*The Natural Choice*

## *A History steeped in Horticulture*

Evergreen Horticulture is a long established & reputable horticultural manufacturer of exclusive growing media products and specialist mix substrates using 100% Irish Moss Peat.

We are an energetic family-run business now in our third generation, harvesting and manufacturing peat and compost products for almost 60 years. Located in County Tyrone, Northern Ireland, Evergreen commenced trading as a small family business back in the 1950's manufacturing baled peat for the grower market in the U.K. and Ireland. Harvested from our own 250 acres of Irish Peat Bogs, Sphagnum Moss Peat is used exclusively as the base line in all our products due to its superb organic structure and ability to deliver optimal plant growth.

Today, quality continues to be pinnacle to the Evergreen ethos and we remain a dynamic, family-run business, perfecting our craft and making every effort to continually add value to our extensive range of growing media, from retail products to crop specific substrates, ensuring optimum growing results are achieved from the hobby gardener to the commercial grower.

***Our customer base is extended throughout the U.K., Ireland and abroad comprised of reputable Garden Centres, Commercial Growers, Retail Nurseries, Professional Landscaping Services, DIY & Hardware Stores, Local Councils & Farm-shops.***

For Evergreen, quality is not only a promise, it's a genuine performance and remains the driving force behind our family business in terms of exceptional products, competitive prices, service and delivery. The strength of the Evergreen brand is now a key factor in distinguishing our products from that of other competitors, hence why Evergreen remains to be one of the leading manufacturers of growing media products within today's horticultural industry.

## *Benefits Of Irish Moss Peat*

As a substrate constituent, Irish Moss Peat is superior to any other component when it comes to performance due to its ability to hold water and nutrients, and its unique structure providing roots with air. Lignin levels are significantly higher in older and more decomposed Irish Peat, meaning it is far less likely to break down during mechanical handling which can sometimes occur in much younger Peats. Peat is naturally free of human and plant pathogens and contains beneficial microbes which help to prevent fungal diseases with the naturally occurring Humic acids stimulating root growth.

## *Quality, Sustainability, Re-generation*

Evergreen's purpose is to ensure that we reflect our values and high standards for quality in the products we manufacture and the services we provide to our customers. Our commitment to quality is reflected in our ISO 9001:2015 accreditation, recognised as the world's leading quality management standard which has been implemented by over one million organisations in over 170 countries globally.

We accept our environmental responsibility to ensure the sustainability and protection of our Peat Bogs and this rich natural resource for generations. Creating quality growing media products from sustainable natural resources, with an emphasis on 100% recyclable packaging, remains at the fore of our business. Our 250 acres of Irish Peat Bogs are non-designated SSSI sites ethically and environmentally managed to support re-growth.

Developments are in progress to add 'peat reduced' and 'peat free' alternatives to our extensive range of horticultural products.

## IRISH MOSS PEAT

Evergreen Irish Moss Peat is made from carefully selected sphagnum mosses that are screened and blended to produce a superior product. A natural product, free from artificial additives, our Irish Moss Peat products ensure easy maintenance by assisting sandy soil to retain water and nutrients, opens up heavy soils and generally improves the structure of all soil types.

- Basket and Container Crops

## SOIL CONDITIONERS AND PLANTERS

The Evergreen 36L, 4 Plant Growbag, is made from only the finest Irish Sphagnum Moss Peat. Combined with the Evergreen fertiliser pack, it ensures to provide an all-round multi-use, large enough for 4 vigorous plants and ideal for fruit, vegetables, flowers and plants. The Evergreen Growbag is suitable for use in greenhouses, conservatories, balconies or patios.

SIZE	PACK TYPE	PER PALLET
36 Ltr	Planter	100

- Greenhouses or Patios
- Fruit & Vegetables
- Indoor & Outdoor

Evergreen Top Soil is a fertile loam based soil with a high content of organic matter, specially selected for use in the garden. It is ideal for making or building up raised beds where existing soil is poor or for replacing soil that is tired and unsuitable for replanting. Evergreen Top Soil is rich in organic matter, adds volume to beds and conditions soil.

SIZE	PACK TYPE	PER PALLET
25 Ltr	Bag	70

- Replacing Old Soil in Borders
- Creating Raised Beds
- Lawns and Landscaping

Evergreen Farmyard Manure contains a rich and wide range of minerals and nutrients. Produced from composted farmyard manure with all its natural ingredients, it is perfect for enhancing existing soil which has poor structure or is low in nutrients. It adds rich organic matter into the soil, improves structure, texture, soil aeration and water retention.

SIZE	PACK TYPE	PER PALLET
40 Ltr	Bag	70

- Improving Soil Composition
- Mulching
- Planting Out

## JOHN INNES SEED AND 1, 2, 3

The Evergreen John Innes Seed Sowing Compost is your ideal choice for sowing seeds. It contains the perfect balance of peat for a better, more consistent growing medium and improved moisture retention. It also has an ideal balance of water holding capacity and aeration making it a perfect environment for a healthy root system.

The Evergreen John Innes Compost No. 1 is ideal for pricking out or potting-up young seedlings or rooted cuttings. This compost has a carefully balanced nutrient content to suit most young plants and allowing them to grow. The perfect choice for a young garden to make it thrive.

The Evergreen John Innes Compost No. 2 is ideal for general potting of most house plants and vegetable plants into medium size pots or boxes. It contains double the amount of nutrients found in John Innes no. 1 to suit established plants. The perfect everyday compost encouraging nourishment and support.

The Evergreen John Innes Compost No. 3 is a richer mixture for final re-potting of vegetables, plants and for mature foliage plant. It is also ideal for shrubs and interior planters, or outdoor containers. This extra-rich blend of sandy loam, peat and fertiliser make Evergreen's John Innes no. 3 compost a perfect addition to plants that have been well-established in your house or garden.

## BARKS AND MULCHES

Evergreen Mini Chip Bark is a small, decorative mulch consisting of mini-chips of quality bark. It is ideal for use on pots and containers, helping plants flourish during warm weather by assisting moisture retention, and in colder weather offering protection to delicate roots against frost.

SIZE	PACK TYPE	PER PALLET
50 Ltr	Bag	80
3m3	Tote Bag	1
Bulk	Loose	Min. 90m3

- Decorative Ground Cover
- Suppressing Weeds
- Protecting Roots from Frost

Evergreen Decorative Chip Bark consists of large bark chips that provide a unique and decorative background to plants, shrubs and play areas. Not only does it decorate paths and borders, it also acts as a weed suppressant and minimises garden maintenance.

SIZE	PACK TYPE	PER PALLET
75 Ltr	Bag	51
3m3	Tote Bag	1
Bulk	Loose	Min. 90m3

- Decorative Ground Cover
- Suppressing Weeds
- Protecting Roots from Frost

Evergreen Composted Bark is a top quality screened mulch that can be used as a soil conditioner. It is packed tight with organic nutrients and provides excellent structure to poor quality soil. Ideal for use as a top soil dressing providing extra conditioning to soil during the autumn months.

SIZE	PACK TYPE	PER PALLET
60 Ltr	Bag	70
3m3	Tote Bag	1
Bulk	Loose	Min. 90m3

- Retains Moisture
- Decorative Ground Cover
- Suppressing Weeds

## OWN LABEL

### *Expertly Blended, Exceptionally Packaged*

Let us help your business create beautifully packaged, premium quality 'Own Label' growing media products.

With our Professional Design Service, we can assist your business from concept through to creation, guaranteeing exceptional quality products to put your name to and ones that your customers will love.

Our expertly blended products are produced using only the very finest Irish Sphagnum Moss Peat harvested from our 250 acres of sustainable Irish Peat Bogs which are non-designated SSSI sites ethically and environmentally managed to support re-growth.

Available in a range of products and sizes, we source all our 100% Recyclable Bags from only the very best polythene manufacturers, recognised for producing strong, durable and eco-friendly packaging.

## MARKETING

### *Point of Sale Boards*

We support our customers' advertising activities by supplying free point of sale correx boards and PVC banners for every product line within our range. We also supply free custom-designed correx boards for all Own Label products.

For promotional offers, growing tips and advice, visit our website and online social media pages.

## PROFESSIONAL SUBSTRATES

Evergreen Horticulture has amassed a solid reputation for providing an extensive range of high-quality and innovative crop specific growing solutions for professional growers. We produce only the finest substrates developed for optimal growth, carefully formulated and developed to match the needs of each individual crop and unique growing situation.

Only the finest quality raw materials and premium fertilisers, pesticides and physical additives are used to develop every bespoke custom mix. Our substrates are made from carefully selected Irish Sphagnum Moss Peat harvested from our own bogs in Ireland. Peat replacement levels can be tailored to individual requirements.

Our Technical Team is committed to working in close co-operation with our clients to deliver only the best type of growing solution for every type of condition and crop.

If you are seeking substrates with the promise of healthy cultivation, then let our products safe-guard your recipe for successful growing.

## DELIVERY AND EXPORT

Evergreen is one of the fastest-growing horticultural manufacturers, successfully delivering & exporting our extensive range of retail products and professional substrates throughout the U.K., Ireland and worldwide.

Our products can be tailored to suit the climate and growing conditions of each individual customer and export market. We currently export to over 20 countries, including Egypt, Mauritius, the Middle East, Morocco and Turkey.

We offer competitive shipping rates from Belfast and Dublin on the clients preferred shipping terms. We can also offer competitive rates Ex-works and FOB Belfast or Dublin.

All export products and shipments are attested and accompanied by a valid Phytosanitary Certificate issued by the Department of Agriculture, Environment & Rural Affairs for Northern Ireland. A container fumigation service is also available should this be required by the importing country.

For the home market, we have our own branded, in-house haulage service, working in conjunction with committed sub-contractors during busy trading periods. We maintain a fleet of artic, rigid, walking floor, and flat trailers and can deliver our products in both loose and bulk format. A mounty forklift service is also available and our customers have access to a live 24hr tracking system on all orders placed.
