

# Smiemans Projecten *specialist in glass constructions*

For more than 40 years Smiemans Projecten BV builds all types of glass constructions. We can provide the design, construction and installations. From a turn-key garden centre or a botanical garden, we can do the job for you!

**SMIEMANS**  
PROJECTEN

# Design, new build and development of *garden centres*

## BRINGING OUR KNOWLEDGE TO OUR CLIENTS

Whether it is a design, refurbishment or a turn-key project; our experts know exactly how to translate an attractive, original design into a sound and functional building. With proper planning, routing, equipment and all within the available budget.

## “TOTAL SERVICE” PROJECTS

Smiemans delivers more than design and construction of your project: we offer you total service, meaning that we are on your team in the preparation phase, advising on issues like building regulations, technical installations (heating, computerised climate control, energy saving, the application of renewable energy), routing advice and fitting out of sales areas.

From the beginning, our aim is to ensure that you'll be receiving your clients and visitors in your own, successful retail environment!

If you choose Smiemans Projecten, you choose *quality and innovative glass constructions.*

Smiemans Projecten designs and builds these innovative and affordable buildings for many profit and non-profit purposes. We have built many projects as exhibition area, botanical garden or restaurant. A place where light, heat, sound and decor can well be managed. Whether it is a visitor centre for the World Expo or a turn-key botanic glasshouse.

We can also take care of the refurbishment or expansion. In a short time and with a small budget we can create a metamorphosis. An extension offers more convenience and comfort for your customer and more sales area for you. We do everything we can to receive your customers in a well-balanced atmosphere!

**Are you looking for a creative and affordable solution for a place where many people meet?  
Choose for the fast realisation, durability and efficiency of a glasshouse construction.**

## AN EYE-CATCHING AND STYLISH APPEARANCE

Garden centres and other direct retail enterprises choose Smiemans' HighLight and wide span glasshouse constructions, and by doing so they create stylish, representative sales and display areas. These buildings are available in many varieties and combinations, further decorated with coloured insulation panels, roof tiles, wood finishing and a wide range of glass types. This will ensure that your project stands out when compared with stores of your colleagues and competitors!

## YOUR PROJECT IS UNIQUE

Smiemans Projecten operates in a complex, fast-developing market; we design and build special, eye-catching projects. An individual approach is needed and we therefore consider every project to be unique. At the same time we always strive to use standardised and proven systems. This way costs are kept under control, a necessity in today's economic conditions. At Smiemans, we have the know-how to find the right answer for the entire realisation of your project. The design and engineering of glasshouse constructions, the production and sourcing of materials and the complete installation on site by our experienced technicians.

## EXPERIENCED MAINTENANCE CREW

After completion of a project, Smiemans' responsibility does not end: every glasshouse and construction supplied by us comes with a variety of long term warranties and an excellent service & maintenance.

An experienced service crew is permanently available for our clients; whenever necessary they are on their way to ensure flawless operation of buildings and equipment. Every day our specialised technicians are working hard to realise new projects in a perfect state, but also to keep them 'as good as new' for our esteemed customers!

## COMPLETE PACKAGE

We take the responsibility for the construction or renovation from start to finish. From design to completion. The entire planning, organization and supervision of your project is in the hands of our experienced team. Smiemans' long experience in design and installation of heating, cooling, shading, climate control, renewable energy systems and other facilities enables us to act as a turn-key contractor.

Let us know how we can help you!
