WORKBOOK AW21

WELCOME....

Its been a long road that has brought us to the launch of **BOOTPAC**. Its taken a bit of luck, some huge coincidences & a global pandemic.

Faced with time on our hands we decided that 2020 was the year to go ahead and turn Mike's idea into reality. So now, nearly a year later, while everything else has stood still, **BOOTPAC** is here and very much a real business.

We have products, a factory, a website, warehousing, distribution & even a compliance policy. Its all very grown up - almost as if we know what we are doing.....

All thats missing are some decent customers. So if you know one, please let us know.

The BOOTPAC principle....

The BOOTPAC started life as a solution to a reasonably common problem - How do you get all your garden waste and DIY rubbish to the recycling centre without getting the car filthy?

Use bin bags? Rubbish just tears them and they split

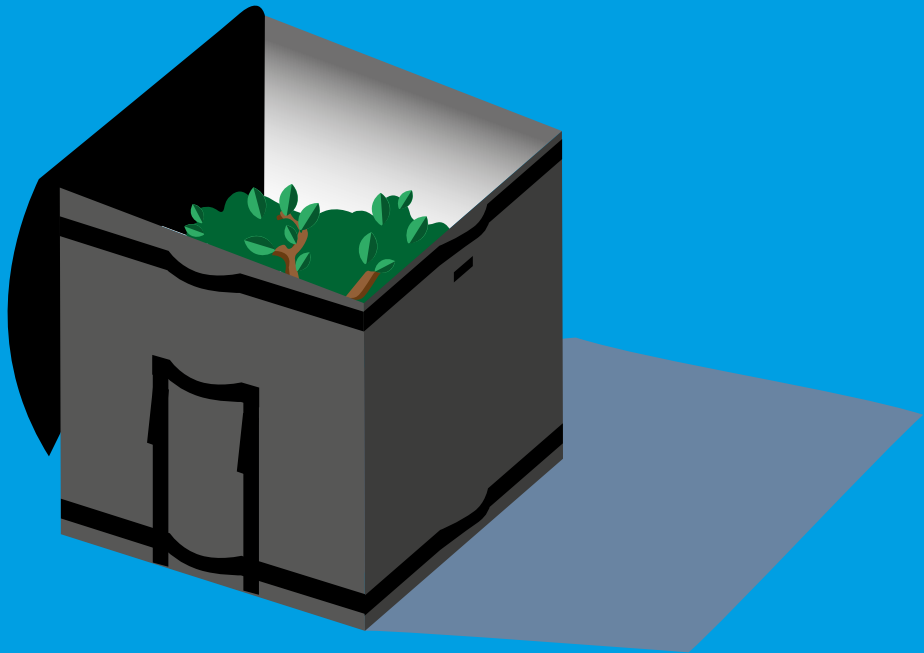

Use a tarp? You can't carry anything in it & boot still gets dirty

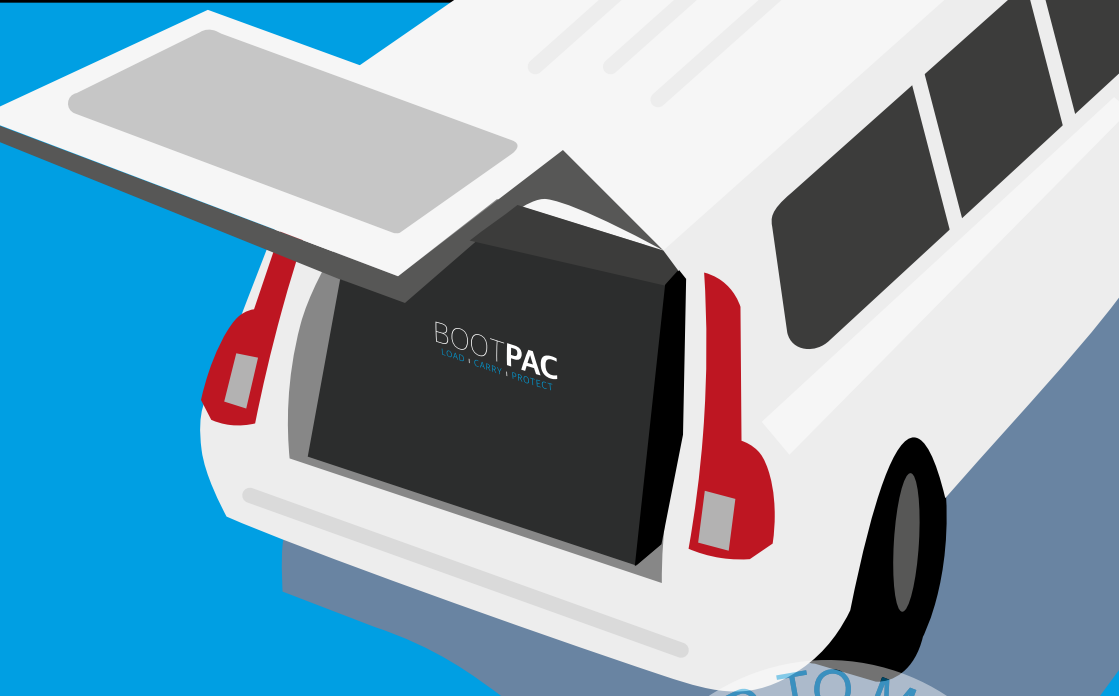

Use a bulk bag? Water runs out & twigs scratch the roof lining

It needed to be easy to load, easy to seal in all the wet & dirt, & easy to pick up & carry.

It also had to be easy to fit, versatile enough to fit a wide range of cars and compact enough to store.

A few prototypes later we realised we were onto something that was actually going to be much more versatile than we had thought.

BOOTPAC Classic

In the garden the BOOTPAC can be filled while upright with wet & insects sealed inside. Use straps to compress bulky items.

In the vehicle the BOOTPAC is used horizontally, extended to fit the length required, seats up or down.

Provides an easy to access load space while protecting the car interior and paintwork

Adjustable hooks fix around door struts and internal handles or headrests supporting the BOOTPAC

Grab handles on all sides make lifting easy at all angles

BOOTPAC Classic

The largest of our bags. The BOOTPAC Classic is designed to fit in Estates, 4x4's and SUV's. It provides sealable storage for wet and dirty items. It can be filled in or out of the vehicle. Versatile storage & protection

Core Features:

- Adjustable to fit almost all larger cars with a hatchback door
- Seals in wet, dirt & insects
- Folds out to protect car during loading
- Keeps contents hidden from view for security
- Wipe clean

Classic specific features:

- Adjustable size Fits items up to 1.5m in length
- Has up to 1170 litres of storage capacity
- Side straps adjust length and can be used to compress contents

Enduses:

- Garden and DIY waste recycling
- Wet and dirty outdoor sports kit transportation & storage
- Holidays and staycation packing
- Tradesman, keeps tools out of view and keeps car clean

Dimensions:

- 100cm wide x 78cm High with adjustable length 65-150cm

BOOTPAC Mini

In the vehicle the BOOTPAC is used horizontally, extended to fit the length required, seats up or down.

Provides an easy to access load space while protecting the car interior and paintwork

Adjustable hooks fix around door struts and internal handles or headrests supporting the BOOTPAC

Grab handles on all sides make lifting easy at all angles

BOOTPAC Mini

Our smaller bag the BOOTPAC Mini is designed to fit in almost any car and provide protection for smaller loads, or just to protect the vehicle day to day. Just as protective as its big brother.

Core Features:

- Adjustable to fit almost all cars
- Seals in wet & dirt
- Folds out to protect car during loading
- Keeps contents hidden from view for security
- Wipe clean

Classic specific features:

- Has up to 400 litres of storage capacity
- Handles on all sides for lifting

Enduses:

- Garden and DIY waste recycling
- Wet and dirty outdoor sports kit storage
- Holidays and staycation packing
- Tradesman

Dimensions:

- 94cm wide x 65cm High x 70cm in Length

BOOTPAC Welly & Boot Pacs
