HIGH ENERGY • LOW EMISSIONS • MINIMAL ASH

# HOTMAX

Natural Wood Dust Fuel Logs

---

## CLEAN BURNING • CONVENIENT

HOTMAX wood fuel logs are an ideal source of smokeless heat for your home in winter and for outdoor use in summer.

They're denser, drier and burn cleaner than even the best kiln dried or seasoned hardwood logs. They're very easy to light and they give you high energy heat very quickly with very low emissions and minimal ash residue.

Clean

## A UNIQUE SUSTAINABLE STORY

We make HOTMAX from the dust we extract from the BEDMAX shavings we make for horse bedding. So both products come from 100% natural, renewable UK forestry timber, and the residue from both can be composted after use and returned to the soil.

# HOTMAX

Natural Wood Dust Fuel Logs

---

## RENEWABLE • RESPONSIBLE

HOTMAX logs are made of 100% natural, recycled, compacted softwood dust. They contain no additives or contaminants whatsoever.

For those looking for a truly eco-friendly alternative to imported briquettes or hardwood logs, HOTMAX offers you a uniquely sustainable British fuel log, in a fully recyclable, compostable or burnable paper sack.

Efficient

British

A photograph of a fire burning in a metal fire pit. The fire is bright orange and yellow, with flames rising from a pile of logs. Below the fire pit, a stack of logs is visible. The background is a blurred outdoor setting with a stone wall and some greenery.

## INDOORS • OUTDOORS • WINTER • SUMMER

HOTMAX fuel logs are the perfect eco-friendly source of high energy heat for every season and every reason, including outdoor cooking.

- Woodburners
- Multi-fuel Stoves
- Open Fires
- Firepits
- Camp Fires
- Chimineas
- BBQs
- Ceramic Grills
