ABOUT US

EKJU is a Latvian company founded in 1992, dedicated to manufacturing practical and long-lasting outdoor wooden furniture of the highest quality.

We believe that wood of great quality creates a profound connection with nature.

With Northern European wood, we keep our ancient Latvian woodworking traditions alive.

Since the very beginning, we have had high standards for our materials, only using wood with high density and quality. Every EKJU product is carefully produced with love for nature, detail and craftsmanship.

EKJU QUALITY

We are Latvian craftspeople who work with attention to detail and the end-user in mind.

Our expertise lies in the extensive know-how we have accumulated over the years working with live wood. EKJU ensures that the final product is made from high-quality raw stock. We carefully select our suppliers and choose only the timber grown in the North because of its high density and durability.

Our simple step-by-step manuals make it easy for consumers to assemble our products.

We are a company with more than 27 years of experience and treat the products we create with pride and responsibility.

EKJU TREATMENT

A high-quality treatment of wood guarantees our products' durability and longevity.

WATER-BASED FLOW COAT PAINTING

Brighten up your garden by adding colour and creativity.

Our flow coat treatment is designed for decorative finishes.

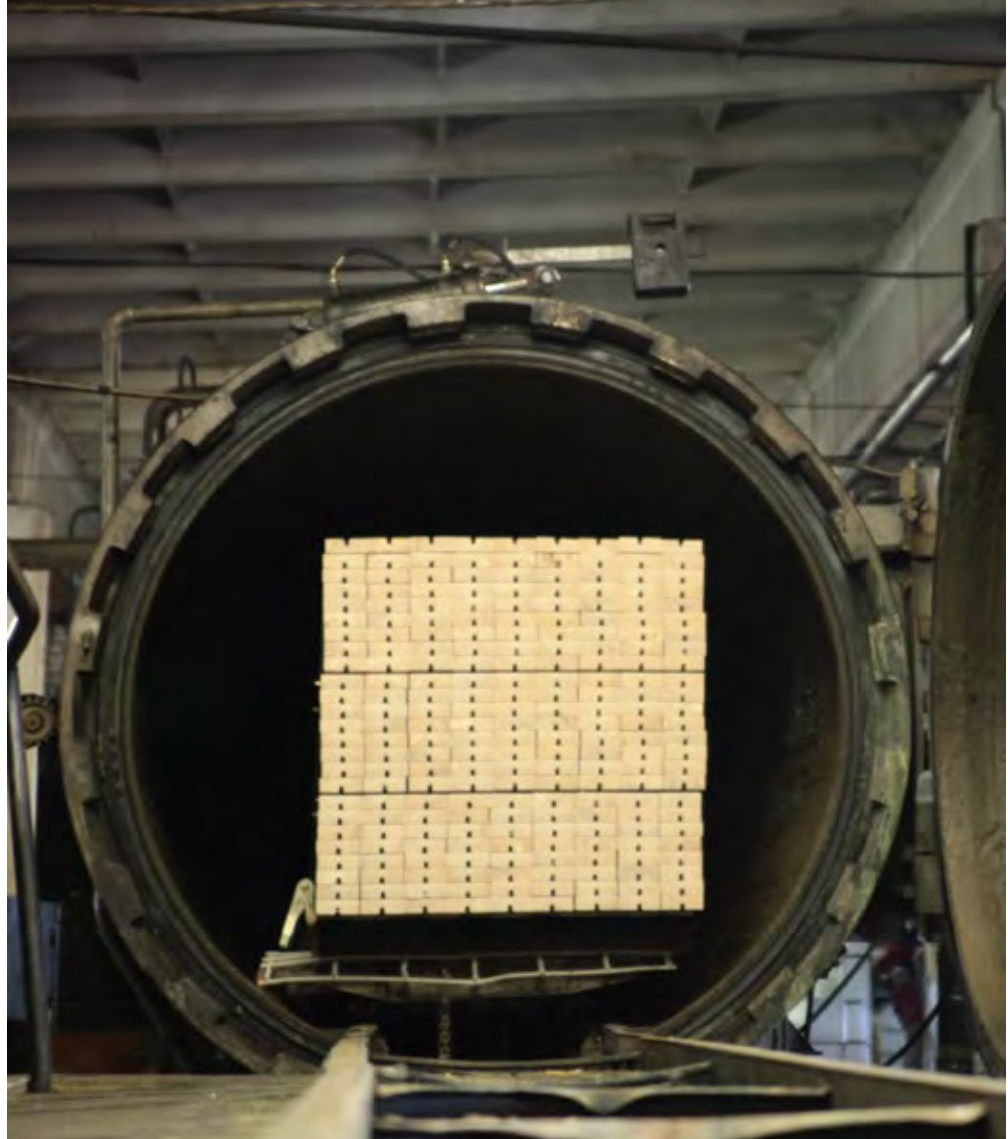

PRESSURE TREATMENT

Pressure treatment is an effective way to increase product durability with protection fungus, decay and weathering. We use a preservative system based on the well-established effectiveness of copper combined with an organic quaternary compound that is applied to timber under pressure.

Pressure-treated timber boasts lasting protection against fungi, insects such as woodworm, and the elements. It allows us to provide customers with a 5 year warranty. We take responsibility for our manufactured goods in case of rot.

EKJU products will serve you for a long time. It is highly recommended to restore the wooden surface regularly (once every 4-5 years) using a suitable product.

**Our furniture is long-lasting provided that the product is not mechanically damaged or subjected to extreme conditions, such as the inappropriate use of chemicals, excessive humidity, heat, etc.*

ECO TREATMENT

Our eco-friendly linseed oil painted and stained product selection shows our commitment to sustainability with its water repellent and UV protective properties. A surface coated with eco paint or stain is easily renewable, we recommend reapplication every 2-3 years.

LINSEED OIL PAINT

This paint is eco-friendly and made with boiled linseed oil, adding to it highest-quality natural mineral pigments and binders. It completely covers the wood structure, increases its wear resistance, water resistance and protects it from environmental impact. Unlike chemical paints, it has no unpleasant odour. The paint does not peel or crack. It extends the abrasion resistance of the wood. Natural mineral pigments provide protection from harmful UV (ultraviolet) rays. A surface coated with this paint is easily renewable.

LINSEED OIL STAIN

Stain is highly pigmented boiled linseed oil that highlights the structure of wood. Boiled linseed oil is the main ingredient of the stain. Finely ground pigments provide an even coating and protect the surface against UV rays. The stain provides long term protection from moisture. It does not peel or crack. The surface is easily renewable.

NEW

GREY DIPPING

Grey. Soft and simple. It creates a safe environment to retreat to, where we can recharge our emotional and physical batteries after being constantly bombarded by technology, social media and day-to-day errands.

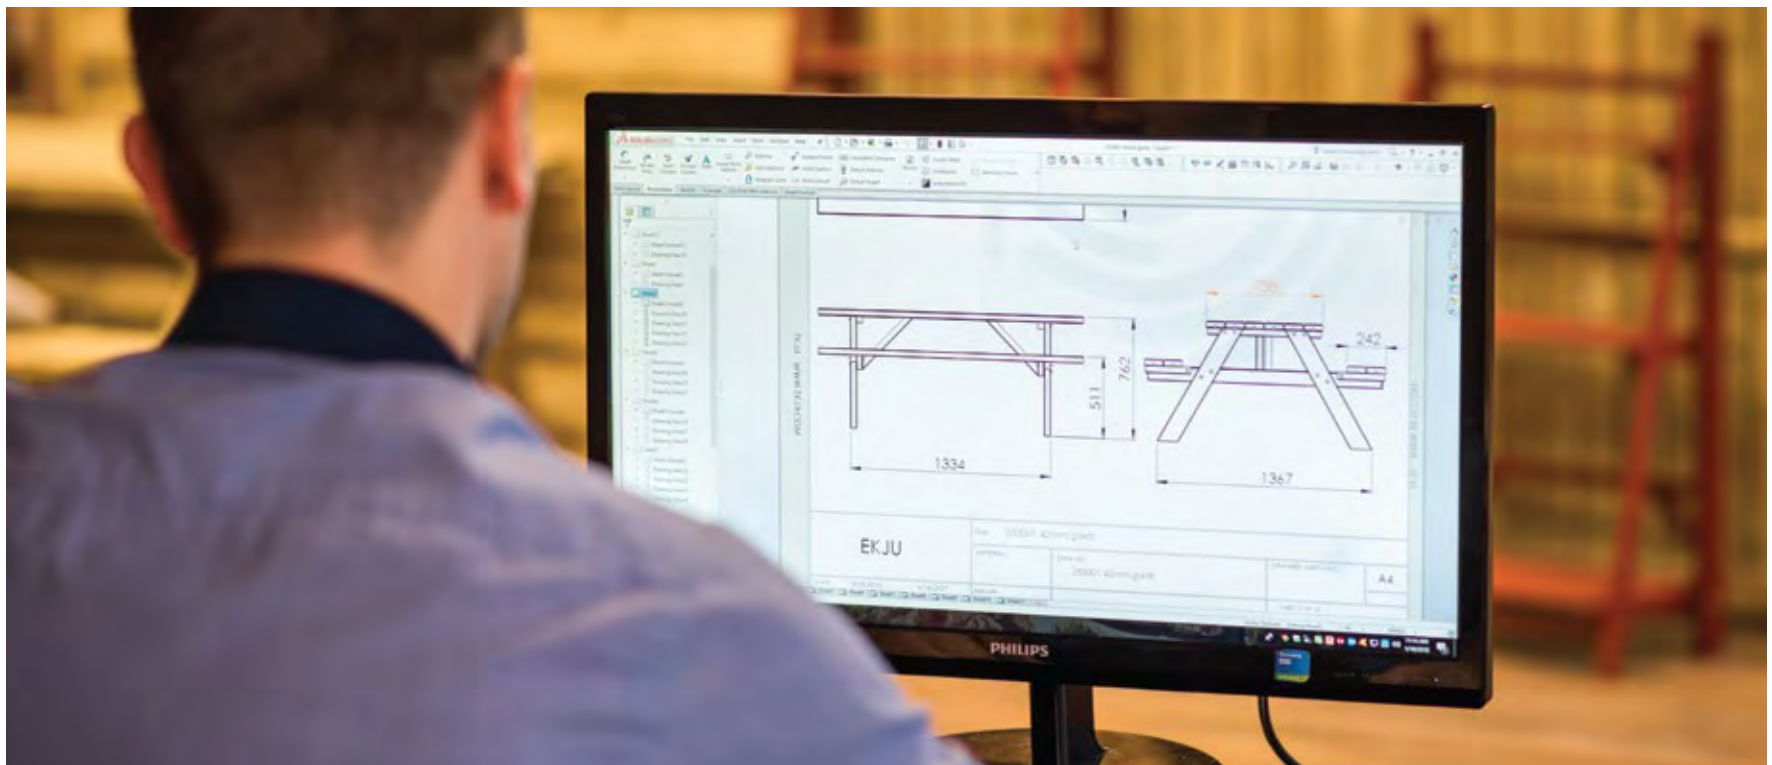

Our high quality grey dipping impregnation brings you closer to peace, closer to nature.

CUSTOM DESIGNS AND PRODUCTS

EKJU encourages you to design your own products that we will produce for you.

We develop the design together with the customer so that the final product meets the exacting customer requirements.

We offer detailed drawings and specifications, prototypes and production at volume.

WEB AND CATALOGUE SUPPORT

EKJU's in-house photo studio provides high-quality pictures for every product.

SHADE GUIDE AND COLOURS USED IN THIS CATALOGUE

01	Green impregnation	02	Brown impregnation	15	Painted with high quality TEKNOS paint – Black

EKJU CLASSIC

Our furniture is manufactured according to the latest technological processes while keeping it functional.

Designs are modern and widely used.

Tables and sets

The early evening sun is stretching across your garden, inviting the tree branches to dance in the warm summer breeze. It is neither too cold nor too hot. Just right to enjoy the weather. Our table sets bring exactly the harmony you seek when enjoying a dinner for two, or quality time with family.

Benches and chairs

After a hard day's work it always feels great to stretch out and just take it all in. Look back on the accomplished tasks of that day with a calm heart, or share a private conversation with your significant other.

SIBERIAN LARCH

Larch is a type of timber that is widely used in building exteriors, installation of footpaths and wooden furniture. Larch has high tolerance for the elements. The lifetime of garden furniture produced from larch is up to 50 years.

Essential to keep adults as well as children busy. Adults can act like children while the children run around the table. Siberian Larch has extreme longevity, ensuring that your furniture can enable many family gatherings.

HANGING SHELVES

Create a livelier look for your wall and garden.

Bring the peace of nature with you to the city.

Imagine inviting a friend over for a home-cooked meal. If they ask for extra basil for the pizza you just cooked, you turn around and take some from the shelf on the wall next to you.

PLEASANT GARDENING

Our garden series is designed to cultivate urban gardening and ideas for how to grow your own herbs or traditional medicines in the city.

No garden is complete without lush beds for the roots and pots, chicks and chickens, and hardy enough for kids who might be too curious for their own good or running around your garden.

NEW

Product number:
253910-02

Weight (kg):
34

Size (cm):
60x120xh88
Box size: 120x60xh27

Available colors:

02

Boards thickness (mm):
Sides: 92x14
Floor and Shelf: 92x14
Legs: 58x14
Crosbeams: 28x28

CO2 stored — 36,20 kg

Vegetable bed with six sections

Product number:
253478-02

Weight (kg):
36

Size (cm):
120x80xh88 cm
Box size: 120x80xh27

Available colors:

02

Boards thickness (mm):
Sides: 92x14
Floor and Shelf: 92x14
Legs: 58x14
Crosbeams: 28x28

CO2 stored — 43,73 kg

Rised bed - greenhouse

Product number:
253785-02

Weight (kg):
11

Size (cm):
100x60xh39

Available colors:

Wood shed "Mazsalaca"

Product number:
232143-01

Weight (kg): 28
Size (cm): 119x64xh118/102

Available colors:  01
Boards thickness (mm):
Side panels: 92x15
Roof: 100x8
Floor: 100x16
Back support: 92x15

CO2 stored — 36,72 kg

 natural
product

Raw wood

Wood shed

Product number:
232103

Weight (kg): 43
Size (cm): 179x64xh178/162

Available colors:  01
Boards thickness (mm):
Side panels: 92x15
Roof: 100x8
Floor: 100x16
Back support: 92x15

CO2 stored — 47,26 kg

Wood shed

Product number:
232164-01

Weight (kg): 43
Size (cm): 178x51xh110/119

Available colors:  01
Boards thickness (mm):
Side panels: 92x15
Roof: 100x8
Back support: 92x15

CO2 stored — 17,14 kg

Wood shed "Salaca"

Product number:
232144-01

Weight (kg): 44
Size (cm): 173x64xh178/162

Available colors:  01

Panels: 92x15
Roof: 100x8
Floor: 100x16

CO2 stored — 59,38 kg

Garden storage cabinet "Piltene"

Product number: 232134-02

Size (cm): 131x48xh170/180

Boards thickness (mm):	Panels: 92x14	Floor: 92x14
	Door: 92x14	Frames: 28x28
	Roof: 92x14	

Weight (kg): 96

Available colors:

CO2 stored — 121,38 kg

We craft our
furniture with
respect for nature.

By supporting responsible wood sourcing
and forest management, we keep our
promise of being environmentally friendly.
Look for our FSC®-certified products.

This is why we are certified by the
Forest Stewardship Council® (FSC®).
Certification number: BV-COC-002739.

MAINTENANCE

The natural materials the furniture is made from are specially treated to withstand environmental damage.

However, over time the treated wood begins to lose its original colour. Despite the colour change, its sturdiness stays the same, as the impregnating agent continues to protect the wood.

To restore or paint our garden furniture, simply ask for advice at a local DIY store. They will suggest the most suitable treatment to use.

**Staying abreast of the ongoing development of the woodworking industry, "Ekju" LTD reserves the right to, without prior consent, modify the appearance and technical specifications of the product.*

FORESTATION

Forest regrowth takes a long period of time, regardless of whether it is restored in the natural way or with human assistance. Every year, EKJU employees and with their family members plant new forests, contributing to the forest regeneration process.

Properly managed forests can provide wood for centuries, which is why "EKJU" LTD asks everyone to be responsible and respectful towards the green jewel of the world – the forests.

All materials used during the manufacturing process – raw materials, all components of the finished products, even the packaging – are intended to be recycled.

Wood can be used for energy production; polyethylene, paper and metal parts are recycled.

The old Latvian proverb says, "One who gives to the poor shall not lack".

It contains a deep philosophical meaning which our company believes in – to give back to nature what we take from it. It is important for us to maintain harmony with nature and future generations.

FACTS ABOUT WOOD

We create outdoor furniture with respect for the unique details in every piece of wood, which gives which gives your furniture its personality.

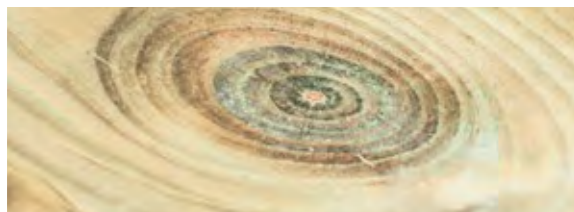

Our timber is treated with a high-quality impregnating agent that provides a high level of protection in outdoor environmental conditions. The appearance of mould or blue stains on the surface of the wood is completely acceptable.

It is normal for the wood to swell when exposed to moisture. Under certain conditions, the original shape of wooden products can be slightly altered or even warped.

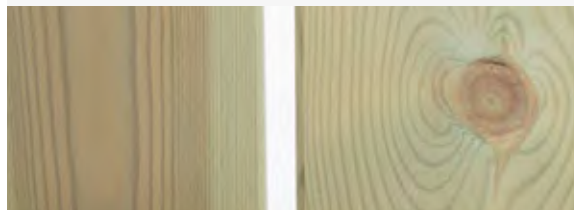

The structure of the wood, the location of branches and growth rings in cross-section are always different, depending on the type of wood and its characteristics. This gives the wooden product its natural appearance.

Dried wooden products can crack, which reveals the naturally uneven structure of the wood. Cracks may appear on furniture with different deterioration levels and age. We are able to reduce the frequency and size of potential cracks by processing the timber, but it cannot be prevented completely.

Wood is a living material that retains its natural characteristics for a long time after becoming garden furniture. Therefore, the appearance of resin "pockets" is inevitable, especially in warm weather or under direct sunlight.

Wood is sensitive to sunlight and some parts can change colour earlier than others. Over time, the colour difference will even out.

LOGISTICS

Large orders of EKJU products are fully suitable for transportation by lorries. Each product is safely packaged and then secured to pallets for ease of transportation.

EKJU has also developed an online packaging system suitable for our impregnated garden products. We pay extra attention to ensuring that products sold online are as dry as possible, with our specially-designed packaging.

Quality since 1992
