POWERGEAR™ X

- Patented PowerGear™ mechanism makes cutting 3,5 times easier compared to standard mechanisms.
- Blades made from extra hard, corrosion resistant steel (CrMoV) ensures that they stay sharper longer.
- Unique rotating handle movement ensures that all fingers are used simultaneously and exert an equal but reduced pressure for maximum power and less effort on every cut.

SMARTFIT™

- Optimal reach thanks to adjustable length of the handles
- Lightweight product, comfortable to use.
- Ergonomic design
- Optimally shaped to fit the hand.
- Fits your need - multi-purpose usage with adjustability of cutting capacity.
- Fits small to large hands.

POWERLEVER™

- Lightweight FiberComp™ handles designed for small and medium-sized hands.
- Reduced cutting effort and ability to use all fingers simultaneously thanks to patented PowerLever™ mechanism.
- Easier cutting and cleaning due to non-stick PTFE PowerLever Pruners coating on the upper blade to reduce friction.
- Ambidextrous locking mechanism.

FINGERLOOP

- Lightweight and strong FiberComp™ handles with SoftGrip™ for added comfort and safety.
- Fingers are protected by the loop in the lower handle.
- Corrosion resistant, stainless steel blades.

SINGLESTEP™

- Lightweight and durable handles made from polypropylene
- Comfortable grip due to sturdy handles.
- Steady cutting action due to well-balanced design.

QUANTUM™

- High-quality aluminium body balanced by comfortable cork TruGrip™ handles.
- Clean, accurate cutting thanks to TruEdge™ blade technology including precision ground hardened steel and anti-friction coating.

SOLID™

- Optimised for quick snipping of plants and thinner branches.
- Ultra durable construction
- Comfortable SoftGrip™ handles.

PowerGear™ X pruners

Fiskars PowerGear™ is a versatile family of tools that include pruners, loppers and hedge shears to cover most of the cutting needs in the garden. The ingenious gear mechanism which boosts the power of the cut is complemented by sharp, quality steel blades and lightweight, durable FiberComp™ handles.

Anvil or bypass?

BYPASS

Both blade and counter blade press into the wood to make a clean cut with less compression damage (cutting blade bypasses counter blade in a scissors-like action). Possible to cut close to the stem. Best suitable for fresh wood.

ANVIL

Upper blade is forced through the wood with greater pressure as the anvil blade supports the branch and spreads the pressure until the cut is complete. Best suitable for dry or dead wood.

Fingerloop pruners

Fiskars Fingerloop range of two pruners and one snip offer a neat and ergonomic way to prune branches and perform basic cutting tasks without excessive hand strain. The signature loop handle engages the power of all fingers in the cut while the SoftGrip™ inlays give an extra level of comfort for extended work in the garden when pruning.

Wood preparation

A vertical photograph of a dense forest. The scene is filled with tall, slender trees, likely spruce or fir, their trunks and branches creating a complex pattern of light and shadow. Sunlight filters through the canopy, creating a soft, hazy glow and highlighting the texture of the wood and the needles. The overall mood is serene and natural. The text 'Wood preparation' is overlaid in the upper left quadrant in a clean, white, sans-serif font.

Over 300 years of axe expertise.

In the midst of the Finnish woodlands lies the small village of Fiskars, where the timeless traditions of crafting the highest quality hand tools have been passed down through the generations since 1649.

X-Series axes

Fiskars next generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

KEY BENEFITS

- ✓ 35 degree convex cutting bevel angle for splitting axes - the convex shape strengthens the edge to make it less sensitive to fracture
- ✓ Perfect balance between head and shaft for the most safe, comfortable and efficient swing
- ✓ Ultralight and durable FiberComp™ shaft minimizes fatigue and makes the axe virtually unbreakable
- ✓ Optimal anti-shock surface structure ensures a comfortable, firm grip
- ✓ Hooked end of the handle prevents the axe from slipping out of the hand
- ✓ Comes with a plastic sheath for easy carrying and storage

Chopping vs. splitting

Chopping axes

Fiskars next generation chopping axes serve all manner of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Choose the right size for you

1. LENGTH TEST

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit and if the end of the shaft reaches the armpit the axe is too long.

2. WEIGHT TEST

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up with a wrist turn close to your body as pivotal point (axe is vertically in your hand at the end of the movement). If you can't lift the axe this way, the axe is too heavy.

Saws

To make sawing as easy as possible you need a reliable saw suitable for the task. That is why we have developed a variety of saws. We have saws for cutting stems and thicker branches and saws with curved noses which enable cutting in hard to reach or difficult positions.

Xtract™ Saws

Fiskars Xtract™ range features a unique retractable mechanism and integrated belt clip making them safe to carry and easy to store. The blades made of hardened steel ensures long lifetime and sharpness for the saw. SoftGrip™ handle with finger guard ensures a safe grip.

Fixed blade saws

Fiskars fixed blade saws feature highly efficient tooth profile enabling fast and accurate sawing. The impulse hardened blades stays sharper for longer. SoftGrip™ ergonomic curved handle with finger guard ensures a safe & comfortable grip.

Bow Saws

Fiskars bow saws are excellent for sawing stems and thicker branches. Curved nose enables cutting in hard to reach or difficult positions. Cuts on both the push and pull stroke.

Saws

Fiskars saws have teeth designed especially for wood. They allow you to prune branches and clear foliage in difficult positions safely with a lightweight saw. Fiskars Xtract™ range features a unique retractable mechanism and integrated belt clip making them safe to carry and easy to store.
