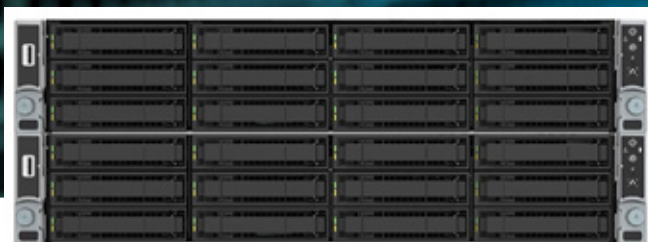

Hewlett Packard Enterprise (HPE)

Working alongside Hewlett Packard Enterprise, we can provide a broad portfolio to address all your requirements no matter the size of the school. We are committed to engaging with schools that address staff, students and teacher's needs. We have the expertise to consult on, provide and support all HPe products and solutions. Our technical staff are vendor certified to take care of any issues or repairs within your organisation.

Hybrid Infrastructure

Our Stone Hybrid Acceleration Series (HAS) offers a vast range of configurations that can be tailored to suit your needs. We know that with all new technology investments, it's important they're protected for the future. That's why we include flexible contracts for our Stone Virtualisation Support Services (VSS) with all our Hybrid Acceleration Series (HAS), to provide you with an amplified level of virtualisation support, and options to purchase up to 5 years subscription upfront.

EQUINOX stone

Hyper-converged platform that evolves with you

The Stone Equinox is our hyper-converged virtualisation platform and service designed for the expanding and evolving education, particularly for secondary schools. Stone Equinox uses the latest Intel® technologies to bring you a hyper-converged solution, at a fraction of the cost of most competing solutions, whilst giving you the edge with our value-added services.

- > Faster data compression and cryptography with integrated Intel® QuickAssist Technology
- > Server & Storage appliance designed around Microsoft's industry leading Hyper-V / Storage Spaces Direct (S2D) platform
- > Available in a 2-Node design, or 3-Node option for large scale environments
- > Utilising Integrated RDMA switching & NVMe technologies, the Equinox delivers a benchmark of over 2 million IOPs*
- > Up to 5 Years Next Business Day Warranty as standard
- > 90 day trial Stone VSS (Virtualisation Support Services) Contract supplied as standard
- > Perfect Server & SAN replacement

ELYSIUM stone

Reliable. Dependable. Scalable.

Our latest tailored solution that can be scalable from 4 to 16 nodes in one single solution. Combining our proven 32TB to 140TB Nodes with Enterprise RDMA networking, the Elysium allows us to take the next step and grow beyond a 3-node limit. We can utilise the brand-new Microsoft Windows Server 2019 meaning we can manage and support a larger cluster more easily, including proactive monitoring for failures with historic data availability.

- > Massive scalability with up to 1.6PB of capacity and 704 Physical Processor Cores
- > Tailored solution from 4 nodes up to 16 nodes in a single solution
- > Datacenter features, performance and reliability - Rapid deployment - every Elysium is built and tested, fully ready to run out of the box
- > Harness the power of the latest generations of processor technology and NVMe acceleration
- > Utilise brand new Microsoft Windows Server 2019 features such as CSV level Deduplication,
- > Windows Admin Center, active drive health monitoring and much more...
- > Datacenter Class 25/100Gbit Switching from Mellanox with each node having access to
- > 200Gbit of throughput
- > Supports Hardware Encryption with TPM

Networking & Infrastructure

It is vital for schools to provide the best facilities and environment for students to learn and develop. Expectations from students to be able to seamlessly connect and communicate from any location, and from any device has never been higher. Having a solid networking solution is critical offering greater security and control over access, to protect critical course information available online, confidential data, and can provide full automation benefits to enable for smooth and seamless processes whilst at school to facilitate their learning.

We can provide schools, with innovative products and solutions, including everything from firewalls and switches to enterprise grade networking solutions, from consultation and design through to deployment, commissioning and ongoing care and support. By working with the biggest brands in networking, such as Cisco, Cisco Meraki and Aruba we can provide you with the highest performing solutions. We have the expertise to consult on, provide and support all networking products and solutions.

Data Management

In today's intelligence era, there continues to be a massive growth in data across organisations' data management environments, and we know that more data brings more insight, which allows schools to arrive at more intelligent decisions. With a whole portfolio of products including storage devices and cloud software, we can offer your school a chance to build and significantly streamline their existing data processes and management. Working alongside close brands such as Hewlett Packard Enterprise (HPE), we can help you build your data fabric with solutions including all-flash, hybrid-flash, hybrid-cloud and object storage systems.

NetApp

NetApp look at the entire data pathway to create a hybrid cloud model with an integrated set of endpoints into which customers can place their data. Giving institutions the freedom of choice regarding data placement and management. This is then weaved together to form a single integrated operational landscape, enabling customers to trace where they place their data while still applying all the necessary enterprise attributes to make sure it's secured and protected.

Hewlett Packard Enterprise (HPE)

HPE delivers intelligent storage for the hybrid cloud world—storage that is AI-driven, is built for cloud, and delivers an as-a-Service experience. Organisations will be Always On, Always Fast, as well as always agile to respond to different challenges and needs over time. Built upon innovation that can unleash new services, revenue streams, and business models. This innovation is provided by the HPE Intelligent Data Platform, which turns data challenges into opportunities.

We work to ensure we understand the environment that you the customer has - helping you to integrate existing services, and thereby avoiding excessive change while allowing for the development of a migration plan to help you get onto platforms that provide future freedom of choice and cost effectiveness.

ASSIST stone

Stone Assist is a range of remote support options that allows you to get help with problems and remote administration of your IT systems. It gives you access to our Support specialists who have vast experience of solving a wide range of problems. Features can be added as required to create a truly bespoke package.

Overview of our Support capabilities:

- > Access to experienced IT support professionals.
- > Maximise the availability of your systems.
- > Solve problems quickly.
- > Access help over the telephone or using secure remote screen technology.
- > Take advantage of our range of monitoring and remote management facilities.
- > Reduce onsite engineer maintenance costs.

REMOTE AND TELEPHONE SUPPORT

All of our Remote support contracts include both Remote and Telephone support. Within the Service Hours, you can contact us and obtain the support and help you need. This is the baseline of any package.

SUPPORT PORTAL ACCESS

In addition to the normal support contact routes, we can provide you with a dedicated portal for your staff to submit and view remote support incidents.

REMOTE ACCESS

Our remote connection platform provides access to your IT systems in a secure manner to allow us to diagnose and resolve your problems.

HEALTH CHECKS

Health checks are an optional service design to help you maintain your systems and highlight common issues. These checks are performed monthly and emailed to you.

WINDOWS SERVER UPDATE MANAGEMENT

We assist in the management of Microsoft automatic update cycles for both virtual host servers and virtual machines to help ensure the smooth running of your operations.

AUTOMATED MONITORING

Our automated monitoring option provides an easy to use, low cost service to give you critical alerts by email in the event of a problem. This enables you to stay on top of your IT systems and take the necessary actions to resolve issues before they become something more serious.

SCHEDULED ENGINEER VISITS

We provide scheduled visits with a range of skilled professionals to ensure that you pay for the right level of service, for the right task required onsite.

PRE-PAID AD-HOC ENGINEER VISITS

Our pre-paid engineer visits help you resolve issues that require an on-site presence, which gives you support priority, as well as helping you to respond quickly if a problem occurs.

RAPID RESPONSE ENGINEER VISITS

Your "Big red button". If you need some professional assistance at short notice, we have accredited engineers that can help with complex issues in need of urgent attention.

SERVICE LEVEL MANAGEMENT

Service level management is the process of ensuring that ICT services are supported to an acceptable level. It involves a mutual understanding of your ICT support requirements and the facilities and services you have purchased under this contract.

ASSURED stone

Stone Assured is our latest comprehensive maintenance and support service that offers you a competitive alternative to traditional vendor packages. Our Stone Assured service can provide trusted support on everything from your critical infrastructure through to your end user devices from leading, globally recognised brands such as Cisco, NetApp, HP, Dell, Lenovo, Dynabook, Acer and more. Our flexible approach allows you to mix-and-match service level agreements across all your technologies, so you can choose the support levels you require across your IT estate, to create a package bespoke to your needs.

Benefits of a Stone Assured Contract:

- > Flexible, bespoke support packages tailored to your needs
- > Mix-and-match SLAs for your various devices and equipment in your IT infrastructure
- > Nationwide SC cleared and vendor certified engineers
- > UK regional service centres and dedicated support lines
- > Competitive alternative to traditional vendor support packages
- > Service Management including Service Delivery Manager, Service Level Monitoring and Reporting
- > Genuine vendor approved parts and 95% first-time fix rate
- > Trusted support for your equipment from leading global brands

Stone Software & Services

We can supply you with an extensive range of software that will simplify your processes, inspire your staff and students and enhance productivity across your organisation.

Having the right software is a simple yet valuable method of minimising the amount of time and resources wasted on arduous administrative tasks and lengthy processes and enables your school to focus on what it does best. Effectively utilising software can enhance the productivity of individuals and create more rewarding learning experiences. Ultimately, software is a significant component in simplifying processes and improving operations across the board. However, with such a variety available, it can be hard for organisations to figure out which combination of software, packages and licenses to choose from, let alone which provide the greatest benefits to students and teachers alike.

We're a Microsoft Gold Partner in addition to holding other major accreditations from other leading names such as Adobe, VMware and Google meaning we can supply your school with the best tools. Our highly skilled specialist staff, can advise and supply you with the most beneficial software packages dependent on your school, students and teachers requirements. Additionally, we will also provide you with on-going support, guidance, consultation and management of your software licenses.

Microsoft 365

The feature-rich, cost-effective offering that ties together the offerings Windows 10, Office 365, Intune and Enterprise Mobility + Security (EMS), into one tidy package.

Creative Cloud

Creative Cloud provides you with the world's best apps and services for video, design, photography and the web in one package. Combining apps such as: Photoshop, Illustrator, InDesign, Acrobat DC.

G-suite

Collaboration and productivity for business. G-suite brings together the apps that enable you to work effectively with more freedom in one neat package.

Productivity	Security	Safeguarding	Backup	Infrastructure	Firewalls

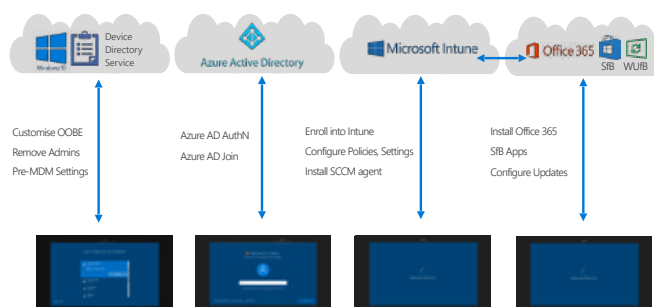

Stone Deployment & Migration Solutions

As your organisation changes and expands it can be difficult deploying new technology across multiple sites or varying sites across different locations. This may require several collaborations across various suppliers. That is where Stone can help, we can take the hassle out of deployment

Windows Autopilot

Using a collection of technologies, Windows Autopilot will revolutionise the way in which new devices are deployed in your school. It allows your IT departments to deliver a setup, preconfigured, personalised service for new devices, straight to end-users. With a few simple clicks the device transforms itself into a fully functional education ready state. This not only dramatically reduces money and time it takes for users to get up and running, but also delivers a great experience that is zero-touch for IT; empowering users with a simplified initial setup. With Cloud based configuration your school can move to the cloud at your own pace, joining devices to Azure Active Directory and enrolling them in mobile device management. With Windows Autopilot, there's no need to reimage or manually set up new devices before handing them out to your users. Here at Stone we can ship them, ready to go, straight to your school and additionally, you can use Windows Autopilot to reset, repurpose and recover devices.

SCCM Imaging

Once deployed, Windows 10 devices can be managed by tools such as System Center Configuration Manager, and other similar tools. This adds another layer of customisation to your investment and utilising already-embedded Microsoft SCCM infrastructure, we are able to factory-configure your devices with your required build/s using a Distribution Point within our Production facility, ensuring that the latest image, application stack, and driver sets are applied to your hardware prior to shipping; this includes domain join, which enables an almost zero-touch installation, saving time, and resources. The ongoing movement of data and apps to the cloud, as well as the constant use/growth of mobile devices, means that it is more important than ever to ensure only trusted users using trusted devices access your organisations data.

Cloud Migration

As your organisation changes and expands it can be difficult deploying new technology across multiple sites or varying sites across different locations. This may require several collaborations across various suppliers. That is where Stone can help, we can take the hassle out of deployment.

We understand that moving applications and data to the cloud can be daunting, so here at Stone we are available to assist at every stage of the process, providing advice and expertise to help with the transition.

As organisations look to adopt Cloud applications and data centres it is important to ensure you have a clear migration strategy, to achieve a seamless migration. Each organisation is unique, so by working with you to understand your long and short-term goals we can provide bespoke, impartial advice and consultation on what technologies are right for your individual organisation. Whether you're looking for a 'lift and shift' migration or perhaps a more complex environment we can assist with the consultation, vendor engagement, strategy, proof of concept, project planning and phasing, implementation, consumption management and ongoing support.

AV

Capture the imagination of both your staff and students with amazing AV. Whether it's the latest interactive touchscreens to enhance collaboration, digital signage solutions to deliver real-time messaging or projectors to help display images, our AV experts are on hand to offer advice on the best tech solutions available that meet the needs of your staff, your students and your school.

We have a complete range of AV solutions, encompassing the latest innovative technology to help reduce your AV dilemmas.

We offer:

- > Expert advice and on-site surveys to help you decide what's best for your school
- > The latest tech from leading vendors including Iiyama, SMART, Promethean, Epson, Casio, Samsung, LG and loads more
- > A huge variety of screen sizes ranging from 32" right through to 98" for your interactive or signage displays
- > 3, 5 or 7-year warranty on hardware and installation
- > Dedicated online and telephone support to front end any issues you may have
- > Installations by accredited and DBS checked engineers
- > Affordable and cost-effective finance agreements to suit your budget

We offer full project management from the discovery of requirements and solution design through to installation by accredited AV engineers and ongoing user adoption:

Technology – using the latest products suitable for education, we can incorporate your existing tech into the solution to ensure you receive best value all the way.

Integration – all tech can be installed individually or integrated across your school. Our systems are scalable so can be adapted as your learning space requirements evolve.

User adoption – no two educators work in the same way. We steer away from providing a one size fits all approach and work with you to create a peer-led training program to ensure your staff have the right tools for their specific needs.

Through this approach, we're able to bring you the best collaborative and innovative solutions available to help you create an engaging learning environment fit for all users.

Refurbished Solutions

Nothing is left to waste here at Stone, and if we can extend the life of an existing asset and reduce our carbon footprint, we will. Our expert technicians professionally refurbish the unwanted devices that are still in a completely usable condition, preventing unnecessary disposal and providing a cost-effective solution for those looking to invest in new tech. From Stone Approved to Encore, our range of refurbished devices brings the very best second user hardware from the world's leading technology vendors such as Dell, HP, Dynabook and Apple.

Professionally Refurbished

As a Microsoft Registered Refurbisher, we're able to fully license our computers and supply our machines with a Genuine Certificate of Authenticity.

Thorough Process

All end of life hardware goes through a thorough process to ensure it's prepared for its second life. As a Blancco Gold Partner, we ensure all data from previous ownership is fully wiped and then undergoes rigorous safety and functionality testing.

Warranty

And for peace of mind that your second life device is future proofed, all refurbished devices supplied by Stone include a range of warranty and upgrade options.

Stone Approved

Our dedicated Stone Approved portal is the place to access our high-quality refurbished PCs. To ensure you get the power and performance you're looking for, our Stone Approved devices are eligible for a range of memory and SSD upgrades. And for added peace of mind that your kit is protected for the future, every Stone Approve device comes with a 2 year no-quibble warranty as standard.

You can browse the whole range at www.stoneapproved.co.uk

Stone Refurb

Stone Refurb is the home of refurbished devices, offering real-time pricing and stock levels on affordable second-user devices, including desktops, tablets and smartphones. Our Encore PC platform hosts a range of expertly refurbished hardware from the biggest brands including of Lenovo, Acer, HP and Apple, as well as our own Stone devices.

Stone IT Lifecycle Services

IT Asset Disposal

Our award-winning IT Asset Disposal services assist your organisation in reaching sustainability goals and help protect you from data breaches and the financial penalties they incur. We ensure your data is erased to the same standard as the MOD, providing you with peace of mind that your valuable information stays yours.

Using Blancco, the best-in-industry secure data removal software, we comprehensively wipe your data bearing assets, so you have peace of mind there'll be no data breaches and your confidential information won't go into the wrong hands. We'll handle the whole process, from start to finish, with complete traceability along the way.

<p>01 FREE COLLECTIONS If you have 25 qualifying items or more, we will collect your devices free of charge.</p>	<p>02 SECURE DATA ERASURE As one of an elite number of UK Gold Blancco partners, we're able to overwrite all data bearing assets using Blancco's industry leading software to Government approved C ESG standards. This ensures that we dispose of data correctly in accordance with GDPR regulations.</p>	<p>03 COMPLETE TRACEABILITY We provide you with a full audit report and certificate of disposal, to ensure complete traceability.</p>
<p>04 POTENTIAL REBATES We can help you realise any residual value in any kit we take back, offering you fair market rebates on qualifying equipment.</p>		<p>05 ZERO LANDFILL We're committed to ensuring all of our operations contribute to a better environment, so we ensure nothing is wasted with our commitment to zero landfill.</p>
<p>06 ASSET MANAGEMENT REPORTS We guarantee 100% accountability for all assets, and can provide accurate and timely Asset Management Reports, so you can demonstrate full compliance with GDPR.</p>	<p>07 FULL ACCREDITATION Our facility is fully accredited with certifications including ISO 27001: Information Security Management, ADISA Distinction with Honours, DPCOG and Cyber Essentials.</p>	<p>08 SECURE, TRACKED VEHICLES Our facility is fully accredited with certifications including ISO 27001: Information Security Management, ADISA Distinction with Honours, DPCOG and Cyber Essentials</p>

Case Study

Hyper-Converged Infrastructure, Servers and SCCM

Allerton Grange School

- > Delivered a complete digital transformation, with Stone devices, a new server solution, improved wireless capabilities, safeguarding and more
- > Replaced the schools dated server with a powerful yet cost-effective Equinox platform
- > Saved time and hassle for IT staff by personalising devices with SCCM imaging and delivering fast issue resolution

“

Stone will resolve any issue for you instantly – it's not like you have to wait four days for anything to happen. You feel like you are the only customer, no matter what your problem, they always have time for you.

Ian Thomson, IT Manager

”

Case Study

Hyper-Converged Infrastructure

LEAP Multi Academy Trust

- > The trust wanted to improve their server network and bring all four schools on to one unified platform
- > They went to tender and felt Stone's experience and knowledge was far above the competition and the Equinox solution offered impressive value for money at half the cost of other proposed solutions
- > Configured and installed four Equinox platforms. Since then, the trust has enjoyed increased collaboration and huge cost and energy savings and are delighted with Stone's service and support

“

The Stone Equinox platform has made our lives so much easier - and the installation couldn't have been any easier. It's already clear that Stone want the same things we do and I'm confident we will develop a long-lasting partnership.

Chris Ash, IT Manager
